Customer Relationships and Satisfaction

PH Standard 9.1.6 B:
“Implement a systematic process for assesssing and improving customers’ satisfaction with agency services”

Presented by:

May 11, 2011 (updated 10-10-11)

www.doh.wa.gov/phip/perfmgtcenters/index.htm
After attending this session, you will be able to:

• Discern the difference between your organization’s direct and indirect customers
• Describe the value of measuring and improving customer satisfaction
• Describe differences between qualitative and quantitative customer information
• Identify options for collecting qualitative information
• Apply a Likert scale
• Identify factors for analysis
Poll

What is your agency doing now regarding customer relationships and satisfaction?

A. Nothing formal
B. Increasing emphasis on customer service
C. Experimenting with surveys/needs assessments in 1 or 2 programs
D. Department-wide formal efforts at measuring and enhancing customer satisfaction
Customer Relationship Mantra

- Who are the customers?
- What do they need?
- Are we providing it?
- How do we know?
Are we sure we care?

Does customer satisfaction really matter to your agency?

• If so, why?
• If not, why not?

Please un-mute your phones
Why should we care?

- HD’s tend to compare favorably to the “DMV”
- That is not a standard which will breed
  - positive word of mouth
  - support for tax allocations
  - toleration of fees
  - extension of grants
  - full active participation in programs

Please re-mute your phones
Who is the customer?

- Not always easy to define in service industry
- Especially hard in government services
Who is the customer?

Different customers, different interests

- Feds/State/BOH
- Legal/Regulatory Requirements
- Reimbursement Requirements
- Health needs/Tax burden
- Department Policies
- Service Experience/Technical Quality
- General Public
- Clients/patients/direct customers
- Senior Mgmt
- Payers
Who is the customer?

Where is your focus?

Internal Focus
- LHJ Mgmt
- B.o.H.
- LHJ Staff
- Feds/State

External focus
- Payers
- Clients/Patients
- Providers
- General

Public Health Performance Management
Centers for Excellence
Who are the DIRECT customers?

May be easier to define on a program-specific basis

• Who receives the “output” of the process?
• Who “experiences” the process?
• Who is “paying” us?
Who are the DIRECT customers of...

- Your food program?
- Your immunization program?
- Your visiting nurse/social worker program(s)?

Please un-mute your phones
Who are the customers?

Service/Process

Medicaid Referral

Medicaid Eligible People

Customer

Possible Segmentation

Adults

Parents with children

Pregnant Moms 2B

Please re-mute your phones
What do customers need*?

*Require, want, prefer ...

- Have you talked with them?
- Be wary of assumptions!
Customer Needs Assessment

- Customer Needs are *qualitative data*
- You need to obtain customer needs data with *open-ended* questions
- Ideally, you will have an opportunity to *probe and follow-up* on customer responses
How to gather customer needs data ... 

• Interviews  
  – In person  
  – Phone  
  – Email/Chat/Web meeting  
• Focus Groups  
• Qualitative Surveys (as opposed to quantitative surveys)  
• Observation  
• “Artifacts” ... complaints, comments on surveys, etc.
• Ask what about their service experience
  – Steps
  – Interactions
  – What we require them to do
• Ask about the results they are looking for
• Ask about the characteristics of the products/outputs they receive from us
• Look for service features that:
  – “Delight” if present
  – “Dissatisfy” if present / not present
• Think of a recent service experience ...
  – What about that was positive enough that you remembered it/were delighted by it?
  – What about it was disappointing or dissatisfying?

Please un-mute your phones
A = more is always better
B = dissatisfied if not present; don’t notice if it is
C = don’t notice if it’s not there; delighted if it is
Dig!

• “Why is that important?”
• “What do you mean by that?”
• “Could you give me an example?”

The most significant needs often lie beneath the surface
Prompting Question:
When dropping your car off for service, what’s important to you?

Probes:
Why is that important?
What does ____ mean to you?
Are there circumstances where that would be different?
How do we know we are meeting customer needs?

Quantitative Evaluation
It’s common to rush into surveys without...

– Knowing what your customer cares about
– Thinking about how/whether you will use the information
– Knowing how data will be input/analyzed
Quantitative Surveys

• Specific, closed-ended questions
• Responses can be counted
• Can show trends, patterns that tell you how you are doing
• Should be aligned to known customer needs
Customer Satisfaction Surveys

Multiple possible purposes

• Knowing range of satisfaction
  – Understanding whether or not/to what extent you are satisfying customers

• Finding specific areas to improve
  – Identifying which aspects of service may need improvement
  – Getting specific ideas from customers about what could be better

• Quality Assurance/Service Recovery
  – A devise for staff/mgmt to use to follow-up on specific transactions
Polling question:

For those of you surveying or thinking about surveying your customers, what are your primary purpose(s)?

A. Identifying range of satisfaction  
B. Finding specific areas to improve  
C. Quality Assurance/Service Recovery  
D. A combination of the above
Capturing Quantitative Responses

- Likert* Scales
  - 1-5
  - 1-4
  - Etc.

- Binary
  - Yes/no; true false

Rensis Likert – University of Michigan, 1950’s
Capturing Quantitative Responses

The limits of binary responses

- Yes/No, True/False surveys are quick to fill out and easy to analyze, BUT >>>
- They tell you far less about how customer feels
- Do not show the distribution of responses
- Don’t tell you if you’re getting a “C” or an “A” grade from the customer
Example 1: Question with Likert approach

To what extent do you agree with the following statement:

“The Health Department responded to my request in a timely manner”

• Strongly agree
• Somewhat agree
• Neither agree nor disagree
• Somewhat disagree
• Strongly disagree
Example 2: Question with Likert approach

“How satisfied were you with the response time of the Health Department?”

- Extremely satisfied
- Somewhat satisfied
- Somewhat dissatisfied
- Extremely dissatisfied
Example 3: Question with Likert approach

“Please rate the service you received from the Health Department today:”

- Excellent
- Good
- Average
- Fair
- Poor
Likert Scales - How many?

- Odd number allows for a neutral response
- Even number forces the customer to commit one way or another
- A 4 point Likert scale is commonly used for satisfaction & marketing surveys;
  - avoids a neutral response
  - still shows distribution
- Researchers/epidemiologists prefer odd scales (esp. 5 point) because they can learn something from the neutral respondents
Exercise

• Think of a specific program/service
• Think of a specific customer need regarding that program/service
• Write a survey question which might tell you to what degree you were meeting that need

Use your chat box when you are ready
What do you want to analyze by?

• Look ahead to how you will want to break-down the information
  – Customer type
  – Demographics
  – Service/program type
  – Time of day/day of week
  – Location
  – ETC

• Include this information in the data collection
Response rates to satisfaction surveys are often low ... 15-20% is a pretty good rate

Increase response rate by:

- Limiting the number of questions you ask
  - Your response rate will drop with every additional question, and pretty much disappear after 15 questions
- Make it as easy and quick as possible to complete
- Make it as easy as possible to submit the response
Satisfaction Surveys: Selection Bias

- Beware omitting key groups/segments
- Try for a random sampling
Survey Distribution Choices

- **Paper, in person** (response rate will be relatively high)
- **Paper, by mail** (response rate will be very low)
- **Email/web** (Survey Monkey, etc.) (response rate will be low)
- **Phone** (expensive, response rate will be low)
• Consider adding at least one open ended “comments” section to your survey
• Will provide clues as to what you might add/change/stop IF your quantitative indicator shows an area for improvement
Customer Survey: Vital Records Program

What did you come in for today?
- Box for Birth Record
- Box for Death Record

You are:
- Box for General Public
- Box for Funeral Home Director/Staff

- Strongly Agree
- Agree
- Disagree
- Strongly Disagree

The hours of operation met my needs.
I was served promptly.
Staff listened to my concerns and treated me in a respectful way.
Staff gave me helpful information or resources.

Overall, how satisfied were you with our service today?

Very Satisfied
Somewhat Satisfied
Somewhat Dissatisfied
Very Dissatisfied

How can we improve for you?
**Environmental Health Customer Service Survey (Kitsap County)**

Dear Customer,

Please take a minute to complete the following brief customer service questionnaire for the service you received today. Our goal is to provide our customers with the best service possible. Your comments will enable us to see how we're doing and help us improve. Your comments are confidential and will only be reviewed by the Program Manager. Thank You!

What was the purpose of your visit to the Health District today?

<table>
