

**STATE OF WASHINGTON  
DEPARTMENT OF HEALTH  
INTENT TO AWARD SOLE SOURCE NOTIFICATION**

The Department of Health (DOH) intends to award a sole source contract to Health Information Design, LLC (HID) for the continued hosting, operation and maintenance of the Department's Prescription Monitoring System. HID will also provide all necessary updates, enhancements and modifications for the system.

The Prescription Monitoring Program was established under RCW 70.225. The program's purpose is to improve patient care and prevent prescription drug misuse by collecting all the records for Schedule II, III, IV and V drugs...

In 2011, DOH issued a solicitation and subsequently contracted with Health Information Design, Inc. for delivery and hosting of an existing, fully operational Prescription Monitoring System to collect controlled substances dispensed by licensed pharmacies or dispensed directly to patients by the prescribing practitioners in Washington State. This information is then made available to medical providers and pharmacists as a tool in patient care.

HID is the proprietary license owner of RxSentry which is licensed to DOH and is the base software for the Prescription Monitoring system.

The contract will be issued on July 1, 2014 for an initial two year period with possible extensions for three (3) additional two year periods.

This is not an invitation to bid. However, vendors contemplating the above requirements may submit capability statements detailing their ability to meet the state's requirements within five (5) calendar days of this announcement. In the absence of other qualified sources, it is the state's intent to make a sole source award of the contract.
