

Planned Parenthood of Columbia/Willamette Client Data Sheet - 2014

Key Points....

An estimated 429,910 women in Washington are in need of publicly funded contraceptive services and supplies.¹

- In 2014, PPCW served 4,104 family planning clients; 88% of clients obtained care in their home county.

Population groups with greatest need for publicly supported family planning services include women under age 20, women with low income, and women of color.²

- In 2014, 86% of PPCW's clients had an income at or below 138% of poverty; 80% used Medicaid coverage; and 25% were persons of color.

Access to affordable, effective contraceptive methods is critical to preventing unintended pregnancies.² An estimated 288 unintended pregnancies are prevented per 1,000 users of publicly funded contraceptive services.³

- In 2014, PPCW's contraceptive services prevented nearly 1,130 unintended pregnancies. This translates to about 570 fewer births from unintended pregnancies, 380 fewer abortions and 180 fewer miscarriages.

Long-acting reversible contraceptives (LARC)—intrauterine devices and hormonal implants—are among the most effective methods for preventing unintended pregnancy.²

- In 2014, 98% of PPCW's female clients used some method of birth control, including 20% who used LARC.

Publicly funded family planning services yield a net saving of \$5.68 for every \$1 invested.⁴

- In state fiscal year 2014, Washington's Medicaid program paid for 41,456 births at an average cost of \$9,253.⁵ An estimated 50 percent of these births were unintended at conception.² The average annual cost for publicly funded contraceptive care in Washington is \$335 per person.³

Public investment in family planning programs also helps avoid cervical cancer, HIV & other sexually transmitted infections, infertility, and preterm and low birth weight births. When these broader benefits are included, the return on investment increases to \$7.09 for every public dollar spent.⁴

Planned Parenthood of Columbia/Willamette (PPCW) is one of 16 agencies contracted by the Washington State Department of Health in 2014 to distribute state and federal (Title X) family planning funds.* In 2014, PPCW's contract with the Department of Health supported family planning centers in Clark County.

*15 agencies received state and federal (Title X) funds; 1 agency received state funds only.

Client's County of Residence	County Where Family Planning Services Were Provided
	Clark
Clark	3,593 (88%)
Cowlitz	123 (3%)
Other	48 (1%)
Out of State	340 (8%)
