

**WASHINGTON STATE DEPARTMENT OF HEALTH  
OFFICE OF SHELLFISH AND WATER PROTECTION**

**ANNUAL GROWING AREA REVIEW**

**PREPARED BY:** Lawrence Sullivan, Public Health Advisor

**AREA:** Dungeness Bay

**YEAR ENDING:** December 31, 2008

**CLASSIFICATION:** Approved, Conditionally Approved, Prohibited

**ACTIVITIES IN THE GROWING AREA IN 2008**

The area was sampled ten times during 2008 with seven of these sample events conducted while the Conditionally Approved portion of the growing area was in open status. The Conditionally Approved portion of the area is closed from 11/1 through 1/31 in accordance with the conditional area management plan.

**ANALYTICAL RESULTS OF WATER SAMPLES:**

Table #1 is an analysis of the most recent 30 samples collected from each of the Dungeness Bay sampling stations in the Approved and Prohibited areas. Table #1 shows that the Approved stations meet the water quality standards for this classification, although Station #115 is of concern due to elevated bacteria levels. Table #2 is an analysis of the most recent 30 samples from each Conditionally Approved area stations excluding samples collected during the months of November, December, and January. All stations pass the water quality standard in the Table #2, although station #106 is of concern.

**CHANGE IN ACTUAL POLLUTION SOURCES THAT IMPACT THE GROWING AREA:**

The area is impacted by non-point pollution associated with stormwater runoff, on-site sewage disposal, animal waste management practices, and wildlife. Active pollution sources investigations are underway.

**CLASSIFICATION STATUS:**

- Well within the classification standards
- Meets standards but some concerns
- Meets standards but threatened with a downgrade in classification
- Fails to meet classification standards

**REMARKS AND RECOMMENDATIONS:**

All stations currently meet the water quality standards for the existing classifications. Matriotti Creek is a tributary to the Dungeness River and is on the 303d list for fecal coliform.

**WASHINGTON STATE DEPARTMENT OF HEALTH  
OFFICE OF SHELLFISH AND WATER PROTECTION**

**ANNUAL GROWING AREA REVIEW**

**MANAGEMENT PLAN EVALUATION – BRIEFLY DESCRIBE THE FOLLOWING COMPONENTS:**

1. Have all parties involved complied with the conditions in the management plan ..... Yes
2. Has reporting been adequate to manage the conditional area ..... Yes
3. Does the area consistently meet approved area criteria when it is open for harvest ..... Yes
4. Has a field inspection of critical pollution sources been conducted..... Yes

## TABLE 1

### SUMMARY OF MARINE WATER DATA (SRS)

Growing Area: **DUNGENESS BAY**

Classification: **Approved, Prohibited**

From **04/05/2006** To **12/09/2008**

### FECAL COLIFORM ORGANISMS/100 ML

Station Number	Classification	Number of Samples	Range	Geometric Mean	Est. 90th Percentile	Meets Std.
103	Approved	30	1.7 - 49.0	3.1	10.0	Yes
115	Approved	31	1.7 - 130.0	4.6	25.0	Yes
104	Prohibited	31	1.7 - 79.0	8.1	38.0	Yes
105	Prohibited	31	1.7 - 240.0	9.0	53.0	No
113	Prohibited	32	1.7 - 130.0	6.1	32.0	Yes
114	Prohibited	31	1.7 - 79.0	4.5	20.0	Yes

All tides information is presented

The standard for approved shellfish growing waters is fecal coliform geometric mean not greater than 14 organisms/100 ml and an estimate of the 90th percentile not greater than 43 organisms/100 ml. The above table shows bacteriological results in relation to program standards.

## TABLE 2

### SUMMARY OF MARINE WATER DATA (SRS)

Growing Area: **DUNGENESS BAY**

Classification: **Conditionally Approved**

From **05/03/2005** To **10/22/2008**

**FECAL COLIFORM ORGANISMS/100 ML**

<b>Station Number</b>	<b>Classification</b>	<b>Number of Samples</b>	<b>Range</b>	<b>Geometric Mean</b>	<b>Est. 90th Percentile</b>	<b>Meets Std.</b>
106	Conditionally Approved	31	1.7 - 350.0	4.0	24.0	Yes
107	Conditionally Approved	31	1.7 - 17.0	2.7	6.0	Yes
108	Conditionally Approved	31	1.7 - 49.0	3.7	13.0	Yes
109	Conditionally Approved	31	1.7 - 49.0	3.0	10.0	Yes
110	Conditionally Approved	32	1.7 - 130.0	2.9	11.0	Yes
111	Conditionally Approved	31	1.7 - 140.0	3.1	14.0	Yes
112	Conditionally Approved	30	1.7 - 79.0	3.1	13.0	Yes

All tides information is presented

The standard for approved shellfish growing waters is fecal coliform geometric mean not greater than 14 organisms/100 ml and an estimate of the 90th percentile not greater than 43 organisms/100 ml. The above table shows bacteriological results in relation to program standards.

# DUNGENESS BAY

## STATION LOCATIONS AND CLASSIFICATION BOUNDARIES
