### **Scoring Criteria for Medical and Scientific Accuracy:**

- 4 = All information and materials are acceptable, and no corrections are necessary
- 3 = A few minor pieces of information or material are unacceptable, but they can be easily corrected or eliminated
- 2 = Many pieces of information and material are unacceptable, but they can be easily corrected or eliminated
- 1 = Many pieces of information and material are unacceptable, and one is difficult or costly to correct or eliminate
- 0 = Many pieces of information and material are unacceptable, and more than one is difficult or costly to correct or eliminate

IR = The curricula or material has been submitted and is in review.

If the information is central to the theme of the curricula and therefore can not be deleted and requires revision, it is considered difficult or costly to correct.

Curricula can be revised and resubmitted to the Department of Health. Please contact DOH for the most updated list.
