POLICY

The scope of practice of podiatric physicians and surgeons involves the entire realm of podiatric medicine.

The Board cannot make a determination regarding a specific treatment modality without complete information. Questions regarding an individual using a specific treatment modality should be treated as a complaint and referred for investigation. The applicable facts and patient information can be obtained through the investigative process and then assessed to determine if treatment was appropriate in that specific instance.

PROCEDURE  Action – See Department of Health Business Procedure 1-2-02
