Public Health – Always Working for a Safer and Healthier Washington

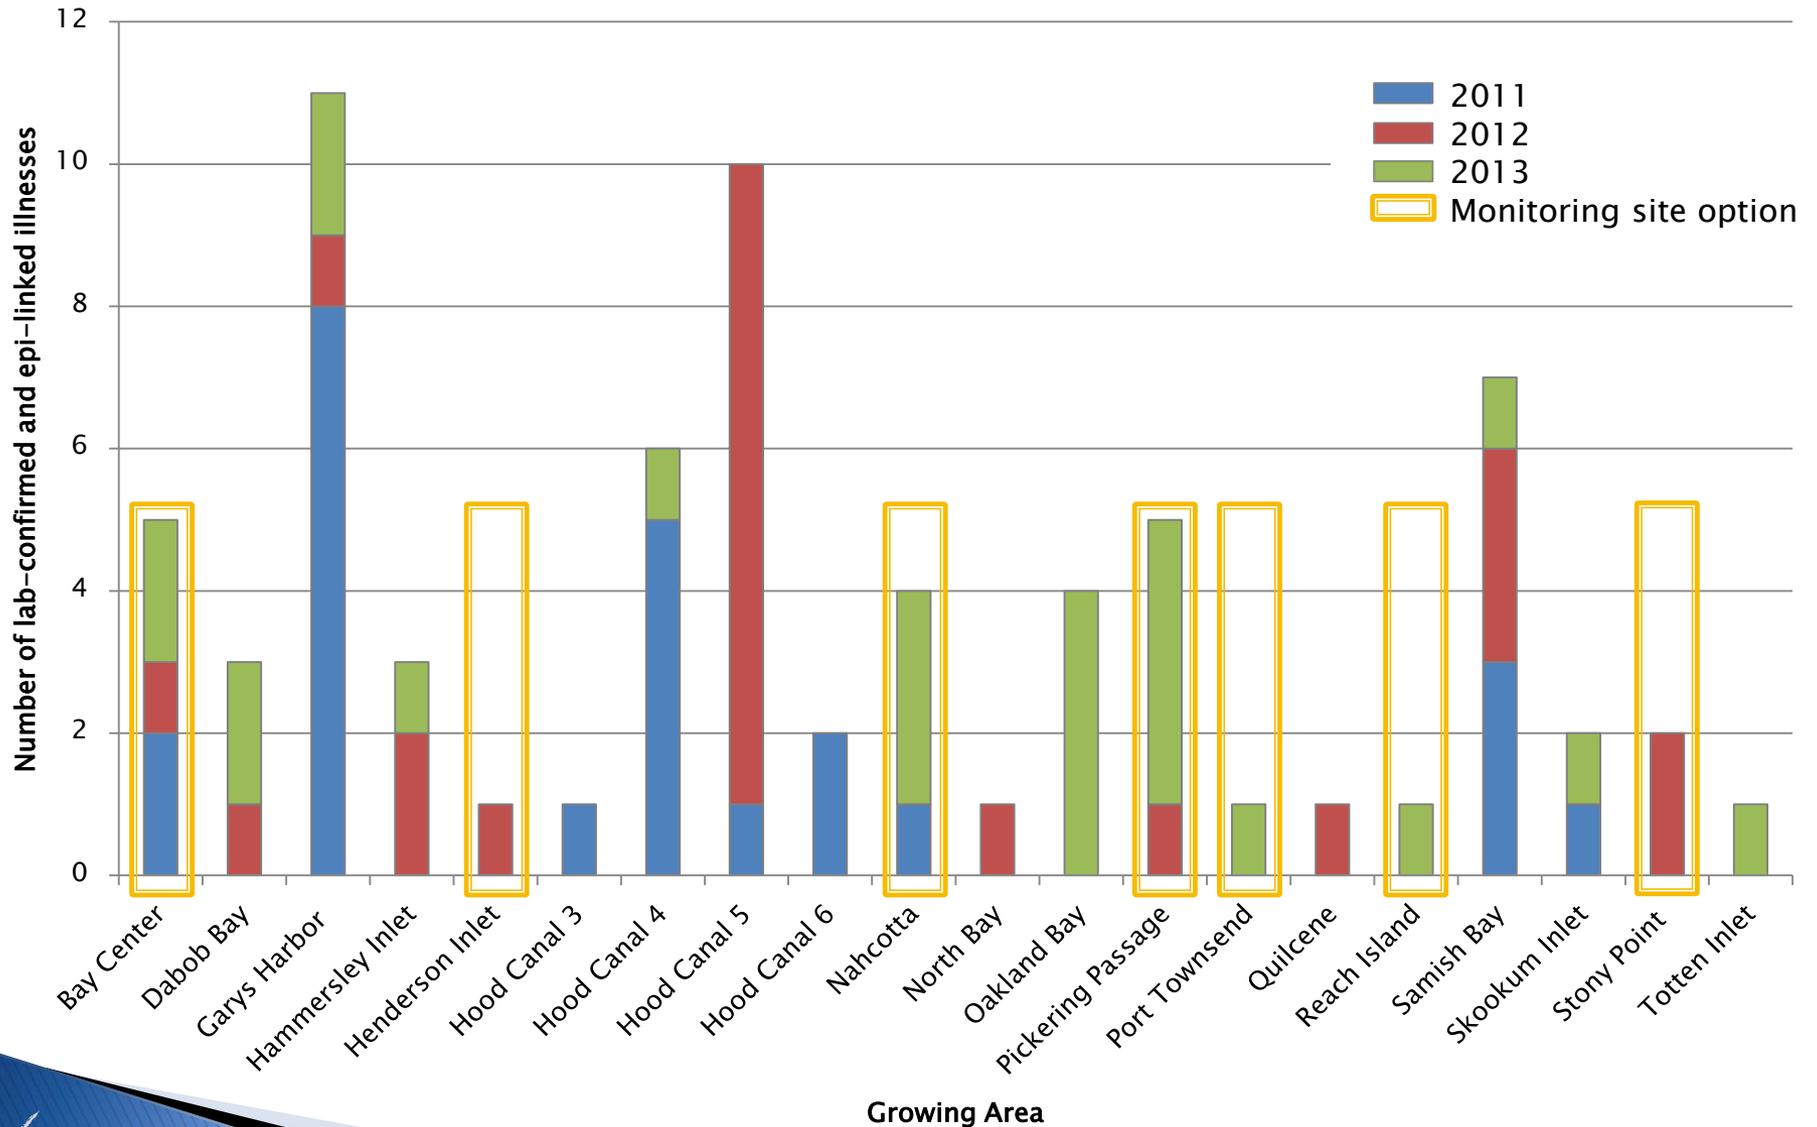

2014 Monitoring Sites

Growing Area	Site	
Dabob Bay	Tarboo Bay, Rock Point	
Grays Harbor	Brady's	
Hammersley Inlet	Orca Ln	
Hood Canal 3	Brinnon, Taylor	
Hood Canal 4	Beacon Point	
Hood Canal 5	Hama Hama	
Hood Canal 6	Union, Gold Coast	Or: Sisters Point?
Hood Canal 7	Montana Reach	
Hood Canal 8	Mcdermott, Gold Coast	
Hood Canal 9	DeNotta	
Bay Center	Goosepoint, Nisbet	Or: Nahcotta?
Skookum Inlet	Wallins	
North Bay	Victor, Taylor	
Oakland Bay	Chapman Cove, Taylor	
Samish Bay	Taylor	Or: Blau?
Totten Inlet	Oyster Bay, Taylor	Or: Gallaghers Cove?

Single Source Vibrio Illnesses by Growing Area (2011–2013)

Single Source Vibrio Illnesses by Growing Area (2011–2013)

Summer Data Collection/Research

- ▶ Decide whether to continue 2013 studies:
 - Kumamotos and Pacifics
 - Shucked meats and shellstock
 - Within growing area comparisons
- ▶ Potential partnerships:
 - PSI: Relay
 - PNNL/NOAA: Early warning tools for *Vp* prediction
 - FDA: Supply chain study, icing study

Summer Data Collection/Research

- ▶ Levels through tidal cycle
 - Identify purge time after low midday tides
- ▶ Studies that don't require lab capacity:
 - Raw oyster consumption survey
 - Relationship between temperature and substrate
 - Growers' collection of temperatures at harvest

Other research ideas or data gaps we can work to fill while informing the rule revision?
