Performance Measure #1 – Increase the uptake of new and under-used child and adolescent vaccines; specifically focusing improvement efforts and reporting on Varicella, Rota Virus, HPV and Pediatric Influenza.

Reporting Measure

- A:** Number of doses of vaccine ordered by each LHJ
- B:** Number of doses administered as recorded in CHILD Profile

PM#	Objectives / Strategies	Action
1	Assist with multiple efforts to assure that King County health care providers are able to participate in Vaccines for Children, and visit 40% of clinic sites in King County that use state supplied vaccine at least one time this calendar year to provide education and training on CHILD Profile and recruit/improve their participation.	Approximately 130 site visits to health care provider clinic sites by Education Specialist or Public Health Nurse
1	Conduct training session for health care providers that includes new information about vaccines, vaccine administration, and improving uptake in vaccines for children and adolescents.	One well-attended training session conducted for providers.
1	Assess barriers to adolescent immunization, develop interventions to increase community awareness and understanding of vaccine preventable diseases among adolescents and their prevention through immunization, and facilitate access to immunization services for adolescents in the SeaTac, Tukwila, and Burien communities of south King County.	Employ Nurse Specialist to track the: 1) number of access referrals to WithinReach and participating practices, 2) pre- and post intervention number of HPV, MCV, and Tdap doses administered to adolescents at participating practices, and 3) HPV, MCV, and Tdap pre- and post intervention coverage rates at participating practices.
1	Continue to assess and respond to vaccine hesitancy issues from providers and the public.	Provide clinical and community trainings in vaccination standards and vaccine hesitancy to identify and recommend evidence-based strategies that would increase vaccination rates; Promote immunizations through at least two press releases, web-based and other methods to assure accurate information gets to parents.

Performance Measure #2 – Improve the timely, complete identification and standard, effective investigation of notifiable conditions per WAC 246-101.

Reporting Measure

- A:** Percent of notifiable condition cases reported to the LHJ within the required timeframe (per WAC)
- B:** Percent of notifiable condition cases reported to the LHJ where investigation was initiated within the timeframe specified in the Guidelines
- C:** Percent of notifiable condition cases reported to the LHJ with a completed investigation as indicated by completion of “essential fields”

PM#	Objectives / Strategies	Action
2	Perform disease investigation, surveillance, outbreak response, and	Employee epidemiologists, public

	reporting activities of the PHSKC Communicable Disease Immunization Section to meet WA State requirements	health nurses and support staff to conduct investigations on disease reports to Public Health, and report disease cases to DOH in accordance with requirements. Assure availability of medical epidemiologist and staff to assist with investigations and disease control activities. Assure use of current, standardized disease investigation protocols by staff
2	Expand chronic Hepatitis B and C surveillance in King County	Analyze and interpret local viral hepatitis B and C surveillance data, and summarize and disseminate key findings; collaborate with the state department of health and CDC to develop and implement methodologies.

Performance Measure #3 – Develop and implement effective community and health care system interventions to address obesity and its consequent burden of chronic disease. Interventions may target worksites, schools, communities, or primary medical care.

Reporting Measure

A: Number and description of LHJ activities and interventions to address obesity or chronic disease and association risk factors in the community.

PM#	Activity	Resources
3	Strengthen and maintain infrastructure for the Chronic Disease Injury Prevention (CDIP) Section to implement strategies for prevention of obesity, tobacco, and other causes of chronic diseases, and to leverage other grant resources.	Maintain Disease Control Officer (DCO), Health Services Administrator, and support staff positions, to coordinate and enhance efforts of existing program staff. The DCO is also principal investigator on section grants funded program to develop environments that support Healthy Eating, Active Living and other disease prevention activities.
3	Identify and support key local, state and federal policies to decrease obesity and subsequent burden of chronic diseases	CDIP Section staff funded by 5930 and other grant funds will provide multiple activities such as coalition building, health promotion and policy change activities.
3	Lead and Support coalitions and community partnerships that seek to decrease obesity and subsequent burden of chronic disease. This effort will include: <ul style="list-style-type: none"> An integrated approach to obesity prevention that connects healthy eating and active living with prevention and control of many chronic illnesses, and Working with internal and external stakeholders on programs and gaps, reviewing best practices, training staff, and using data to guide program development. 	Infrastructure, program staff and community partnerships and coalitions all serve as resources to this work. Partners include schools, King County Housing Authority, child care providers and coalitions such as Healthy King County.
