

# Okanogan Family Planning Client Data Sheet - 2014

DOH 930-136, March 2015  
Office of Healthy Communities  
(360) 236-3693

## Key Points....

An estimated 429,910 women in Washington are in need of publicly funded contraceptive services and supplies.<sup>1</sup>

- In 2014, OFP served 654 family planning clients; 93% of clients obtained care in their home county.

Population groups with greatest need for publicly supported family planning services include women under age 20, women with low income, and women of color.<sup>2</sup>

- In 2014, 84% of OFP's clients had an income at or below 138% of poverty; 42% used Medicaid coverage; and 44% were persons of color.

Access to affordable, effective contraceptive methods is critical to preventing unintended pregnancies.<sup>2</sup> An estimated 288 unintended pregnancies are prevented per 1,000 users of publicly funded contraceptive services.<sup>3</sup>

- In 2014, OFP's contraceptive services prevented over 150 unintended pregnancies. This translates to about 80 fewer births from unintended pregnancies, 50 fewer abortions and 20 fewer miscarriages.

Long-acting reversible contraceptives (LARC)—intrauterine devices and hormonal implants—are among the most effective methods for preventing unintended pregnancy.<sup>2</sup>

- In 2014, 86% of OFP's female clients used some method of birth control, including 22% who used LARC.

Publicly funded family planning services yield a net saving of \$5.68 for every \$1 invested.<sup>4</sup>

- In state fiscal year 2014, Washington's Medicaid program paid for 41,456 births at an average cost of \$9,253.<sup>5</sup> An estimated 50 percent of these births were unintended at conception.<sup>2</sup> The average annual cost for publicly funded contraceptive care in Washington is \$335 per person.<sup>3</sup>

Public investment in family planning programs also helps avoid cervical cancer, HIV & other sexually transmitted infections, infertility, and preterm and low birth weight births. When these broader benefits are included, the return on investment increases to \$7.09 for every public dollar spent.<sup>4</sup>

Okanogan Family Planning (OFP) is one of 16 agencies contracted by the Washington State Department of Health in 2014 to distribute state and federal (Title X) family planning funds.\* In 2014, OFP's contract with the Department of Health supported a family planning center in Okanogan County.

\*15 agencies received state and federal (Title X) funds; 1 agency received state funds only.

County Where Family Planning Services Were Provided
