Subject: public comment on WiFi in Schools
Date: Wednesday, February 26, 2014 1:11:45 PM

I do not believe that it is wise to have WiFi running throughout schools, especially in elementary schools. Children's still developing nervous systems and brains, which some studies (such as the 2013 French Expert Appraisal and the 2013 BCCDC) show to be negatively impacted by WiFi, are not replaceable if harm is caused. Our children are not experiments and I think that WiFi use in schools, especially elementary, should be stopped immediately.

Thank you,
Faith de Coeur
