

## MEDICALLY VERIFIED IMMUNIZATION RECORDS

### *School and Child Care Staff Guide*

All immunization records turned in to schools or child care centers are required by law to be medically verified. A medically verified Certificate of Immunization Status (CIS) form is a:

- **CIS printed by a health care provider or school from the Washington State Immunization Information System (WAIIS).**
  - Health care providers update immunization records in the WAIIS, which means the form counts as medically verified.
  
- **CIS printed from MyIR Mobile.**
  - MyIR is a free online tool from the Washington State Department of Health (DOH) which allows families to view and print their official immunization records themselves. These print-outs come from the WAIIS, which makes it medically verified. People can register for MyIR Mobile at <https://myirmobile.com/register/>. After clicking on the button for Washington state, people can select between English and Spanish languages.
  
- **The most recent version of a printed CIS completed by hand.**
  - A hand-filled CIS must be verified with a health care provider signature, or medical records must be attached so staff can verify the CIS for accuracy.
  - Find the CIS form by visiting the School and Child Care Immunizations Information for Families web page at <https://doh.wa.gov/vaxtoschool>.

Staff who need help with reviewing immunization records for enrollment can use DOH's Registration Flowchart for Immunization Records (PDF). Additional staff resources for school and child care immunization requirements can be found at <https://doh.wa.gov/scci>.
