

# COVID-19 Long-term Care Report

Washington State Department of Health

10/20/2020

*COVID-19 surveillance data are updated when new information about a case is reported, such as exposure and case information. Given the dynamic nature of COVID-19 surveillance data, data reported in the past may not match data reported in present time. Facilities with multiple acuity levels are assigned to the highest acuity level. Additionally, there may be a large reporting delay. The number of cases and deaths associated with long-term care (LTC) may not be complete for the last several weeks.*

*To request this document in another format, call 1-800-525-0127. Deaf or hard of hearing customers, please call 711 (Washington Relay) or email [civil.rights@doh.wa.gov](mailto:civil.rights@doh.wa.gov). Publication Number DOH 420-285.*

*The data in this report is reflective of all cases reported as of 10/19/2020.*

## Summary

**Total LTC Associated Cases: 7,995 (of which 66 are pending LHJ verification)**

**Total LTC Associated Deaths: 1,242**

As of 10/19/2020, a total of 7,995 COVID-19 cases (8% of total cases) and 1,242 deaths (55% of total deaths) have been identified as associated with a long-term care facility (i.e., nursing home, assisted living facility or adult family home). These cases include residents as well as employees and visitors. Not all of these cases were exposed at a LTC facility. Many cases visited multiple places during their exposure period, and some individuals may have visited a LTC facility after disease onset.

# LTC Associated Cases by Illness Onset Date

This epidemiologic curve shows the number of LTC associated cases over time by onset date. If onset date is not known, diagnosis date or report date are used. Since there may be reporting delays, data are incomplete for the most recent dates.

\*If onset date is not known, diagnosis date or report date are used

# Deaths with LTC Association by Illness Onset Date

This epidemiologic curve shows the number of deaths reported as having an association to long-term care by onset date. If onset date is not known, diagnosis date or report date are used. Since there may be reporting delays, data are incomplete for the most recent dates.

\*If onset date is not known, diagnosis date or report date are used

## Confirmed LTC Associated Cases and Deaths by County

This table displays the number of COVID-19 cases and deaths that have a reported associated with LTC in Washington State by county. Data are preliminary and subject to change. Cases are attributed to their county of residence, not the county in which the facility they are associated with is located. Cases not yet verified by Local Health Jurisdictions have been aggregated into a pending confirmation category.
