Attestation Form
St. Francis Hospital
Nurse Staffing Committee
January 1, 2020

I, the undersigned with responsibility for St. Francis Hospital, attest that the attached staffing plan and matrix was developed in accordance with RCW 70.41.420 for the calendar year 2020 and includes all units covered under our hospital license under RCW 70.41. This plan was developed with consideration given to the following elements (please check):

☐ Census, including total numbers of patients on the unit on each shift and activity such as patient discharges, admissions, and transfers;
☐ Level of intensity of all patients and nature of the care to be delivered on each shift;
☐ Skill mix;
☐ Level of experience and specialty certification or training of nursing personnel providing care;
☐ The need for specialized or intensive equipment;
☐ The architecture and geography of the patient care unit, including but not limited to placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment;
☐ Staffing guidelines adopted or published by national nursing professional associations, specialty nursing organizations, and other health professional organizations;
☐ Availability of other personnel supporting nursing services on the unit; and
☐ Strategies to enable registered nurses to take meal and rest breaks as required by law or the terms of an applicable collective bargaining agreement, if any, between the hospital and a representative of the nursing staff.

2020 Staffing Plan Overview

Department: 1st Surgical
Date Updated: January 11, 2020
Author: Kristin Jarangue and Jovelia Mackey

Nursing Department Overview:
- Average Daily census is 26
- Average number of admits/discharges/transfers are 15
- Average length of stay equals 3.0 days

Key Quality Indicators:
Delineation of what constitutes "safe" nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:
- *Patient falls prevalence.
- *Patient falls with injury.
- *Pressure ulcer rate/prevalence
- *Nursing care hours per patient day.
- *Skill Mix
- Medication error
- Staff turnover
- Patient turnover
- Overtime costs
- Agency/ Traveler Usage
- Patient Satisfaction Data

Staffing Grid for Patient Census      Target Nursing Hours per Patient Day 10.69

Above Staffing Plan Contingent Upon the Following Supports/Considerations:

- We are staffed 20% above core to account for LOA, Sick calls, Family emergencies and PTO.
- If the unit does not have enough staff to support safe patient care, we will use qualified staff from other disciplines such as IV therapy.
- 1st Surgical RN start their own peripheral IV lines and charge central line dressings. IV therapy assists floor nurses in placing difficult peripheral IVs and place/monitor PICC lines and accessed Ports.
- ER Transition nurses assist in admitting patients prior to their arrival on an inpatient unit.
- Critical Care supports Rapid Response/ Code Blue throughout hospital.
- Health Unit Coordinator, Transporters provide auxiliary support to ensure safe patient care.
- Occupation, Physical and Speech Therapy provide assistance as needed and ordered.

Which Situations Require Staffing Variation?

- Heavy surgery schedule/high number of incoming post-op patients
- High acuity of patients where safety would be of great concern without extra support such as confused patients or patients on restraints requiring frequent checks
- Patient’s requiring a 1:1 sitter
- High number of isolation patients
- High number of admissions/ discharges during the shift > than 8
- Full capacity
- High number of 1:1’s needing break coverage
- High number of heavy care patients (skin protocol turn every 2 hours, total feeders, incontinent, multiple bed changes, comatose patient care and staff can’t keep up)
- High number of patients on complex treatments (tube feedings, dressing changes, multiple drains, multiple central lines, chest tubes, pain management, multiple blood draws, trach care, frequent suctioning, Glucommander every 15 minutes for insulin drip)
- Orientation/Residency programs require 1 RN preceptor and can involve from 2 to 12
weeks to complete.

Meals and Breaks

- 1st Surgical has implemented the use of care teams, made up of 2 RNs and a CNA. A care team will cover each other's patients during meal breaks.
- Charge nurse to check in with RN to see if they are getting their breaks and if not how they can help ensure a break.

Chain of Command/ Staffing Decision Tree

Process for Staffing Variation

- Staffing and patient census is looked at on a continual basis throughout the day. The hospital supervisor, managers, charge nurses and staffing office meet (or call) at designated times throughout the day for updates on staffing needs. If the unit is short staffed, the staffing office (or hospital supervisor on the weekends) will put out calls/texts/emails asking for available people to work.
- It is the responsibility of the charge nurse to notify the staffing office or hospital supervisor of immediate needs.

Annual Nurse Staff Survey

- Staff are encouraged to fill out a staffing concern form for any staffing or safety issues identified.
- Any identified concerns are addressed at staff meetings, via email and/or at staff huddles in order to make improvements.
- Performance Culture Assessment, completed annually by nursing staff.
- Equipment needs are addressed and ordered for the unit. Encourage staff to submit work orders and notify management in a timely manner of equipment needs.

### Above Staffing Plan Contingent Upon the Following Supports / Considerations

- Supports that our unit receives from other units/departments or provides to other units and departments that impact staffing.
  - IV Therapy department to place and monitor PICC lines; 3rd Medical RN staff start their own peripheral IV lines
  - Respiratory therapy supports more complex pulmonary issues not covered by an RN
  - Physical, Occupational and Speech Therapy staff support our patient population
  - The Critical Care Unit supports Rapid Response/Code Blue throughout hospital

### Which Situations Require Staffing Variation?

Use this section to describe legitimate situations where additional staff are required to provide safe patient care

- High Acuity patients
- 1:1 patients
- Increased number of isolation patients
- Some mental health patients who may require additional hours of care
- Orientation of new nurses
- Full Capacity
- High number of heavy care patients
- High number of patients with complex treatments

### Meals and Breaks

- 3rd Medical Unit uses a care team model of 2 RN staff and 1 C.N.A. for every 10 patients. Care team members cover for each other for meals and breaks.
- Charge RN to check in with nursing staff to ensure they are getting their breaks.

Survey information from local, Regional, & National levels are shared with the Nursing Teams at varying venues and audiences for planning unit staffing (i.e. Quality, employee/patient satisfaction; HCAHPS; Culture of Safety surveys, etc.)

</tr>
</tbody>
</table>

Above Staffing Plan Contingent Upon the Following Supports/Considerations:

- IV Therapy department to place monitor PICC lines; 3 West staff start their own peripheral IV lines before calling the SWAT RN.
- Respiratory therapy supports more complex pulmonary issues not covered by an RN
- Physical, Occupational and Speech Therapy staff support our patient population
- Critical Care Unit supports Rapid Response/Code Blue throughout hospital
- Fresenius performs dialysis for patients under the care of our St. Francis Hospital Staff
- Pharmacy staff assigned to unit 5 days/week.
- Virtual Companion will help support the unit with a virtual 1:1 sitter when appropriate.

Which Situations Require Staffing Variation?

- Increased number of surgical patients
- Increased number of isolation patients
- Increased number of dialysis patients

Chain of Command/Staffing Decision Tree

Process for Staffing Variation

- Staffing and patient census is looked at on a continual basis throughout the day. The hospital supervisor, managers, charge nurses and staffing office meet at designated times throughout the day for updates on staffing needs. If the unit is understaffed, the staffing office (or hospital supervisor on weekends or after hours) will put out calls/texts/emails asking for available people to work.
- It is the responsibility of the charge nurse to notify the staffing office or hospital supervisor of immediate staffing needs.
- For any expected or unexpected leaves, opportunities will be posted in CVS for our staff to work extra shifts. The use of agency nurses may be considered as an alternative.

- High Acuity patients
- 1:1 patients
- Increased number of isolation patients
- Some mental health patients who may require additional hours of care
Project Overview Statement—Executive Summary

- Orientation of new nurses
- Full Capacity
- High number of patients with complex treatments
- Increased number of dialysis patients

Meals and Breaks

- The care team members cover for each other for meals and breaks.
- Charge Nurse is to check in with nursing staff to ensure they are getting their breaks.
- If the RN is not able to take a break then they will get financial reimbursement for that extra time they worked.

Annual Nurse Staff Survey

- Survey results reviewed with staff by email and staff meetings. Any identified concerns are addressed at staff meetings, via email and/or at staff huddles in order to make improvements.

- Survey information from, local, Regional, & National levels are shared with the Nursing Teams at varying venues and audiences for planning unit staffing (i.e. Quality; employee/patient satisfaction; HCAHPS; Culture of Safety surveys, etc.).

# 2020 Staffing Plan Overview

**Department:** SFH Cath/IR/Vascular Lab  
**Date Updated:** January 1, 2020  
**Author:** Cynthia Tran, RN; James Johnson, RN

## Nursing Department Overview

Description of the types of patients served in this nursing unit: inpatients/outpatients requiring cardiac services (left heart catheterization; PCI; right heart catheterization; temporary or permanent pacemaker/AICD; LINQ implant/explant; TEE; cardioversion; pericardiocentesis), vascular services (ortogram; lower extremity angiogram with or without intervention; thrombolytic therapy/infusion catheter, fistula repair), or interventional radiology services (central line placement, tube/drain placement such as gastrostomy, nephrostomy, suprapubic catheter; IVC filter, embolization, vertebroplasty; imaging guided biopsies such as lung, liver, bone)

- Average Daily census – 8 to 10 procedures per work day (inpatient/outpatient) encompassing cardiac/IR/vascular cases
- Average number of admits/discharges/transfers – 10
- Average length of stay – 6 hours (admission/procedure/recovery)

## Key Quality Indicators

Use this section for a delineation of what constitutes "safe" nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*: 

- *Patient falls prevalence
- *Patient falls with injury
- *Pressure ulcer rate/prevalence
- *Nursing care hours per patient day
- *Skill Mix: RN/Cardiovascular technologist/Radiology technologist
- Medication errors
- Staff turnover/orientation costs
- Overtime costs/end of shift overtime/missed breaks incidental overtime
- Agency/Traveler Usage
- Data from professional organizations

</tbody>
</table>

### Above Staffing Plan Contingent Upon the Following Supports/Considerations

Use this area to list other supports that your unit either receives from other units/departments or provides to other units and departments that impact staffing.

- Support diagnostic imaging (CT/ Ultrasound/ X ray/Nuclear Med/ECHO) requiring nurse &/or technologist for specific tasks to include conscious sedation/ procedural sedation; ultrasound guided IV start; bubble study; albumin infusion
- Transport of inpatients (ICU/PCU level) pre/post procedure
- Pre-admission phone calls to all scheduled outpatients
- Stage inpatients awaiting procedure/house inpatients awaiting bed
- Interfacility transfer of IABP (intra-aortic balloon pump) patient by cath lab RN (1:1 care)
- Support bedside IR cases throughout hospital
- "Same Day Discharge" for PCIIs (Percutaneous Coronary Intervention)- lengthened recovery time (freeing up inpatient bed)
- Support from the following departments: cardiopulmonary, SWAT (resource nurse), hospital transporter, EVS (environmental service)
- Planned leaves or vacations must be requested in writing to manager at least 30 days prior to leave. Manager fills vacancy with either nurse or tech, as appropriate, based on staff availability, weekly hours worked (scheduled and call time), overtime, etc. Only 1 vacation request per discipline (nurse or tech) is approved at any given time (scheduled leave of 2 nurses, for example, will not overlap). Unplanned leaves are covered by staff that have a scheduled day off, first by volunteer basis then by mandate of manager. Per diem staff may be assigned in either Admit/ Recovery or Procedure room. Charge
nurse may substitute as procedure nurse. Current Manager may substitute as technologist.

<table>
<thead>
<tr>
<th>Which Situations Require Staffing Variation?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use this section to describe legitimate situations where additional staff are required to provide safe patient care</td>
</tr>
<tr>
<td>• Call team of three staff to provide after-hour/weekend services</td>
</tr>
</tbody>
</table>

### Chain of Command/Staffing Decision Tree

#### Meals and Breaks

- Use this section to describe what the meal and break strategies are for your area and how you measure if they are working.

- 30-minute and 15-minute breaks are scheduled according to policy for 10-hour shift (procedure room staff) as well as 12-shift (recovery room staff)

- Breaks are planned during daily safety huddle—attended each morning by on-site manager, charge nurse, RNs, and technologists

- Breaks are planned in between scheduled cases and may require adjustment for “add on cases”

- Procedure staff will rotate out or “scrub out” for breaks—particularly during lengthy (3+ hour) cases—and “scrub in” after break

- Procedure “room 1” staff may provide breaks for “room 2” staff, vice versa, as cases are completed

- Recovery area staff are relieved for breaks by procedure room staff, charge or manager

- Break “buddy” may be assigned at onset of shift by charge nurse

- Charge nurse provides relief of staff if assigned break “buddy” becomes unavailable

- Staff document “CMD” (CANCEL MEAL DEDUCTION) if relief options exhausted—breaks not taken
Annual Nurse Staff Survey

- Survey results reviewed with staff? What format was used? (staff meetings, shift huddles, e-mail)
- Process Improvement work completed on issues identified?
- What was the results/plan of action?

2020 Staffing Plan Overview

Department: Emergency Services
Date Updated: January 1st, 2020
Author: Chantel Arnone, Clinical Manager, Emergency Services
Maureen Milligan, Unit Base Council Co-Chair, staffing representative
Kristin Wilcox, Unit Base Council Co-Chair, staffing representative

Nursing Department Overview

St Francis Hospital (SFH) Emergency Department serves the Federal Way/South King County area as part of CHI Franciscan Health (CHI-FH). Emergency Services at CHI-FH is a patient-focused community healthcare resource. SFH Emergency Department provides emergency medical care for the community in support of the mission of CHI-FH, is the facility’s entry into the health system by those individuals who do not have a physician or whose physician is unavailable, provides leadership and participation in the Emergency Medical Service System, community disaster planning, and provides education opportunities to health care students and pre-hospital providers.

Emergency care is offered 24 hours a day, with at least one board certified emergency physician and nursing staff experienced in emergency care. The Emergency Department (ED) is capable of stabilizing and caring for all types of patients. Patients requiring specialty care or a higher level of service will be transferred to a facility providing that specialty in accordance with transfer policies and procedures. Emergency Services complies with all state, federal, and regulatory agencies.

SFH Emergency Department consists of 25 treatment areas with full monitoring capabilities. Our Emergency Department serves approximately 55,000 patients per year.

- Average Daily Census 148 patients per day
- Median Length of Stay:
  - Admitted Patients 436 minutes
  - Discharged Patients 154 minutes
- Percent of Admits – 14%
- Percent of Transfers – 2.9%

Key Quality Indicators

The Emergency Department collects and monitors data for the purpose of assessing department function, patient care, and clinical outcomes.

- Left Without Being Seen Rate (LWBS)
- Percentage of Time on ED Divert – We are a no divert ED
- Door to Provider Median time
- Acute Myocardial Indicators

Confidential
Staffing Overview Plan ED 2020
Last printed 12/20/2018 2:12:00 PM
Door to EKG
- PCI within 90 minutes

Stroke Indicators
- Head CT/MRI results with scan interpretation within 30 minutes

Patient Satisfaction (HCHAPS)
- Courtesy/respect of doctors
- Courtesy/respect of patient care staff
- Clear Communication by patient care staff
- Communication about medication
- Staff doing everything they could to help with pain
- Overall rating

**Staffing Grid for Patient Census: Productivity target 2.72**

SFH Emergency Department is supported by:
- Board Certified Emergency Physicians
- Advanced Practice Providers trained in Emergency Care
- RNs specializing in Emergency Care
- Emergency Room Technicians (ERT)
- Unit Secretaries (HUC)
- Registrars
- Social Workers
- Pharmacist
- Pharmacy Medication Reconciliation Technicians
- Care Manager

The Emergency Department will flex their staffing in response to the acuity and volume of patients throughout the day. Each RN will care for 3-5 patients.

Care teams are as follows:
- Triage
  - 1 or 2 RN's depending on time of day and needs
  - 1 ERT, depending on time of day/needs
- ER 1, 2, and 3
  - Each team supports 8-11 acute care ED treatment areas and hall spaces
    - 1 Provider
    - 2-3 RN's
    - 1 ERT
    - 2 HUCs between 1-3
- Admit RN's
  - 1 Admit RN to support the entire ED focusing on admission assessments and inpatient care for patients in the ED 6 days per week

- Transition
  - 1 RN
  - 1 ERT
**Staffing Grid**

**Above Staffing Plan Contingent Upon the Following Supports/Considerations**

- The Emergency Department staff MD and RN respond to Code Blue events throughout the hospital
- Patients of all admit levels are held in the Emergency Department if no inpatient bed is available
  - Every effort will be made to staff inpatient's holding in the ED with inpatient trained RN's
- The ED staffs significant 1:1 hours for mental health patients being treated in the ED
- Support from the following departments/staff
  - Radiology
  - Cardiopulmonary
  - SWAT RN
  - Transporter
  - Diagnostic Imaging
  - CNAs from other departments
  - Lab
  - Chaplain
  - Pharmacy
  - Environmental Services
Several situations require staffing variations. These situations are discussed by the Charge Nurse with management support on an as needed basis. These include patients requiring 1:1 observation, acutely ill patients, and number of acute trauma activations, census, surge capacity and patients being held for admission beds.

### Chain of Command/Staffing Decision Tree

**Process for Staffing Variation**

- Staffing will be sufficient at all times to assure safe and effective patient care.
- Staffing may be adjusted based on the needs of the department.
- If the ED Director, Manager, or Charge RN determines the need to change staffing levels they will consult each other as needed. The House Supervisor and Staffing Office will also be contacted as needed to accommodate changes in staffing needs.
- Flex positions are in place to cover vacations and leave of absences.

**Meal and Rest Breaks**

- Staff will cover each other for 15 minute breaks.
- A float nurse will cover staff members who are assigned to greater than 2 patients for 30 minute breaks.
- Charge nurses keep a log of staff breaks.

2020 Staffing Plan

Department: Family Birth Center
Date Updated: January 1, 2020
Next Review Date: June 1, 2020

Nursing Department Overview

Patients served in this unit include newborns and perinatal patients (antenatal, labor, and postpartum) and clean surgical/medical patients (usually gynecological, bariatric, or spinal surgical patients).

Family Birth Center RNs respond to orders for monitoring/assessments within any area in the hospital that a pregnant patient may be admitted. Special Care Nursery RNs respond to neonatal and pediatric codes within any area of the hospital.

FBC Staff and Providers:
- Obstetricians/Gynecologists
- Certified Nurse Midwives
- Anesthesia
- Neonatal Advanced Practice Practitioners (NNP/PA)
- Pediatricians
- Family practice doctors
- RNs specializing in: Labor and Delivery; Level II Special Care Nursery
- Bariatric Surgeons and Nurse Practitioners
- General Surgeons

FBC Support Staff:
- Health Unit Coordinators (HUC’s)
- Nursing care assistants (NAC’s)
- Surgical Technicians
- Lactation consultants
- Environmental services staff
- Laboratory technicians
- Respiratory therapists
- Dietary staff

FBC Census and Productivity Target:
- Average daily census: 15.5
- Average OB census (inpatients/outpatients): 6.3
- Average nursery daily census: 0.9
- Average surgical daily census: 4.2
- Average number of admits/discharges/transfers: 12.2
- Average length of stay: 1.93 days
- Productivity target (target worked hours per unit): 17.46
### Meals and Rest Breaks
- The charge nurse is responsible for facilitating staff breaks, and can cover for staff on breaks
- RNs can cover for each other during rest and meal breaks

### Situations that Require Additional Staff to Provide Safe Patient Care
- High acuity patients, including, but not limited to:
  - Post-op patients for the first 24 hours after surgery
  - Isolation patients
  - Patients requiring translation services
  - Patients with severe pre-eclampsia
  - Late preterm newborns
  - Newborns undergoing in-room phototherapy
  - Magnesium therapy
  - Insulin Drips
- Lack of support staff on unit
- The following nurse characteristics should also be considered:
  - Level of experience
  - Professional certification
  - Organizational experience

### Staffing Decision Tree
- The charge nurse reviews staffing needs and patient census frequently
- When acuity or census requires additional staff members:
  - The charge nurse will call in any RNs on standby
  - The charge nurse will put out calls/texts asking for available staff to work
  - The charge nurse may take an assignment
  - The charge nurse will notify the manager on call or house supervisor of immediate needs
  - Any elective or non-medically necessary cesarean sections, inductions, and procedures will be delayed until adequate staffing is available
Staffing Grid

The FBC is staffed in accordance with AWHONN guidelines. The FBC adjusts their staffing in response to the acuity and volume of patients. Ideally, there will always be 1 RN on standby available to come to work if the need arises.

Staffing Plan Considerations

- If there are 3 or more 1:1 labor patients, consider staffing a triage nurse
- Nurses caring for stable patients on magnesium therapy maintenance doses after delivery will be assigned one additional couplet or one additional woman to care for
- Nurses caring for babies undergoing in-room phototherapy will be assigned one other couplet or woman to care for
- At least two RNs with Special Care Nursery training and experience will be staffed on the unit, unless in minimal staffing.
- A minimum of 2 staff members must be assigned to the postpartum unit when the unit is open. When there are 6 patients or fewer, the second staff member may be an RN, NAC, ORT, or HUC (FBC or Surgical)

2020 Staffing Plan Overview

Department: Intensive Care Unit
Date Updated: January 1, 2020
Author: Kirsten Henderson, Nancy Nichols & Julie Reynolds

Nursing Department Overview

Description of the types of patients served in this nursing unit,
- Average Daily Census: **11.6 patients**
- Average length of stay: **3.0 (varies each week)**
- Shift times are from 6:00 – 18:30 and 18:00 – 6:30

RN’s in the ICU are responsible for directing and coordinating members of the care team, focusing on the provision of individualized quality patient care consistent with organizational standards. Develop patients’ plan of care in partnership with physicians, interdisciplinary teams, and patient/family members. This position is responsible for providing care to the patient who is hemodynamically compromised and requires monitoring of multiple systems and/or nursing interventions every two to four hours.

Key Quality Indicators

Use this section for a delineation of what constitutes “safe” nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:

- Patient falls with injury*
- Patient falls prevalence*
- Pressure ulcer rate and prevalence*
- Nursing care hours per patient day*
- Nursing Skill Set*
- Medication Errors/Incident Reporting- IRIS
- Staff turnover
- Overtime/orientation costs
- Agency and/or Traveler Usage
- Patient Satisfaction
- Performance Culture Assessment- Annually
- Ventilator Bundle

2:1 nurse ratio with 14 total beds in ICU.

**Above Staffing Plan Contingent Upon the Following Supports/Considerations**

- Critical care charge nurses and pharmacists respond to any Code Blue and/or Rapid Response throughout the hospital.
- SWAT nurses place PICC and/or central line IVs, peripheral lines started upon request. ICU RNs attempt to start IVs prior to calling the SWAT nurse for help.
- CNA is requested for the floor to help with 1:1 patients as sitter and/or heavy patient loads.
- ICU RNs float to PCU and PCU RNs float to ICU to help with staffing issues present within each shift.
- A critical care pharmacist is available on the floor to help with medication needs and/or questions. Pharmacists monitor and manage IV antibiotics, PPN/TPN, anticoagulation drips, and provide STAT medications when needed.
- Respiratory therapists (RT) work closely with RNs in managing ventilators, drawing arterial blood gases, and completing scheduled breathing treatments. RTs manage airway and ventilation of respiratory dependent patients transferring to and from the unit.
- Care management provides support with discharges, patient placement, discharge appointments and medications, patient transportation, etc.
- Environmental Services provides patient room cleaning and other services
- Lab services available as ordered/needed

**Which Situations Require Staffing Variation?**

- 1:1 RN monitoring is required for alcohol withdrawal patients on Regimen E, post cardiac hypothermia patients, rotoprone or proned patients, direct OR to ICU admits, sepsis, hemodynamic instability example: >3 titrating vasopressors and transfusions
- Orientation and/or preceptorship scheduling (varies with each nurse)
- Inadequate staffing with patient census
- Post procedural sedation at bedside requires 1:1 RN monitoring for 1-2 hours, varies per patient.
- Increased number of isolation patients, 1:1 feeds, frequent turning and oral care, post-procedure vital signs, etc.
### Chain of Command/ Staffing Decision Tree

#### Process for Staffing Variation

- Staffing may be adjusted according to acuity of the patient, type and/or skill set of the caregivers, and availability of staff.
- The charge nurse will round on the unit every four hours to assess acuity of the floor and facilitate problem solving with patient care. In addition, the charge RN will communicate the needs of their unit to the House Supervisor and/or Manager at the morning and evening meetings.
- Patient assignments are made to provide appropriate and quality care for each patient.
- Staffing changes are based on staffing concerns, patient acuity, and procedures.
- Extra shifts are available for staff through the care value system and are approved by the staffing office.
- Unexpected leaves and absences are managed by staffing department to 20% above core needs for the department’s average daily census.

#### Meals and Breaks

- Staff are provided breaks and two 30-minute breaks and 3 15 minute breaks throughout each 12-hour shift.
- Currently using the “break partner” assignment that is planned and coordinated by charge RN each shift.
- Charge nurse is to check in with the floor RNs to ensure they are getting their breaks and if not, how they can help to ensure breaks.

#### Annual Nurse Staff Survey

- Any identified concerns are addressed at staff meetings, via email and/or at staff huddles to make improvements.
- Performance Culture Assessment (PCA) completed annually by nursing staff.
- Equipment needs are addressed and ordered for the unit as needed. Staff are encouraged to submit work orders and notify management in a timely manner of equipment needs.

Updated Jan 2020
Above Staffing Plan Contingent Upon the Following Supports/ Considerations

Use this area to list other supports that your unit either receives from other units/departments or provides to other units and departments that impact staffing.

- Patient Service Representative 0800-1630 Monday through Friday
- Pharmacist and Pharmacy Tech for medication preparation
- Laboratory Services
- Diagnostic Imaging
- Environmental Services
- Dietary Services
- Central Supply

Which Situations Require Staffing Variation?
Use this section to describe legitimate situations where additional staff are required to provide safe patient care

- New Patient with High Alert Medication requiring frequent monitoring
- Treatment cancellation, patient reschedule or no show
- Sick employee or sick family member
- Pt acuity other than expected.
- Level of experience and specialty is considered when making assignments.

Chain of Command/Staffing Decision Tree

Process for Staffing Variation

- The charge nurse reviews the schedule the day before to determine appropriate staffing levels.
- Charge nurse evaluates the volume and staffing throughout the day and will flex up or down staffing depending on patient volume and acuity
- Employee that will not be able to come to work notifies the manager at least two hours prior to start of shift.
- The manager/charge nurse are notified when staffing shortages exist and every attempt is made to ensure staffing does not affect the care of the patients. Efforts may include calling other staff to come in, check for agency staff to come in.
- Schedule may be adjusted if the department is not able to accommodate the volume due to a low staffing level.
- Planned leave is requested by staff and approved by manager according to the needs of the clinic. Every attempt is made to cover and approve the requested time off if the schedule is not already posted. If the schedule is already posted, staff are required to find their own coverage for time off.
- When unplanned time off occurs, every attempt is made to ensure staffing does not affect the care of the patients. Efforts may include calling other staff to come in, check for agency staff to come in. Patient schedule may need to be adjusted. Manager may also cover for staff if properly licensed.
Meals and Breaks

Use this section to describe what the meal and break strategies are for your area and how you measure if they are working.

- Staffs are provided breaks and lunches as required and are encouraged to do so after safely handing off their patients to another RN.
- Charge nurse assigns meal time for nurses. Charge nurse covers for break
- No appts made between 12 pm and 1 pm to allow charge RN to cover staff for lunch.
- If staffing does not allow for breaks and/or lunches, the manager will provide back-up or the employee will be paid frotlier missed break.

Unit Layout considerations

Use this section to describe what the effects of the layout of the unit are on patient care.

- The clinic is in separate building from hospital laboratory and pharmacy requiring trips back and forth to pick up medications, blood and drop off labs.
- Environmental services must be called to come to building if needed, otherwise cleaned at end of workday.
- Meals must be delivered from hospital building

Annual Nurse Staff Survey

- Survey results reviewed with staff? What format was used? (staff meetings, shift huddles, e-mail) Staff meetings
- Process Improvement work completed on issues identified?
  1. Safe and secure environment
  2. Competence of dept.
- What was the results/plan of action? Safe environment: Cameras in parking lots installed. Panic button installed, camera on Pyxis machine installed. Competency 50% staff are certified in their specialty. Fire training, earthquake and evacuation drills completed by staff.

# 2020 Staffing Plan Overview

**Department:** SFH Radiation Oncology  
**Date Updated:** 1/1/2020  
**Author:** Lori McArdle, Manager, Beth Go Staff RN

## Nursing Department Overview

Description of the types of patients served in this nursing unit:
- Clinic hours 0800-1630  
- Average Daily census = 15-30 patients/day  
- Average length of stay = 30 minutes to 2 hours with procedure  
- Services include consultation for new referral, first view visit (FV), daily ERT treatment, on-treatment visit (OTV), CT scans, Simulations, nurse assessment and education, follow-ups and discharge, Dr Visit with procedure, scopes and exams

## Key Quality Indicators

Use this section for a delineation of what constitutes "safe" nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk:

- *Patient falls prevalence  
- *Patient falls with injury  
- *Nursing care hours per patient day  
- *Skill Mix  
- Medication errors  
- Staff turnover/rentention costs  
- Overage costs / end of shift overtime / missed breaks incidental overtime  
- Agency/ Traveler Usages  
- Survey information from, local, Regional, & National levels are shared with the Nursing Teams at varying venues and audiences for planning unit staffing (i.e., Quality, employee/patient satisfaction, HCAHPS, Culture of Safety surveys, etc.).

## Staffing Grid for Patient Census

<table>

*Updated Jan, 2020*
Above Staffing Plan Contingent Upon the Following Supports/Considerations

Use this area to list other supports that your unit either receives from other units/departments or provides to other units and departments that impact staffing.

- Patient Service Representative 0800-1630 Monday through Friday
- Laboratory Services
- Environmental Services
- Infusion services
- Central Supply
- Pharmacy

Which Situations Require Staffing Variation?
Use this section to describe legitimate situations where additional staff are required to provide safe patient care

- Emergent Consult/treatment
- Multiple CT or FV patients concurrent with other patient treatment times

Chain of Command/ Staffing Decision Tree

Process for Staffing Variation

- The schedule is reviewed to determine appropriate staffing levels and will flex up or down dependent on patient volume and acuity
- Employee that will not be able to come to work notifies the manager/Lead therapist at least two hours prior to start of shift.
- Planned leave is requested by staff and approved by manager. If schedule is not already posted, manager strives to obtain coverage to approve time off. If schedule is already posted, staff find own coverage for time off.
- When unplanned time off occurs, every attempt is made to ensure staffing does not affect patient care. Efforts include calling staff/agency to come in. Patient schedule may need to be adjusted.

Meals and Breaks

Use this section to describe what the meal and break strategies are for your area and how you measure if they are working.

- Staffs are provided breaks and lunches as required and are encouraged to do so after safely handing off of their patients to another appropriate staff.
- If staffing does not allow for breaks and/or lunches, the manager will provide back-up or the employee will have their pay adjusted to cover for the missed time.
- Staff may take an hour break all at once to include their 30 min Lunch, 15 minute AM, and PM break as schedule allows.

Annual Nurse Staff Survey

- Survey Information from, local, Regional, & National levels are shared with the Nursing Teams at varying venues and audiences for planning unit staffing (i.e. Quality; employee/patient satisfaction; HCAHPS; Culture of Safety surveys, etc.).
Process Improvement work completed on issues identified?

1. Completing incident reports when situation calls for it.
2. Patient Education regarding Side Effects of Treatment
3. Improving RN to RN handoff

2020 Staffing Plan Overview

Department: Franciscan Endoscopy Center – Federal Way
Date Updated: January 1, 2020
Author: Heidi Davis – Clinical Manager, Cheri Evanson – Staff RN/Charge

Nursing Department Overview

Franciscan Endoscopy Center – Federal Way (FEC-FW) is an outpatient department of St Francis Hospital that provides outpatient Gastroenterology (GI) procedures for patients in the South King County area.

The facility has two (2) procedure rooms and eight (8) admit/recovery bays. The gastroenterologists perform both diagnostic and therapeutic colonoscopy and esophagogastroduodenoscopy (EGD) at this facility. This facility also performs manometry studies and Fibrosan Procedures in the second procedure room.

- Average number of admits/discharges: Procedures are scheduled for 30 minutes. Each procedure room can accommodate up to 22 patients per day.
- Average length of stay: 2 hours
- Hours of operation: Monday-Friday, 0600-1800

Key Quality Indicators

Use this section for a delineation of what constitutes “safe” nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:

- *Patient falls prevalence
- *Patient falls with injury
- *Pressure ulcer rate/prevalence
- *Nursing care hours per unit of service
- *Skill Mix
- Medication errors
- Staff turnover/orientation costs
- Overtime costs / end of shift overtime / missed breaks
- Productivity
- Patient Satisfaction Data
- Data from professional organizations (SGNA, ASGE)
- Employee satisfaction scores

Staffing Grid: Target Nursing Hours per Procedure = 3.86

Updated 12.20.2016
Staffing is determined on the number of procedure rooms in operation.
- The endoscopy center requires an admit nurse (LPN/RN), procedure nurse (RN), procedure assistant (LPN/Endo Tech), and recovery nurse (RN).
- One additional Endo Tech is scheduled to perform cleaning and high-level disinfection of endoscopes.
- A float nurse is scheduled for break coverage.

Certifications:
- All staff maintain BLS certification.
- All physicians and RNs maintain BLS and ACLS certification.

There is one manager that oversees the outpatient endoscopy centers and a department support assistant who is responsible for charge entry and inventory management.

---

**Above Staffing Plan Contingent Upon the Following Supports/Considerations**

Support received from other units/departments or provides to other units and departments that impact staffing.
- Staff for this endoscopy center can also provide staffing coverage to Franciscan Endoscopy Center – Tacoma and Franciscan Endoscopy Center – Gig Harbor.
- This department cannot be staffed by other resources from the hospital due to skill and ability requirements.

**Which Situations Require Staffing Variation?**

Use this section to describe legitimate situations where additional staff are required to provide safe patient care.
- none

---

**Chain of Command/Staffing Decision Tree**

**Process for Staffing Variation**

Manager will:
- Review of procedure schedule daily to determine staffing needs
- Flex shift times up or down depending on procedure schedule
- Provide additional assistance when staffing shortage exists
Meals and Breaks

- Procedure schedules are designed to allow for meal breaks between the AM and PM procedure sessions. (AM session = 0700-1130, PM session = 1230-1700)
- Float nurse is available to provide breaks for staff who are unable to break themselves.
- If a float nurse and/or manager are not available to break staff for their meal or break, they are to record this on the edit log.

Planned and Unplanned Leave

Coverage for planned and unplanned leave will be provided by:
- Utilizing per diem staff and part time staff who wish to work above their FTE

Annual Nurse Staff Survey

- Survey results are shared with staff during staff meetings.
- Staff are asked for their top 3 areas of concern/most urgent needs to focus on in the coming year.
- Leadership and staff will collaboratively develop action plans for how to address the top 3 concerns.
- Action plans to be shared with staff at staff meetings.

2020 Staffing Plan Overview

Department: Franciscan Endoscopy Center - Tacoma
Date Updated: January 1, 2020
Authors: Heidi Davis-Clinical Manager, Cheri Evanson – Staff RN/Charge

Nursing Department Overview

Franciscan Endoscopy Center – Tacoma (FEC-T) is an outpatient department of St Francis Hospital that provides outpatient Gastroenterology (GI) procedures for patients in the South Puget Sound area.

The facility has three (3) procedure rooms and twelve (12) admit/recovery bays. The gastroenterologists perform both diagnostic and therapeutic colonoscopy and esophagogastroduodenoscopy (EGD) at this facility.

- Average number of admits/discharges: Procedures are scheduled for 30 minutes. Each procedure room can accommodate up to 22 patients per day.
- Average length of stay: 2 hours from check-in to discharge
- Hours of operation: Monday-Friday, 0600-1800

Key Quality Indicators

Use this section for a delineation of what constitutes "safe" nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:

Night Shift – N/A

**Above Staffing Plan Contingent Upon the Following Supports/Considerations**

Support received from other units/departments or provides to other units and departments that impact staffing.
- Staff for this endoscopy center can also provide staffing coverage to Franciscan Endoscopy Center - Gig Harbor and Franciscan Endoscopy Center – Federal Way.
- This department cannot be staffed by other resources from the hospital due to skill and ability requirements.

**Which Situations Require Staffing Variation?**
Use this section to describe legitimate situations where additional staff are required to provide safe patient care.
- none

**Chain of Command/Staffing Decision Tree**

**Process for Staffing Variation**
Manager will:
- Review procedure schedule daily to determine staffing needs
- Flex shift times up or down depending on procedure schedule
- Provide additional assistance when staffing shortage exists
# Project Overview Statement—Executive Summary

## Meals and Breaks

- Procedure schedules are designed to allow for meal breaks between the AM and PM procedure sessions. (AM session = 0700-1130, PM session = 1230-1700)
- Float nurse is available to provide breaks for staff who are unable to break themselves.
- If a float nurse and/or manager are not available to break staff for their meal or break, they are to record this on the edit log.

## Planned and Unplanned Leave

Coverage for planned and unplanned leave will be provided by:
- Utilizing per diem staff and part time staff who wish to work above their FTE

## Annual Nurse Staff Survey

- Survey results are shared with staff during staff meetings.
- Staff are asked for their top 3 areas of concern/most urgent needs to focus on in the coming year.
- Leadership and staff will collaboratively develop action plans for how to address the top 3 concerns.
- Action plans to be shared with staff at staff meetings.

2020 Staffing Plan Overview

Department: Franciscan Endoscopy Center – Gig Harbor
Date Updated: January 1, 2020
Author: Heidi Davis – Clinical Manager, Cheri Evanson – Staff RN/Charge

Nursing Department Overview

Franciscan Endoscopy Center – Gig Harbor (FEC-GH) is an outpatient department of St Francis Hospital that provides outpatient Gastroenterology (GI) procedures for patients in the South Puget Sound and Kitsap/Olympic Peninsula area.

The facility has one (1) procedure room and five (5) admit/recovery bays. The gastroenterologists perform both diagnostic and therapeutic colonoscopy and esophagogastroduodenoscopy (EGD) at this facility.

- Average number of admits/discharges: Procedures are scheduled for 30 minutes. The procedure room can accommodate up to 22 patients per day.
- Average length of stay: 2 hours from check-in to discharge
- Hours of operation: Monday-Friday, 0600-1800

Key Quality Indicators

Use this section for a delineation of what constitutes “safe” nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:

- *Patient falls prevalence
- *Patient falls with injury
- *Pressure ulcer rate/prevalence
- *Nursing care hours per unit of service
- *Skill Mix
- Medication errors
- Staff turnover/orientation costs
- Overtime costs / end of shift overtime / missed breaks
- Productivity
- Patient Satisfaction Data
- Data from professional organizations (SGNA, ASGE)
- Employee satisfaction (PCA-annually)

Staffing Grid

Staffing is determined on the number of procedure room in operation.
- The endoscopy center requires an admit nurse (LPN/RN), procedure nurse (RN), procedure assistant (LPN/Endo Tech), and recovery nurse (RN).
- One additional Endo Tech is scheduled to perform cleaning and high-level
disinfection of endoscopes.
- A float nurse is scheduled for break coverage.

Certifications:
- All staff maintain BLS certification.
- All physicians and RNs maintain BLS and ACLS certification.

There is one manager that oversees the outpatient endoscopy centers and a department support assistant who is responsible for charge entry and inventory management.

Above Staffing Plan Contingent Upon the Following Supports/Considerations

Use this area to list other supports that your unit either receives from other units/departments or provides to other units and departments that impact staffing.

- IV Therapy department to place and monitor PICC lines; Observation Unit RN staff start their own peripheral IV lines.
- Respiratory Therapy supports more complex pulmonary issues not covered by a RN
- If the unit does not have enough staff to support safe patient care, we will use qualified staff from other departments
- Critical Care supports Rapid Response/Code Blue throughout hospital

Which Situations Require Staffing Variation?

- Increased number of isolation patients
- High acuity patients
- Orientation of new nurses
- Full capacity or disaster
- Patients who require 1:1 care/status
- Holding patients waiting for admission

Chain of Command/Staffing Decision Tree

Process for Staffing Variation

- Staffing and patient census is looked at on a continual basis throughout the day. The hospital supervisor, managers, charge nurses and staffing office meet (or call) at designated times throughout the day for updates on staffing needs. If the unit is short staffed, the staffing office (or hospital supervisor on the weekends) will put out calls/texts/emails asking for available people to work.
- It is the responsibility of the charge nurse to notify the staffing office or hospital supervisor of immediate needs.
Staffing Plan Overview

**Meals and Breaks**

- Care team members cover each other for meals and breaks.
- Charge RN to check in with nursing staff to ensure they are getting their breaks.
- If unable to cover breaks and meals staff will be paid for this time.

---

**Planned and Unplanned Leaves**

- The Observation Unit uses per diem employees, overtime, extra shifts to cover leaves. If unable to cover planned and unplanned leaves for an extended period of time travelers would be considered.

---

**Annual Nurse Staff Survey**

- Survey information from, local, Regional, & National levels are shared with the Nursing Teams at varying venues and audiences for planning unit staffing (i.e. Quality; employee/patient satisfaction; Press Ganey, Culture of Safety surveys, etc.).

---

2020 Staffing Plan Overview

Department: Progressive Care Unit
Date Updated: January 1, 2020
Author: Kirsten Henderson, Julie Reynolds & Nancy Nichols

Nursing Department Overview

Description of the types of patients served in this nursing unit
- Average Daily Census: 15.1 patients
- Average length of stay: 3.2 (varies each week)
- Shift times are from 6:00 – 18:30 and 18:00 – 6:30

RN’s in the PCU are responsible for directing and coordinating members of the care team, focusing on the provision of individualized quality patient care consistent with organizational standards. Develops patients’ plan of care in partnership with physicians, interdisciplinary teams, and patient/family members. This position is responsible for providing care to the patient who is hemodynamically compromised and requires monitoring of multiple systems and/or nursing interventions every four hours.

Key Quality Indicators

Use this section for a delineation of what constitutes “safe” nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:

3:1 or 4:1 nurse ratio with 16 total beds in PCU depending on staffing availability.

**Above Staffing Plan Contingent Upon the Following Supports/Considerations**

- Critical care charge nurses and pharmacists respond to any Code Blue and/or Rapid Response.
- SWAT nurses place PICC and/or central line IVs, peripheral lines started upon request. PCU RNs attempt to start IVs prior to calling the SWAT nurse for help.
- A third CNA is requested for the floor to help with 1:1 patients as sitter and/or heavy patient loads.
- ICU RNs float to PCU and PCU RNs float to 3rd floor to help with staffing issues present within each shift.
- A critical care pharmacist is available on the floor to help with medication needs and/or questions. Pharmacists monitor and manage IV antibiotics, PPN/TPN, anticoagulation drips, and provide STAT medications when needed.
- Respiratory therapists (RT) work closely with RNs in completing scheduled breathing treatments and respond to codes. RTs also complete EKGs, arterial blood gases, and manage BIPAP/CIPAP orders.
- Care management provides support with discharges, patient placement, discharge appointments and medications, patient transportation, etc.
- Environmental Services provides patient room cleaning and other services
- Lab services available as ordered/needed

**Which Situations Require Staffing Variation?**

- Alcohol withdrawal patients depending on medication with monitoring requirements.
- Orientation and/or preceptorship scheduling (varies with each nurse)
- Post procedural assessments and/or sedation at bedside requires 1:1 RN monitoring for 1-2 hours and variable.
- Increased number of isolation patients, 1:1 feeds, frequent turning and oral care, post-procedure vital signs, etc.
### Process for Staffing Variation

- Staffing may be adjusted according to acuity of the patient, type and/or skill set of the caregivers, and availability of staff.
- The charge nurse will round on the unit every four hours to assess acuity of the floor and facilitate problem solving with patient care. In addition, the charge RN will communicate the needs of their unit to the House Supervisor and/or Manager at the morning and evening meetings.
- Patient assignments are made to provide appropriate and quality care for each patient.
- Staffing changes are based on staffing concerns, patient acuity, and procedures.
- Extra shifts are available for pick-up by staff through care values and are approved by the staffing office and/or manager.
- Unexpected leaves and absences are managed by staffing department to 20% above core needs for the department’s average daily census.

### Meals and Breaks

- Staff are provided breaks and two 30-minute breaks and 3 15 minute breaks throughout each 12-hour shift.
- Currently utilizing a “break partner” assignment that is planned and coordinated by charge RN each shift.
- Charge nurse is to check in with the floor RNs to ensure they are getting their breaks and if not, how they can help to ensure breaks.

### Annual Nurse Staff Survey

- Any identified concerns are addressed at staff meetings, via email and/or at staff huddles to make improvements.
- Performance Culture Assessment (PCA) completed annually by nursing staff.
- Equipment needs are addressed and ordered for the unit as needed. Staff are encouraged to submit work orders and notify management in a timely manner of equipment needs.
2020 Staffing Plan Overview

Department: Surgery
Date Updated: January 1, 2020
Author: Nancy Zoro, Stephanie Tomlin

- Average Daily census: Average patient encountered ranges from 20-30 patients in 8 operating room suites.
- Hours of operation for the department: 0800-2230 with staff available on call after hours and on weekends for urgent/emergent cases.
- Daily staffing support
  - 7 rooms until 1500
  - 5 rooms until 1700
  - 3 rooms until 1900
  - 1 room until 2230
- Surgery cases range from 30 minutes to 6 hours +
- Acuity of patients range from very healthy to critically ill
- Age: 5 months and older.
  - Pediatric cases are scheduled as early morning and cases are screened according to the pediatric matrix. Exclusion criteria are:
    - No one younger than 1 yr of age that requires airway instrumentation
    - No tonsillectomy cases or children with obstructive sleep apnea under age 4 due to risk of post-op breathing complications.
    - No children with known respiratory and cardiac disease
    - Children with genetic disorders
    - No inpatients younger than 16.
    - History of RSV within 8 weeks prior to surgery

Key Quality Indicators

Use this section for a delineation of what constitutes "safe" nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:

- *Patient falls prevalence
- *Patient falls with injury
- *Pressure ulcer rate/prevalence
- *Staff hours per 100 OR minutes
- Skill Mix
- *Medication errors

Updated 06-2018

Insert developed staffing grid for varying levels of patient census or attach to this document

Staffing in this unit is as follows:

- Each OR team consists of at least one surgeon, one anesthesiologist, one registered nurse, and one surgical technologist or one scrub registered nurse.
- Our unique floorplan consists of four operating room suites on the Main OR side and four operating room suites on the Same Day Surgical Unit side. Each side has their own central core, equipment rooms and anesthesia workrooms to ensure necessary equipment is close at hand. Medications are pulled from Pyxis machines located in each Center Core. All equipment is checked by Biomed. Education for all equipment and medical devices is provided to the staff by either the Unit Based Educator, Vendor, or subject matter expert nurses in the department.
- Staffing will be adjusted for more involved cases that require more support.
- In addition to the in room staff, the OR has support staff available:
  - Charge nurses and resource nurses
  - Relief nurses and technologists to retrieve supplies, turnover rooms, and provide breaks to staff
  - Center core technologists to retrieve supplies, turn over rooms, and provide breaks to staff
  - Anesthesia technicians (support anesthesiologist and help with difficult airways)
  - PSTs to assist with room turnover and transport
  - EVS staff to assist with turnovers
  - PACU nurses to assist during emergencies

**Above Staffing Plan Contingent Upon the Following Supports/Considerations**

Use this area to list other supports that your unit either receives from other units/departments or provides to other units and departments that impact staffing.

- The unit depends on Materials Management, Sterile Processing, Radiology, Laboratory, Pathology, Environmental Services, PACU and SADU for support.
- Maintains one room for emergent C-Sections.

**Which Situations Require Staffing Variation?**

Use this section to describe legitimate situations where additional staff are required to provide safe patient care.

- Patient acuity eg: children, critical care
- Patient census in the PACU bed availability
- Surgical Admit Discharge Unit room availability
- Increased/Decreased Surgical Volumes
- Add-On of emergent/urgent cases
Chain of Command/ Staffing Decision Tree

**Process for Staffing Variation**

- Daily review of surgery schedule to determine staffing needs
- Flexing shifts up or down depending on surgery schedule
- Foreseeable FCA/FMLA absences will result in consideration of agency staffing.
- Unforeseeable FCA/FMLA absences will be covered by requesting staff to work on their off days to backfill. We may also utilize holding nurse, charge nurse/manager.
- Request assistance from charge nurse/manager when staffing shortage exists.
- All adjustments to staffing are tracked by the charge nurse daily on our assignment/staffing log.

**Meals and Breaks**

- Use this section to describe what the meal and break strategies are for your area and how you measure if they are working.

Meal breaks are covered RN to RN and individually to each OR suite. The same strategy is used for CST lunches. We ensure breaks and lunches are given by staggering our staffing and assigning break/lunch relief as well as Center Core staff to give breaks/lunches in a timely manner. Staffing issues arise when these staff must be pulled to perform surgical cases when we have sick calls. In the event emergent cases prevent a staff member from receiving a break they are compensated for this time however our practice is to ensure breaks and lunches are met for both nourishment and time away from the pressures of the work.
Annual Nurse Staff Survey

- Survey results reviewed with staff? What format was used? (staff meetings, shift huddles, e-mail) Daily shift huddles daily at 0630 and 1400 and weekly staff meetings on Wednesday mornings at 0630 and afternoons at 1300.
- Process Improvement work completed on issues identified? yes
- What was the results/plan of action? Working currently on turnover rollout with Bill Braswell from OPEX and have decreased our overall turnover time from an average of 47 minutes to 32 minutes. We are continuing to PDCA. We are also currently working on creating 4 separate turnover matrix to speak to the four different types of turnover based on case acuity and number of instrument pans clearly defining each role for the four different turnovers.

Committee Recommendations:

# 2020 Staffing Plan Overview

**Department:** Post Anesthesia Care unit (PACU)  
**Date Updated:** Jan. 1, 2020  
**Author:** Hannah Bennett, Cassie Steig

## Nursing Department Overview

Patients Served in the Unit: Post-surgical phase 1 and phase 2 patients, post-procedure GI, Cath lab, and IR patients. Acuity ranges from healthy patients to patients with significant comorbidities.

- Average Daily census: Average patient encountered ranges from 20-30 patients/day.
- There are two separate PACU locations, with capacity for 6 patients each.
- Average length of stay: 60-120 minutes depending on the patients’ needs.
- Hours of operation for the department: 0730-2230 with staff available on call after hours and on weekends.
- Age: 6 months and older:
  - Pediatric cases are scheduled as early morning and cases are screened according to the pediatric matrix. Exclusion criteria are:
    - No one younger than 1 yr. of age that requires airway instrumentation
    - No tonsillectomy cases or children with obstructive apnea under age 4 due to risk of post-op breathing complications
    - No children with known respiratory and cardiac disease
    - No children with genetic disorders
    - No inpatients younger than 15
    - No history of RSV within 8 weeks prior to surgery.

## Key Quality Indicators

Use this section for a delineation of what constitutes "safe" nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:

*The department follows the American Society of Perianesthesia Nurses’ (ASPN) staffing guidelines. The staffing ratio is 1:2 per RN with the exception of the following situations that require staffing of 1:1 per patient:*
Project Overview Statement—Executive Summary

- Unconscious children under the age of 8
- Any patient with an artificial airway
- Critical Care level patients

**Above Staffing Plan Contingent Upon the Following Supports/Considerations**

Support received from other units/departments or provided to other units and departments that impact staffing:
- Laboratory
- Cardio-pulmonary
- Patient transport
- EVS
- Pharmacy
- Dietary
- Radiology

(The department provides recovery services to GI, Cath lab and IR patients.)

**Which Situations Require Staffing Variation?**

Situations where additional staff are required to provide safe patient care:
- Patient census in the Surgical Admit/Discharge Unit (SADU)
- Inpatient room availability
- After hour cases
- Increased/Decreased surgical or procedural volumes
- Increased/Decreased number of isolation patients
- Add-on of emergent/urgent cases
- Patients requiring translation services
- Patient acuity, e.g. children, critical care
- Adjusting staffing to sick calls, or staff who are absent because they were called in the night before.

**Chain of Command/ Staffing Decision Tree**

**Process for Staffing Variation**

Process used to determine if extra staff is needed:
- Daily review of surgery schedule to determine staffing needs
- Flexing shifts up or down depending on surgery schedule
- Request assistance from charge nurse/manager when staffing shortage exists

*When staffing shortages are anticipated, such as planned FMLA, staff may be asked to pick up additional shifts when appropriate, or agency staff may be utilized.
Meals and Breaks

- Meals and breaks are covered by the scheduled mid-shift FTE.
- Meals and breaks are scheduled on the staffing sheet. If staff are not able to take a break or meal at the scheduled time, they are to report this to the charge nurse, so alternate plans can be made to ensure breaks and meals.
- If staff are not able to take their meal or break on time, they are to record this on the edit log and seek approval from the charge nurse or manager.

Annual Nurse Staff Survey

- Survey information from, local, Regional, & National levels are shared with the Nursing Teams at varying venues and audiences for planning unit staffing (i.e. Quality; employee/patient satisfaction; HCAHPS; Culture of Safety surveys, etc.).

# 2020 Staffing Plan Overview

**Department:** Surgical Admit/ Discharge Unit  
**Date Updated:** Jan. 1, 2020  
**Author:** Hannah Bennett, Cassie Steig

## Nursing Department Overview

Patients served in the unit: admit and discharge of Surgical, GI, Cath Lab, and IR patients. Acuity ranges from healthy patients to patients with significant co-morbidities;

- Average daily census: Average patient encountered ranges from 20-35 admits and 15-30 discharges each day (the department has 14 patient rooms, and experiences rapid turnover)
- Average length of stay: 2 hours pre-op/1-2 hours post op  
  Hours of operation for the department: 0500-2030
- Age: 6 months and older:
  - Pediatric cases are scheduled as early morning and cases are screened according to the pediatric matrix. Exclusion criteria are:
    - No one younger than 1 yr. of age that requires airway instrumentation
    - No tonsillectomy cases or children with obstructive apnea under age 4 due to risk of post-op breathing complications
    - No children with known respiratory and cardiac disease
    - No children with genetic disorders
    - No inpatients younger than 15
    - No history of RSV within 8 weeks prior to surgery.

## Key Quality Indicators

Use this section for a delineation of what constitutes “safe” nursing care on this unit including but not limited to the five approved state indicators which are designated with an asterisk*:

- *Patient falls prevalence
- *Patient falls with injury
- *Nursing care hours per visit
- Patient census
- Skill mix
- *Medication errors
- Overtime / end of shift overtime
- Productivity
- Agency/ Traveler usage
- Patient perception of care data
- Employee satisfaction (PCA-annually)
- Safety culture assessment data
- Data from professional organizations (ASPN, AORN)
- Pain management

</tbody>
</table>

*If any patients left on unit after 2030, they will be transferred to PACU or in house.*

*RN staff may float from PACU to SADU when necessary and possible if patients not discharge by 2030.*

*The typical staffing ratio is 1:1 for patients being admitted and 1:3 for patients being discharged depending on acuity. This is in alignment with the American Society of PeriAnesthesia Nurses (ASPN) staffing guidelines. The department makes every effort to avoid interruptions during the admission process. This is a critical time for patient safety and distractions can lead to errors. Support staff includes CNAs, HUCs (internal dept.), and EVS (external dept.)*

**Above Staffing Plan Contingent Upon the Following Supports/Considerations**

Support received from other units/departments or provided to other units and departments that impact staffing:
- Impact from GI, Cath lab and IR schedule can be significant
- Support from anesthesia with placement of difficult IV’s
- Laboratory
- EVS

Which Situations Require Staffing Variation?
Situations where additional staff are required to provide safe patient care:
- Increased volume of surgical, GI or procedure patients
- Increased/Decreased surgical and procedure volumes
- Increased/Decreased number of isolation patients
- Percentage of add-on cases not pre-screened
- Patients requiring translation services
- Lack of transportation help
- Last minute surgical schedule changes
