

Public Health Improvement Partnership
QUARTERLY MEETING

March 11, 2013

AGENDA

2

- Update from the Secretary
- Project updates
 - ▣ 2012 PHIP Report
 - ▣ Agenda for Change implementation
 - ▣ Foundational Public Health Services
 - ▣ Activities and Services, Indicators, other Standards updates
 - ▣ Proposal to Measure Foundational Public Health Services
- Partnership restructure to support Agenda for Change implementation
- Comments from the Secretary

FROM THE SECRETARY

3

- Governor
- Secretary of Health Recruitment
- Legislative update

PROJECT UPDATES – 2012 PHIP Report

4

2012 Public Health Improvement Plan —

Implementing the Agenda for Change

www.doh.wa.gov/Portals/1/Documents/Pubs/822-031_2012PHIPreport.pdf

PROJECT UPDATES – Agenda for Change

5

Agenda for Change Implementation

- **March** - Subgroups co-chairs to draft implementation plans
- **April/May** – Vet the implementation plans with partners
- **June** – PHIP Partnership approve implementation plans

PROJECT UPDATES – Agenda for Change

6

Foundational Public Health Services

- Literature review
- Defined Foundational Public Health Services and examples of other important programs
- Cost model
 - Cost estimates from: DOH and 8 LHJs
(King, Spokane, Clark, Whatcom, Grant, NE Tri, Walla Walla, Lincoln)
 - Defined a common approach to indirect charges and overhead
 - Work sessions to review the model in March & April

PROJECT UPDATES – Activities & Services

7

2012 Public Health Activities and Services Inventory

- 5th year
- 2012 LHJ and DOH data collection begins mid-March
 - LHJ through survey
 - DOH through PALs group
- Data available this summer
- Questions have stabilized
- Data base is a wealth of information!

<https://fortress.wa.gov/doh/hip/PHIP/>

PROJECT UPDATES - Indicators

8

Local Public Health Indicators

- Indicators will be updated in 2013
- Local Public Health Indicators technical group met in December
- Workgroup waiting for new direction from PHIP

www.doh.wa.gov/lphi

PROJECT UPDATES – Standards

9

Accreditation and Other Public Health Standards Updates

- Department of Health and Spokane Regional Health District accreditation
- Next standards review – 2015/2016
- Exemplary practices
- Standards/Accreditation coordinators
- Centers for Excellence
- Limited Set of Public Health Standards

www.phaboard.org/wp-content/uploads/PHAB-Standards-and-Measures-Version-1_0.pdf

www.doh.wa.gov/PublicHealthandHealthcareProviders/PublicHealthSystemResourcesandServices/PerformanceManagementCentersforExcellence.aspx

PROJECT UPDATES – Standards

10

Proposal to Measure Foundational Public Health Services

- Applies quality improvement to accreditation
 - Washington can continue to innovate among non-PHAB LHJs without undermining PHAB
 - Now that we have Foundational Public Health Services, shouldn't accreditation address it by answer the question: Does this LHJ provide the Foundational Public Health Services?
- Builds on:
 - PHAB Standards and Measures
 - Activities and Services
 - Local Public Health Indicators
 - Program and other performance measures
- Reflects variation among health departments – some go well beyond Foundational Public Health Services
- Provides a way to differentiate levels of accreditation

AGENDA FOR CHANGE

Reshape Public Health

Agenda for Change

Agenda for Change
Action Plan

Agenda for Change
Implementation

<h2>An Agenda for Change</h2> <p>PUBLIC HEALTH IN A TIME OF CHANGE</p> <p>Public health in Washington State is at a crossroads. After a century of effectively preventing death and illness and increasing the quality of life of our residents, today we face the dual challenges of a severe funding crisis and a change in the nature of preventable disease and illness in our state. These new realities must lead to a rethinking of how we do our work if we are to:</p> <ul style="list-style-type: none"> Sustain our past successes – protect the capabilities of our communicable disease response, public health laboratory services, core environmental public health work, and emergency preparedness and response. Confront our emerging challenges – address chronic diseases such as diabetes and heart disease, resulting from underlying causes such as tobacco use, poor nutrition and physical inactivity, as well as address preventable injuries, and giving everyone a chance to live a healthy life regardless of their income, education, racial or ethnic background. Use our available resources most efficiently and effectively – forge new partnerships and use technology to shape a better, more effective public health system. <p>In short, we need an agenda for change as we move forward, even during these tough times.</p> <p>Public health has profoundly improved the lives of people in our state for over a hundred years. In the early 1900s, the average life expectancy in the U.S. was 49 years. Today it is approximately 80 years. While clinical health care is valued, most of this increase is due to public health actions – for example, the dramatic drop in infant mortality and deaths from infectious diseases resulting from improved hygiene, sanitation, immunization, and communicable disease control efforts. While they remain hidden because they are successful, the public health efforts that provide safe drinking water, safe food, and safe living conditions are active and on-going today and require resources and trained public health professionals to assure continuing effectiveness.</p> <p>The current economic crisis threatens these resources and, therefore, these programs and our citizens' overall health and well-being. Local and state funding for public health is rapidly eroding, resulting in the loss of trained public health professional staff ranging from 25-40% in some jurisdictions and compromising our overall public health system's ability to respond to critical health issues.</p> <p>As importantly, new challenges confront us. While public health has made great strides in controlling infectious disease, a new set of preventable illnesses has emerged. Although Washingtonians are living longer, they are still dying early from preventable causes, often following years of preventable illness and disability. Chronic diseases such as diabetes and heart disease, resulting from underlying causes such as tobacco use, poor nutrition, and physical inactivity, continue to cause long-term illnesses and disability and are cutting lives short.</p>	<p>October 2010</p> <p>Reshaping Governmental Public Health in Washington State</p> <p>Co-Chairs Gregg Grossfeldler John Whisman</p> <p>Members: Susan Allen Jean Brewster Carlin Garrison Dennis Dennis Joe Fishbomer David Fleming Kathy Johnson Barry Kling Mary Louker Joel McCullough Patrick O'Carroll Jesse Palacer David Smith Jodie Van Buren Mary Wendt</p> <p>DOH Staff Alissa Havel Marie Zlate</p>

TRANSFORMING BUSINESS PRACTICES

21

Public Health Standards —

Committing fully to quality improvement by striving to meet public health standards

- Last review 2010/2011
- Next review 2015/2016
 - All LHJs less those PHAB accredited (Spokane)
 - PHAB Standards, Version 1
 - Revised or limited set?
- Standards Workgroup

www.phaboard.org/wp-content/uploads/PHAB-Standards-and-Measures-Version-1_0.pdf

PROPOSED PHIP ORGANIZATIONAL STRUCTURE

Strategic Priorities **Foundational Public Health Services** **Transforming Business Practices**

PHIP LOGIC MODEL

23

COMMENTS FROM THE SECRETARY

24

- Where we've come from...
 - Authorizing legislation
 - Fundamental accomplishments
- Where we need to go
 - Governor's priorities
 - PHIP alignment
- How do we get there
 - Value our public health system
 - Attend to the State/Local relationship

NEXT STEPS

25

- Meet on June 5, **iLinc**
- What do we need to get done between now and then?
