

# CHILD Profile and you: Working to keep children healthy

CHILD Profile sends free mailings to parents or guardians of all Washington children, from birth to age six. These mailings contain

important health, development and safety information. The mailings are available in English and Spanish.

CHILD Profile also gives health care providers an easy way to track immunizations in Washington's Immunization Registry.

**If you live in Washington State, have a child under age 6 and do not receive the mailings, you can sign up. Call the Family Health Hotline at 1-800-322-2588 or visit [www.childprofile.org](http://www.childprofile.org)**

CHILD Profile is a program of the Washington State Department of Health
