Office of Emergency Preparedness and Response

What we do

We protect the people in Washington from the health threats of disasters. We do this by:

- detecting and investigating disease outbreaks and containing their spread,
- providing medicine and lifesaving care to those in need,
- maintaining a safe and healthy environment,
- informing and educating the public on taking safe actions, and by
- supporting our partners as members of one response team.

Who we work with

Who we work with
