

Executive Management Advisory Council Member Agency Recommendations

1. Fully implement Executive Order 13-06 in all state agencies
www.governor.wa.gov/office/execorders/documents/13-06.pdf
2. Re-visit school tobacco policies to assure they cover e-cigarettes and marijuana (OSPI)
3. Require high needs schools to offer breakfast after the bell (via a phased-in approach) in order to increase food access and thus prevent negative health outcomes (OSPI)
4. Establish a Patient Centered Health Home /Medical Home recognition program with a community centered approach. Recognition program to be based on national certification programs. (HCA)
5. Create a subsidized small business micro-loan program to start up neighborhood produce stands to sell fresh vegetables and fruits (Commerce)
6. Accelerate development of a CHW Task Force as called for in the SHCIP (HCA)
7. Align the WA State EMAC member agency regions with the regional service areas to be determined after the Joint Adult Behavioral Health Task Force recommendations come forward in September 2014
8. EMAC will seek to find intentional alignment of funding, resources and data to support a common agenda of building healthy communities and populations
9. Forward the Prevention Framework suggested performance measures to the Core Performance Measures Steering Committee as recommendations for the prevention measures
10. Include seed funding for a Prevention/Wellness trust as part of the State Innovation Model grant to provide incentives for cross-sector work on the identified prevention priorities
11. Provide funding for robust measurement – including Behavioral Risk Factor Surveillance Survey with sub county data (EMAC)
12. Create a way to easily “mash up” data from different agencies – e.g. see maps of health indicators with layers for education, housing, crime, air quality (EMAC)
13. Integrate commerce web based annual reporting into the recently completed data base (DSHS and 3 largest housing providers) to support an on-going database and workable data sharing arrangements would greatly enhance the effectiveness of housing-based health partnerships. (EMAC)
