Hi DOH,

My name is Sonia M. Hoglander. I am an Electrical Engineer and a Building Biologist, specializing in electromagnetic radiation in homes, schools and work places. I own a business called HomEvolution where I do health assessments and mitigations in built environments. I have done numerous assessments for local schools. I am a Board Member for the International Institute for Building Biology & Ecology since 2012. I am a member of CHE-EMF and CHE-WA (Collaborative on Health& the Environment... Electromagnetic Fields and Washington (a working group focused on Children's issues)). I am an organizing member of the Washington Wireless Awareness organization (WWA).

<http://www.meetup.com/stopseattlesmartmeters/>

I am also aligned with numerous local doctors of repute in the electromagnetic radiation (EMR) arena; Dr. John Ruhland, Dr. Dietrich Klinghardt, Dr. Carl Jelstrup, and Dr. Samuel Milham. The recent Northwest Children's Environmental Health Forum in Tukwila, WA (hosted by CHE-WA), which featured Dr. Ted Schettler, also emphasized the dangers of Microwave Radiation in our schools and damaging side effects on all exposed children.

I am partnered with and adamantly support Karen Nold's detailed response to your report draft. Evidence is mounting, in favor of the precautionary principle (a cornerstone to Building Biology standards), and it is immoral to manipulate the details in favor of telecommunications and energy corporations (with for profit motivations). Karen Nold is a founding member of Means For Change.

Our combined organizations will take further action to protect children in our schools if known harm of Microwave Radiation is not recognized.

Regards,

Sonia M. Hoglander
