

# Do you have a Septic System?

## Think at the Sink

Don't pour cooking grease, oil, or household chemicals down the drain. Put grease in a container to harden before discarding in the trash. Household chemicals can be taken to a hazardous waste collection site.

Eliminate or limit the use of a garbage disposal. Dispose of food waste in the trash or start a compost.

Keep your drinking water safe, protect the environment, and save money by maintaining your septic system.

**Happy SepticSmart Week!**  
**September 21-25, 2015**
