## **Boil-water advisory ends for Lakeview Park Water Association in Grant Co.**

**OLYMPIA** — The boil-water advisory issued to customers of the Lakeview Park Water Association on June 11 is over. Residents no longer have to boil their drinking water.

The association issued the advisory after potentially harmful *E. coli* bacteria were detected in routine water quality monitoring tests. The advisory affected about 400 homes and businesses.

The source of contamination was not found during an inspection of the system, but the association made improvements recommended by the state Grant County Health District. A series of water quality tests shows the water now meets safe drinking water standards.

Residents who have questions about their water can call the Lakeview Park Water Association at 509-398-6942.
