STATE LICENSING SURVEY

The Washington State Department of Health (DOH) in accordance with Washington Administrative Code (WAC), Chapter 246-322 Private Psychiatric and Alcoholism Hospitals, conducted this health and safety survey.

Onsite dates: 12/06/17 to 12/07/17 and 02/06/17

Examination number: 2017-1769

The survey was conducted by:

Tyler Hennig ScM, MHS, PHA

Cathy Strauss, BSN, RN.

The Washington Fire Protection Bureau conducted the fire life safety inspection on 12/08/17.

STATE FORM 2567
LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE

[Signature]

STATE FORM

HOSPITAL ADMINISTRATOR 4/5/18

[Signature]

JMD/11

(If continuation sheet 1 of 34)
This Washington Administrative Code is not met as evidenced by:

Based on observation, interview, and record review, the facility failed to ensure that it submitted either a new certificate of need or an amended certificate of need application according to WAC 246-310.

Failure to submit a new certificate of need or an amended certificate of need as required risks inadequate patient care.

Reference: Washington Administrative Code (WAC) 246-310-020(1)(c) "A change in bed capacity of a health care facility increasing the total number of licensed beds or redistributing beds among acute care, nursing home care, and assisted living facility care, as defined under RCW 18.20.020, if the bed redistribution is effective for a period in excess of six months" or (WAC) 246-310-570 (1), "An amended certificate of need shall be required for any of the following modifications of a project for which a certificate of need was issued and has been submitted in accordance with subsection (2) of this section: (a) An addition of a new service; (b) An expansion of a service beyond that which was included in the certificate of need application on which the issuance of the certificate of need was based; (c) an increase in the inpatient bed capacity ..."

Findings included:

1. Record review of the Certificate of Need (CON), issued 10/09/98, showed that the hospital was licensed for 40 psychiatric beds, with explicit instructions that the licensed bed capacity of the psychiatric hospital "shall not exceed 40."
2. Review of the following documents showed how the hospital and residential treatment facility (RTF) began to share facility space:

a. In a letter sent to the Washington State Department of Health (DOH), dated 04/21/06, Navos requested to integrate beds from their hospital license and RTF license onto the same floor. Review of the letter showed that Navos acquired a separate 36 bed RTF license following the initial approval of the 40 bed psychiatric hospital CON. Review also showed that the hospital and RTF were operated the same and utilize the same service lines. Prior to the request, both facility types were housed on separate floors with separate staff.

b. Centers for Medicare and Medicaid Services (CMS) approved the proposal on 04/12/06. The Washington State Department of Health (DOH) Hospital Systems Quality Assurance (HSQA) approved the proposal on 05/01/07. No CON was requested or approved.

c. In a subsequent letter, dated 04/23/07, Navos requested an additional reorganization of the hospital and RTF beds. Under the new proposal, hospital and RTF rooms would be interspersed throughout each floor.

d. No approval letter was on file from CMS, DOH-HSQA, or CON.

e. In a final letter, dated 12/29/10, Navos stated it was increasing the number of hospital beds to the maximum allowed under the state license and rearranging hospital and RTF rooms again.

f. No approval letter was on file from CMS, DOH-HSQA, or CON.
3. On 02/06/18 at 9:00 AM, Surveyor #2 interviewed the hospital administrator (Staff #201) regarding facility operations and the floor plan requests sent to DOH. The administrator stated that both facility types (hospital and RTF) operate under the larger Navos 'umbrella' with the same processes, staff, and facilities for all patients. The administrator also stated that the facility was unable to locate documentation approving the changes to the floor plans from CMS or DOH.

322-035.1E POLICIES-ABUSE PROTECTION

WAC 246-322-035 Policies and Procedures. (1) The licensee shall develop and implement the following written policies and procedures consistent with this chapter and services provided: (e) Protecting against abuse and neglect and reporting suspected incidents according to the provisions of chapters 71.05, 71.34, 74.34 and 26.44 RCW.

This Washington Administrative Code is not met as evidenced by:

Based on interview and review of policies and procedures the hospital failed to ensure that hospital staff investigated the circumstances surrounding a patient injury (Patient #3).

Failure to investigate the incidents of patient harm places patients at further risk of physical and psychological harm and violation of patient rights.

Findings included:
STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION

ID PREFIX
TAG
L 325

SUMMARY STATEMENT OF DEFICIENCIES
(EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR ONC IDENTIFYING INFORMATION)

1. On 12/06/17 at 1:45 PM, Surveyor #2 reviewed the medical record for Patient #3. During the review, Nurse Manager (Staff #2) revealed an incident 2 weeks prior in which the patient reported an event that resulted in facial scratches and a large hematoma that extended from the temporal area to the occipital area of the patient’s head. The Advanced Nurse Practitioner (ARNP) (Staff #4) sent the Patient to the emergency room, he was examined and returned to the facility the same day.

2. On 12/06/17 at 2:30 PM, during an interview with the Nurse Manager (Staff #2) Surveyor #2 requested to review the incident report for the occurrence. The Nurse Manager told Surveyor #2 that no incident report had been completed and that the hospital had no policy for incident reporting.

3. On 12/06/17 at 3:30 PM, Surveyor #2 inquired if the Quality Department had received report of the incident. The staff reported that they did not know as the Quality Manager had resigned 2 months prior.

L 415

322-035.2 P&P-ANNUAL REVIEW

WAC 246-322-035 Policies and Procedures. (2) The licensee shall review and update the policies and procedures annually or more often as needed.

This Washington Administrative Code is not met as evidenced by:

Based on record review, the hospital failed to ensure that required policies and procedures were reviewed and updated annually as required.
Failure to review and update policies annually prevents the facility from operating with up-to-date policies and procedures which could risk patient and staff safety.

Findings included:

1. Record review of the hospital policy titled, "Policies and Procedures: Development and Approval," last revised 10/17, showed that the policy did not contain the section regarding the annual review as per WAC 246-322.

2. On 12/06/17, Surveyor #1 reviewed the required hospital policies to ensure they had been updated within the past year. Twelve of 25 policies reviewed had not been reviewed or revised within the past year:

a. Elopement Precautions, Policy #3020985, Next Review: 10/17

b. Food Handling Sanitation/Safety Standards, Policy #3020968, Next Review: 03/17

c. Receiving Food from Catering Services, Policy #3024758, Next Review: 03/17

d. Inspection and Maintenance of Biomedical Equipment, Policy #3021005, Next Review: 10/17

e. Employee Background Investigations, Policy #3018840, Next Review: 10/17

f. Transfer of Medically Compromised Patients, Policy #3020695, Next Review: 10/17

g. Storage of Patients' Personal Belongings, Policy #3024857, Next Review: 10/17

WAC 246-322-040 Governing Body and Administration. The governing body shall: (2) Provide staff, facilities, equipment, supplies and services to meet the needs of patients within the purposes of the hospital; This Washington Administrative Code is not met as evidenced by:

Based on observation, interview, and record review, the governing body failed to ensure that staff, facilities, and services were supplied to meet the needs of patients within the purpose of the hospital.

Failure to provide distinct staff, facilities, and services to address the needs of patients within the purposes of the hospital risks inadequate patient care.
<table>
<thead>
<tr>
<th>L 425</th>
<th>Continued From page 7</th>
</tr>
</thead>
</table>

Findings included:

ITEM #1 - Shared Services

1. Review of the Governing Body documents and meeting minutes showed the following:

   a. Review of the document titled, "Navos Second Amended and Restated Bylaws", showed that Navos is referred to as a single "corporation" which encompasses multiple different entities that is managed by a board of directors. The bylaws did not expressly mention the hospital or other facility types that are overseen by the governing body.

   b. Review of the Governing Body meeting minutes for 2017 showed that Navos is largely operated as a single entity. The only direct reference to the hospital was found in the minutes dated 01/09/17. These minutes indicate that the "E & T" beds (evaluation and treatment, which is part of the residential treatment facility (RTF)) are located within the hospital, suggesting that these beds and the hospital beds are treated as part of the same facility.

2. Review of hospital policies showed that the policies did not distinguish if they applied to the hospital, other entities, or the organization as a whole. The director of inpatient nursing (Staff #201) was listed as the owner of the policies dealing with direct patient care.

3. Review of the Infection Control Program showed the following:

   a. Review of the 2016-2017 infection control plan showed that the infection control committee was made up of "residential and hospital" nurses.
Further review of the infection control plan indicates that areas with hospital and residential beds are treated as a single entity for surveillance, prevention and control, separately from outpatient settings.

b. Review of the infection control program evaluation for 2015-2016 and goals for 2016-2017 did not show any distinct review of the hospital patients or services. Data in the evaluation were separated by floor rather than facility type, indicating that surveillance of the hospital and RTF services is combined.

c. Review of the infection control program meeting minutes from 2017 showed that meetings were organization wide. Inpatient issues are not delineated by hospital patients or services, but rather as inpatient services.

4. Review of the Quality Assurance and Performance Improvement Program showed the following:

a. Review of the "Quality Improvement Program" showed that the quality program is divided into three distinct groups: outpatient programs; children's programs; inpatient programs. The inpatient program quality structure involves membership from various departments of the hospital, all of which are indicated as encompassing all inpatient services (hospital and RTF). The inpatient clinical program reports quality information to the overall quality improvement committee. The quality plan does not specifically address the hospital as a single entity.

b. At the time of this investigation, the hospital lacked a Quality Director. On 02/06/18 at 9:00

AM, Surveyor #2 interviewed the Hospital Administrator (Staff #201) regarding the hospitals services. The administrator stated that all functions of the hospital are incorporated with the RTF, and overseen by the organization as a single, inpatient entity.

5. Review of services provided under contract showed the following:

a. On 02/08/18 at 1:30 PM, Surveyor #2 interviewed the hospital administrator (Staff #201) regarding various names of the facility on contracts. The administrator stated that Navos Mental Health Solutions was the technical company name and any other naming conventions are placeholders for this name.

b. Review of the document "Service Agreement between Navos Mental Health Solutions and Farestart", signed 12/18/17, showed that Farestart provides 100 lunches and dinners to Navos Mental Health Solutions.

c. On 12/06/17 at 12:00 PM, Surveyor #2 observed a food service at the facility. The hospital and RTF patients were served at the same time, by the same staff, and in the same dining area.

d. Review of the document, "Janitorial Service Agreement" between ABM Onsite Services and Navos Mental Health Solutions, showed that janitorial services would be provided at the hospital location. The document does not specify specifically that it applies to the hospital, but rather the entire building.

e. On 12/07/17 at 8:50 AM, Surveyor #2 observed a housekeeper (Staff #203) perform room
L.425  Continued From page 10

- Cleanings. Rooms for both the hospital and RTF patients were cleaned by the same staff during the same shifts.

- Review of the document titled, "Memorandum of Agreement between Qualis Health and Navos Inpatient Services," showed that Qualis Health served as the utilization and quality control review organization (QIC) for hospital patients and providers at Navos. The agreement specifically addresses the Medicare provider number for the hospital portion of Navos Inpatient Services.

- On 02/06/19 at 2:00 PM, Surveyor #2 asked the hospital administrator (Staff #201) if utilization review and quality data for only hospital patients or for both hospital and RTF patients was sent to the QIC. The administrator thought that data from both facility types was sent to the QIC, but would need to confirm with the former quality director (Staff #202). The former quality director confirmed via phone call that the data from the hospital and RTF was sent to the QIC.

- Additional external contracts for external staffing (Emerald City Medical Staffing), laboratory services (LabCorp), and dietitian services were reviewed. All of the contracts were signed to provide services for Navos Inpatient Services or Navos Mental Health Solutions, which includes both the hospital and the RTF.

- Review of hospital policy titled "Provision of Nursing Care, Treatment, and Services" Policy #3023513 Approved 04/16; regarding the structure of the staffing states, "There are two patient care units, each with 35 beds. Both units have licensed and designated Evaluation and Treatment beds and licensed and designated Hospital beds. Services are identical on both..."
Continued From page 11

units. Nursing care, as part of the hospital's acute inpatient psychiatric services, is available to all patients 24 hours a day, 7 days a week ...

a. 12/6/17 at 10:30 AM, Surveyor #8 reviewed the staffing plan with the Charge Nurse Staff #801. The Charge Nurse stated that the staff are trained the same and can work with all the patients.

b. Interview with Med Nurse, Staff #806, confirmed that the staff work with hospital and RTF patients and treat them the same.

c. Chief Nursing Officer, Staff #802 confirmed the above findings.

7. Hospital policy titled "Pre-Admission Screening and Patient Placement," Policy #3023511, Reviewed 10/16 states, "If a patient is admitted to an "E" [Residential Treatment Facility] (RTF) bed is found during admission process to have Medicare or a private insurance, ... the patient will be transferred to an "H" [Hospital] bed. ...If a patient admitted to an "E" (RTF) bed is found to have Medicare or Private Insurance, ... after the admission process has started ...the patient will be transferred to an "H" bed (Hospital) bed when one is available. Policy titled "Patient Access-Inpatient Bed placement" Approved 11/1/17 stated "If funding is unknown, the patient will be placed into an E bed while funding is investigated ...once coverage is identified, a bed transfer would be submitted if a patient is in an incorrect bed according to their funding source."

a. On 2/6/18 at 11:15 AM, Surveyor #8 interviewed the Charge Nurse, Staff #801, about the process of patient transfers from the Hospital (H) service to the RTF (E) service. The Charge
Nurse explained that each day he receives a notice of the patients that need to be transferred. The Charge Nurse Staff #601, shared the notice with this Surveyor. The document titled "UR Patient Admit / Discharge Request" dated 10/14/17 identified Patient #801 with instruction to discharge from H bed status and Admit to E bed status. The "Funding Source" was noted as "Medicare" and under comments was "Decertified from Medicare" and "Must Move ASAP".

b. On 02/06/18 at 10:00 AM, Surveyor #8 reviewed the transfer process with the Director of Revenue Cycle (Staff #805). The Director related that hospital and RTF transfers are driven solely by the patient's funding source.

8. On 02/06/18 at 9:30 AM, Surveyor #8 reviewed the bed transfer for Patient #801.

a. The discharged medical record showed an order (dated 11/21/17) for the Hospital bed transfer to a "RTF" bed. Further assessment of the record revealed the following:

i. No documentation in the medical record to indicate need or purpose to move the patient from a Hospital bed to Residential Treatment bed.

ii. There were no discharge notes or discharge instructions indicating that the patient had been discharged from one facility and admitted to the other facility.

iii. There was no physician discharge summary for the patient's hospital stay.

iv. There was no physician admit note or history and physical, and there was no nursing admission assessment for the RTF.
L 425 Continued From page 13

admission/transfer.

v. There was no informed consent obtained for treatment in the RTF facility.

vi. There was no evidence the patient was informed of their rights upon admission to the RTF program.

b. At the time of review, Charge Nurse (Staff #801) confirmed the findings and that no new consents are signed for care and treatment in the transferred facility.

9. Review of the medical record for Patients #802, #803, #804, and #806 revealed the following:

a. No evidence or supporting documentation indicating the need to discharge from hospital bed status (Patients #802 and #806) and admit to RTF patient status. No evidence or supporting documentation indicating the need to discharge from the RTF and admit to hospital bed status (Patients #803 and #804).

b. There was no consent for treatment signed on admit to RTF facility for Patients #802 and #806. There was no consent signed on admit to the hospital services for Patients #803 and #804.

c. The medication administration record was not separate from the other licensed facility.

d. At the time of interview, the Nurse Manager (Staff #801) confirmed these findings and that no new consents are signed for care and treatment in the transferred facility.

10. Review of the medical record for Patients

| L.425 | Continued From page 14  
#801, #802, #803, #804, and #806 revealed the following:  
a. Three of the 5 charts were Hospital Patients that transferred to the RTF facility. There were no discharge summaries present in the chart following the hospital discharge.  
b. The Nurse Manager (Staff #801) confirmed discharge summaries are done after the hospital patient has been discharged from the RTF facility.  
11. The facility's "Patient Rights and Responsibilities" dated 04/28/16 stated the patient may make informed decisions regarding their care ... request or refuse care, have a right to a psychosocial and medical evaluation within 24 hours of admission to determine whether continued detention in the facility is necessary, have all information complied, obtained or maintained in the course of receiving treatment kept confidential ..."  
12. On 02/03/18 at 10:30 AM, Surveyor #8 reviewed the transfer process for Patient #801 in the medical record with the RN Nurse Manager Staff #801. The Manager shared that the managers receive notification of insurance/funding changes and they begin the process of transferring a patient from a hospital bed to an RTF bed, or from an RTF to a hospital bed. They start with getting a doctor's order and then seeing if there is an open bed, make the changes in the electronic medical record and then move the patient. RN #801 confirmed that there is no conversation to inform the patient, there is no "discharge" paperwork for the patient and or their family. RN #801 reported that the patient is only aware of room change.

13. Review of the medical records for patients #802, #803, #804, and #806, did not show evidence that the document titled "An Important Message From Medicare About Your Right" was present for both admission and/or discharge.

ITEM #2 - Shared Staff

1. On 02/06/18 at 9:00 AM, Surveyor #2 interviewed the Hospital Administrator (Staff #201) regarding the organization of the hospital. The administrator stated that both facility types (The hospital and RTF) operate under a single "umbrella", with all functions and staffing carried out by Navos as a single entity. This includes facilities and administrative staff.

2. Review of the Medical Staff showed the following:

   a. Review of the document titled, "Organized Medical Staff Bylaws," revised 05/12, showed that the organized medical staff were appointed to the inpatient or outpatient services departments of Navos.

   b. Review of the document titled, "Navos Organized Medical Staff Privileging Application," showed that providers were privileged for the inpatient or outpatient setting. Neither the minimal criteria nor the core privileges distinguish between the hospital and RTF inpatient settings, but treat both facilities as a single entity.

   c. On 02/09/18 at 1:30 PM, surveyor #2 interviewed the Hospital Administrator (Staff #201) regarding credentialing of medical staff at the hospital. The administrator stated that medical staff are credentialled as either inpatient...

</tr>
</thead>
<tbody>
<tr>
<td>L 425</td>
<td>Continued From page 16</td>
</tr>
</tbody>
</table>

or outpatient staff, rather than credentialed for the hospital or RTF.

3. Review of the pharmaceutical services organizational chart showed that Navos operates a single pharmaceutical services staff that reports to the Clinical Chief Officer (Staff #205).

4. Review of various job descriptions showed the following:

a. Review of the position description for the hospital administrator showed that the administrator was responsible for the operation of Inpatient Services, which includes both the hospital and RTF facilities.

b. Review of the position description for the inpatient quality manager showed that the manager oversaw the quality program for all inpatient services. Per the position description this program encompasses regulations that apply to both the hospital and RTF licensures.

c. Review of the position description for the director of care management and court services showed that the director reports to the inpatient hospital administrator, which would oversee both the hospital and RTF.

d. Review of the position description for the director of pharmacy showed that the director reports to the chief of inpatient services, who would oversee both the hospital and the RTF.

5. On 12/06/17 Surveyor #8 observed the 8:00 AM medication pass on the 3rd floor. Interview with the Medication Nurse (Staff #806) showed that she does not know which patient is a Hospital patient and which patient is an RTF.
Continued From page 17

6. Review of hospital policy titled "Provision of Nursing Care, Treatment, and Services" Policy #30235/13 Approved 04/16; regarding the structure of the staffing, states, "There are two patient care units, each with 35 beds. Both units have licensed and designated Evaluation and Treatment beds (RTF beds) and licensed and designated Hospital beds. Services are identical on both units."

7. On 02/09/18 at 9:30 AM, Surveyor #8 interviewed the Nurse Manager (Staff #801) regarding nurse staffing for the hospital patients. The Nurse Manager stated that they have one staff oriented to work with all the patients. Staff are not oriented to a hospital program and a separate RTF program; it is one in the same.

ITEM #3 - Shared Space

1. Review of the floor plans for the "Inpatient Hospital Building" showed that both the Navos hospital and RTF shared much of the same space on the second and third floors of the buildings. Shared space included food service and dining areas, pharmaceutical services and medicine administration areas, patient exam and treatments rooms, bathing facilities, and recreational areas. Patient rooms were also interspersed throughout each floor and not divided into units. The rooms were not laid out per the requests outlined above.

2. On 12/06/17 from 10:00 AM to 1:00 PM, Surveyor #2 toured the second and third floors of the hospital and confirmed that the hospital and RTF licenses shared the same spaces for bathing, food service, recreation, patient care,
Continued From page 18
and pharmaceutical services and had rooms interspersed throughout both floors.

3. On 02/06/18 at 9:00 AM, Surveyor #2 interviewed the hospital administrator (Staff #201) regarding the operations of the hospital and the RTF. The administrator stated that both facility types operate under the Navos "umbrella" with the same staff, services, and facilities.

322-040.88 ADMIN RULES-PRIVILEGES

WAC 246-322-040 Governing Body and Administration. The governing body shall: (8) Require and approve professional staff bylaws and rules concerning, at a minimum: (b) Delineation of privileges; 
This Washington Administrative Code is not met as evidenced by:

Based on record review and interview, the hospital failed to ensure that the privileging form contained the required criteria to obtain primary care clinical privileges for medical doctors.

Failure to specify the criteria for obtaining clinical privileges risks approval of clinical privileges by the medical staff and governing body for practitioners that might not meet the requirements for obtaining those privileges.

Findings included:

1. Record review of the document titled "Navos Organized Medical Staff Privileging Application," does not contain the minimal criteria for medical doctors to obtain primary care core privileges. The document only contained the minimum

Based on policy and procedure review, document review, and interview, the facility failed to ensure that staff members received annual tuberculosis testing for 1 of 6 staff members reviewed.

Failure to perform annual tuberculosis testing for staff members placed patients and staff at risk of exposure to infection.

Reference: Washington Administrative Code (WAC) 246-322-050 (9) (a) (ii)

Findings included:

1. Record review of the hospital policy titled, "Tuberculosis Testing - Employee/Health Care Worker," last revised 04/16, showed that staff are required to have annual tuberculosis skin tests and a tuberculosis skin test upon hire unless the staff had a previously documented test within the past 12 months.

WAC 246-322-050 (9) (a) (ii) specifies that a tuberculosis skin test is not required if a staff member has documentation that it was performed within the six months preceding employment.

2. On 12/04/17 from 11:00 AM to 2:00 PM, Surveyor #1 reviewed human resources documents for 8 staff members. Three staff members did not have documentation of up to date tuberculin skin tests.

   a. A pharmacy technician (Staff #9) did not have a tuberculosis skin test within the past year. The last documented test occurred on 10/13/16.

   b. A nursing intern (Staff #12), hired on 06/19/17, had no documented tuberculosis skin test from

safe management of sharps;
This Washington Administrative Code is not met as evidenced by:

Based on document review and interview, the hospital failed to ensure that the infection control committee was providing consultation regarding procedures and products for contracted environmental services.

Failure to provide consultation regarding procedures and products for environmental services risks inadequate housekeeping practices and places patients and staff at risk of infection.

Findings included:

1. On 12/07/17, at 3:00 PM, Surveyor #1 and #2 reviewed infection control documents. The meeting minutes dated 04/25/17 and 05/30/17 stated that the infection control committee and the housekeeping contractor reviewed the chemicals used for disinfection. The minutes specify that a report and action plan were approved regarding chemicals used at the facility. The meeting minutes and the infection control committee binder did not have documentation of reports or action plans specifying which chemicals were approved. No documentation was provided by the time of survey exit.

2. Surveyor #1 interviewed the administrator (Staff #1) regarding the approval of chemicals for housekeeping use. The administrator stated that it was performed, but could not find documentation showing a list of approved chemicals.

This is a REPEAT VIOLATION - State survey 01/17

Failure to ensure care/treatment plans are kept current places patients at risk for patient harm and delayed care.

Findings included:

1. On 12/06/17 at 2:30 PM, Surveyor #2 reviewed the chart for Patient #1, a 43-year-old female admitted on 10/14/17 for the treatment of psychosis with a history of a below the knee amputation. Patient #1 sustained a fall 10/15/17. The record showed that:
   a. The physician order dated 10/14/17 stated that the patient a "low fall risk".
   b. There was no initial fall risk assessment completed by nursing staff.
   c. The care plan/treatment plan did not contain information related to the patient's mobility issues.
   d. On 12/06/17 at 1:00 PM, Surveyor #2 interviewed the Administrator (Staff #1) who acknowledged the fall risk should have been evaluated.

2. On 12/06/17 at 12:05 PM, Surveyor #2 reviewed the medical record for Patient #2, a 31-year old male patient admitted 12/04/17 for the treatment of paranoid schizophrenia and a history of cellulitis. The record showed that an admit order to "clean and cover the right buttock, s/p l&D PTA" (following incision and draining of an abscess prior to admit). There were no wound care assessments being done.
   a. The initial care/treatment plan did not include cellulitis as a problem.

b. Surveyor #1 measured the temperature of the water from the warewashing machine using a plate simulating dishwasher tester (a thermometer specifically designed for testing warewashing temperatures). The thermometer read the water temperature as 148.7 degrees Fahrenheit. The warewashing machine is a stationary rack, dual temperature machine that requires a temperature of 150 degrees Fahrenheit.

Reference: Washington State Retail Food Code, WAC 246-215-04545 (1)(b)

2. The Facilities Director (Staff #4) confirmed the finding during the kitchen inspection.
This report is the result of an unannounced Fire and Life Safety recertification survey conducted at Navos Psychiatric Hospital on 12/8/2017 by a representative of the Washington State Patrol, Fire Protection Bureau. The survey was conducted in concert with the Washington State Department of Health Services (DOH) health survey teams.

The facility has a total of 70 beds and at the time of this survey the census was 70.

The existing section of the 2012 Life Safety Code was used in accordance with 42 CFR 483.70.

The facility is a three story structure of Type II-A construction with exits through rated stair enclosures and direct to grade. The facility is protected by a Type 13 fire sprinkler system throughout and an automatic fire alarm system with corridor smoke detection. All exits are to grade with paved exit discharges to the public way.

The facility is in compliance with the 2012 Life Safety Code as adopted by the Centers for Medicare & Medicaid Services.

The surveyor was:

Donald L West

</table>
| L015 | **Finding 1:**
1. Record review of the Certificate of Need (CON), issued 10/09/96, showed that the hospital was licensed for 40 psychiatric beds, with explicit instructions that the licensed bed capacity of the psychiatric hospital "shall not exceed 40."

1. Review of the following documents showed how the hospital and residential treatment facility (RTF) began to share facility space:

   a. In a letter sent to the Washington State Department of Health (DOH), dated 04/21/06, Navos requested to integrate beds from their hospital license and RTF license onto the same floor. Review of the letter showed that Navos acquired a separate 36 bed RTF license following the initial approval of the 40 bed psychiatric hospital CON. Review also showed that the hospital and RTF were operated the same and utilize the same service lines. Prior to the request, both facility types were housed on separate floors with separate staff.

   b. Centers for Medicare and Medicaid Services (CMS) approved the proposal on 04/12/06. The Washington State Department of Health (DOH) Hospital Systems Quality Assurance (HSQA) approved the proposal on 05/01/07. No CON was requested or approved.

   c. In a subsequent letter, dated 04/23/07, Navos requested an additional reorganization of the hospital and RTF beds. Under the new proposal, hospital and RTF rooms would be interspersed throughout each floor.

   d. No approval letter was on file from CMS, DOH HSQA, or CON. | Terry McInerney, Hospital administrator | 9/1/18 | 100% | 99% |
e. In a final letter, dated 12/29/10, Navos stated it was increasing the number of hospital beds to the maximum allowed under the state license and rearranging hospital anc RTF rooms again.

f. No approval letter was on file from CMS, DOH HSQA, or CON.

1. On 02/06/18 at 9:00 AM, Surveyor #2 interviewed the hospital administrator (Staff #201) regarding facility operations and the floor plan requests sent to DOH. The administrator stated that both facility types (hospital and RTF) operate under the larger Navos "umbrella" with the same processes, staff, and facilities for all patients. The administrator also stated that the facility was unable to locate documentation approving the changes to the floor plans from CMS or DOH.

**Corrective Action 1:**
A request for a certificate of need will be submitted at least 60 days prior to any future movement or changes in beds status or location that will be effective for a period in excess of 6 months per (WAC) 246-310-020 (1)(c). All changes in programing and patient care in the hospital will be planned and researched to ensure compliance with all regulatory agencies. To ensure compliance no changes will be implemented until the planning process is completed and approved by the Quality Manager and Hospital Administration. All information and communication received or sent during the process will be filed and stored in the Quality department. A certificate of need approval documentation was received on 5/15/18.

On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, the existing RTF patients will be discharged and immediately readmitted to the hospital. Expected completion by 9/1/18.

**Finding:**
1. On 12/06/17 at 1:45 PM, Surveyor #2 reviewed the medical record for Patient #3. During the review, Nurse Manager (Staff #2) revealed an incident 2 weeks prior in which the patient reported an event that resulted in facial scratches and a large hematoma that extended from the temporal area to the occipital area of the patient's head. The Advanced Nurse Practitioner (ARNP) (Staff #4) sent the Patient to the emergency room; he was examined and returned to the facility the same day.

</tr>
</tbody>
</table>
2. On 12/06/17 at 2:30 PM, during an interview with the Nurse Manager (Staff #2) Surveyor #2 requested to review the incident report for the occurrence. The Nurse Manager told Surveyor #2 that no incident report had been completed and that the hospital had no policy for incident reporting.

3. On 12/06/17 at 3:30 PM, Surveyor #2 inquired if the Quality Department had received report of the incident. The staff reported that they did not know as the Quality Manager had resigned 2 months prior.

**Corrective Action:**
1. The incident involving patient #3 was reviewed in our electronic reporting system. The incident (#5112) was documented in the system and a risk review was completed on 12/4/2017, as evidenced by the follow-up documentation. The risk review information was not entered into the system at the time of this audit, due to an oversight by the temporary Quality Manager. This was amended and the risk review documentation has been entered.

2. There is an existing policy for incident reporting in our electronic system. Policy, “Inpatient Risk Management – Sentinel Events/Reporting Adverse Outcomes”, #41432/435, last updated/revised 10/2017 and due for review 10/2018. Staff is educated on this policy and reporting procedures at Navos onboarding and Inpatient unit orientation. Staff received re-education on the risk reporting system on 4/13/18 and printed instructions are posted on both units.

3. At the time of the audit, Inpatient services did not have a Quality and Compliance Manager (previous manager left Navos in October 2017). The Outpatient Compliance department was filling-in with some reporting tasks. As of February 2018, the Inpatient Department has a new full-time Quality & Compliance Manager. Staff has been introduced to this new employee.

g. Storage of Patients' Personal belongings, Policy #3024857, Next Review: 10/17.

h. Transport of a Patient, Policy #3020697, Next Review: 10/17.

i. Environmental Cleaning and Disinfecting, Policy #2948581, Next Review: 10/17.

k. Smoking, Policy #3032839, Next Review: 03/17.

l. Pre-Admission Screening and Patient Placement, Policy #3023511, Next Review: 10/17.

Corrective Action:

1. The policy titled - Policies and Procedures: Development and Approval, Policy #44444412, was updated on 1/5/2018 by the policy owner.

2. Policies are due for review annually or any time updates need to be made. Navos has a policy software program which alerts policy owners to due dates. Below is a list of the updated policies from the findings:
A) Elopement Precautions, Policy #4725495, was updated on 3/16/2018 by the policy owner.

B) Food Handling Sanitation/Safety Standards, Policy #4725495, was updated on 3/16/18 by the policy owner.

C) Receiving Food from Catering Services, Policy #4747944, was updated on 3/22/2018 by the policy owner.

D) Inspection and Maintenance of Biomedical Equipment, Policy #4747955, was updated on 3/22/2018 by the policy owner.

E) Employee Background Investigations, Policy # 4667296, was updated on 3/4/2018 by the policy owner.

F) Transfer of Medically Compromised Patients, Policy #4748020, was updated on 3/22/2018 by the policy owner.

G) Storage of Patients' Personal Belongings, Policy #4747922, was updated on 3/22/2018 by the policy owner.

H) Transport of a Patient, Policy #4747846, was updated on 3/22/2018 by the policy owner.

I) Environmental Cleaning and Disinfecting, Policy #4725811, was updated on 3/16/2018 by the policy owner.

J) Seclusion and Restraint, Policy #4747814, was updated on 3/22/2018 by the policy owner.

K) Smoking, Policy #4553965, was reassigned to EOC, from HR and updated on 3/19/2018 by the policy owner. It was also added to the annual Safety & Security Management Plan review.

L) Pre-Admission Screening and Patient Placement, Policy #4690313, was updated on 3/7/2018 by the policy owner.

Policies identified in the audit as being out of date have been corrected by the policy owner. Policies will be reviewed and/or updated annually, at a minimum. To ensure compliance, all inpatient policies and procedures will be
reviewed monthly. Policies that are due or overdue for review will be presented to inpatient staff at the Performance Management Team Meeting (PMT), once a month. Policy owners will be given 30 days to renew or update policies. If policies are not updated after the 30 day window, then the appropriate Supervisor will be notified.

<td>Finding 1:</td>
<td></td>
</tr>
<tr>
<td>1. Review of the Governing Body documents and meeting minutes showed the following:</td>
<td></td>
</tr>
<tr>
<td>a. Review of the document titled, &quot;Navos Second Amended and Restated Bylaws&quot;, showed that Navos is referred to as a single &quot;corporation&quot; which encompasses multiple different entities that is managed by a board of directors. The bylaws did not expressly mention the hospital or other facility types that are overseen by the governing body.</td>
<td></td>
</tr>
<tr>
<td>b. Review of the Governing Body meeting minutes for 2017 showed that Navos is largely operated as a single entity. The only direct reference to the hospital was found in the minutes dated 01/09/17. These minutes indicate that the &quot;E &amp; T&quot; beds (evaluation and treatment, which is part of the residential treatment facility (RTF)) are located within the hospital, suggesting that these beds and the hospital beds are treated as part of the same facility.</td>
<td></td>
</tr>
<tr>
<td>Corrective action 1:</td>
<td></td>
</tr>
<tr>
<td>1 (a) (b) A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Expected completion by 9/1/18. All future references to the inpatient setting will be specific to hospital only.</td>
<td></td>
</tr>
<tr>
<td>Finding 2:</td>
<td></td>
</tr>
<tr>
<td>2. Review of hospital policies showed that the policies did not distinguish if they applied to the hospital, other entities, or the organization as a whole. The director of inpatient nursing (Staff #201) was listed as the owner of the policies dealing with direct patient care.</td>
<td></td>
</tr>
<tr>

hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, the existing RTF patients will be discharged and immediately readmitted to the hospital. Expected completion by 9/1/18 Once the use of the beds is approved all policies will be updated by 9/15/18 to specifically address the hospital program. All new policies written that effect the hospital will be specific to the hospital only.

Finding 3:
3. Review of the Infection Control Program showed the following:

a. Review of the 2016-2017 infection control plan showed that the infection control committee was made up of "residential and hospital" nurses. Further review of the infection control plan indicates that areas with hospital and residential beds are treated as a single entity for surveillance, prevention and control, separately from outpatient settings.

b. Review of the infection control program evaluation for 2015-2016 and goals for 2016-2017 did not show any distinct review of the hospital patients or services. Data in the evaluation were separated by floor rather than facility type, indicating that surveillance of the hospital and RTF services is combined.

c. Review of the infection control program meeting minutes from 2017 showed that meetings were organization wide. Inpatient issues are not delineated by hospital patients or services, but rather as inpatient services.

Corrective Action 3:
3(a)(b) A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, the existing RTF patients will be discharged and immediately readmitted to the hospital. Expected completion by 9/1/18. Once beds are approved and licensed the 2018-2019 infection control plan and surveillance will specifically address the hospital separately from other Navos programs expected completion by

Terry McInerney, Hospital Administrator    9/1/18    100%    100%
9/1/18.

3(c) A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, the hospital will be discussed as a single entity from the outpatient residential this will be reflected in the meeting minutes along with names of hospital representation. Expected completion 9/1/18.

Finding 4:
4. Review of the Quality Assurance and Performance Improvement Program showed the following:

a. Review of the "Quality Improvement Program" showed that the quality program is divided into three distinct groups: outpatient programs; children’s programs; inpatient programs. The inpatient program quality structure involves membership from various departments of the hospital, all of which are indicated as encompassing all inpatient services (hospital and RTF). The inpatient clinical program reports quality information to the overall quality improvement committee. The quality plan does not specifically address the hospital as a single entity.

b. At the time of this investigation, the hospital lacked a Quality Director. On 02/06/18 at 9:00 AM, Surveyor #2 interviewed the Hospital Administrator (Staff #201) regarding the hospitals services. The administrator stated that all functions of the hospital are incorporated with the RTF, and overseen by the organization as a single, inpatient entity.

Corrective Action 4:
4(a)(b). A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once beds are approved the hospital will be discussed as a single entity consisting of 70 licensed psychiatric hospital beds. Expected completion 9/1/18. The hospital Quality manager position has been filled and will be responsible for reporting specifically on the
Finding 5:
5. Review of services provided under contract showed the following:

a. On 02/06/18 at 1:30 PM, Surveyor #2 interviewed the hospital administrator (Staff #201) regarding various names of the facility on contracts. The administrator stated that Navos Mental Health Solutions was the technical company name and any other naming conventions are placeholders for this name.

b. Review of the document "Service Agreement between Navos Mental Health Solutions and Farestart", signed 12/18/17, showed that Farestart provides 100 lunches and dinners to Navos Mental Health Solutions.

c. On 12/06/17 at 12:00 PM, Surveyor #2 observed a food service at the facility. The hospital and RTF patients were served at the same time, by the same staff, and in the same dining area.

d. Review of the document, "Janitorial Service Agreement," between ABM Onsite Services and Navos Mental Health Solutions, showed that janitorial services would be provided at the hospital location. The document does not specify specifically that it applies to the hospital, but rather the entire building.

e. On 12/07/17 at 8:50 AM, Surveyor #2 observed a housekeeper (Staff #203) performs room cleanings. Rooms for both the hospital and RTF patients were cleaned by the same staff during the same shifts.

f. Review of the document titled, "Memorandum of Agreement between Qualis Health and Navos Inpatient Services," showed that Qualis Health served as the utilization and quality control review organization (QIO) for hospital patients and providers at Navos. The agreement specifically addresses the Medicare provider number for the hospital portion of Navos Inpatient Services.

g. On 02/06/18 at 2:00 PM, Surveyor #2 asked the hospital administrator (Staff #201) if utilization review and quality data for only hospital patients or for both hospital and RTF patients was sent to the QIC. The administrator thought that data from both facility types was gone to the QIC, but would need to confirm with the former quality director (Staff #202). The former quality director confirmed via phone call that the data from the hospital and RTF was sent to
the QIC.

h. Additional external contracts for external staffing (Emerald City Medical Staffing), laboratory services (LabCorp), and dietician services were reviewed. All of the contracts were signed to provide services for Navos Inpatient Services or Navos Mental Health Solutions, which includes both the hospital and the RTF.

Corrective Action 5:
5(a)(b)(c)(d)(e)(h ) A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the hospital beds are approved for use contracts will be reviewed and updated as needed by 9/15/18.
5(f)(g) Any reporting to Qualis prior to the RTF beds being changed to hospital be will separated. Effective 9/1/18 all data reporting to the Qualis will only include hospital information.

Finding 6:
6. Review of hospital policy titled "Provision of Nursing Care, Treatment, and Services" Policy #3023513 Approved 04/16; regarding the structure of the staffing states, "There are two patient care units, each with 35 beds. Both units have licensed and designated Evaluation and Treatment beds and licensed and designated Hospital beds. Services are identical on both units. Nursing care, as part of the hospital's acute inpatient psychiatric services, is available to all patients 24 hours a day, 7 days a week ..."

a. 12/6/17 at 10:30 AM, Surveyor #8 reviewed the staffing plan with the Charge Nurse Staff #801. The Charge Nurse stated that the staff are trained the same and can work with all the patients.

b. Interview with Med Nurse, Staff #806, confirmed that the staff work with hospital and RTF patients and treat them the same.

c. Chief Nursing Officer, Staff #802 confirmed the above findings.
Corrective Action 6:
6 (a)(b)(c) A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, the existing RTF patients will be discharged and immediately readmitted to the hospital. Expected completion by 9/1/18.

Finding 7:
7. Hospital policy titled 'Pre-Admission Screening and Patient Placement,' Policy #3023511, Reviewed 10/16 states, "if a patient is admitted to an "E" [Residential Treatment Facility] (RTF) bed is found during admission process to have Medicare or a private insurance, ... the patient will be transferred to an "H" [Hospital] bed. ... if a patient admitted to an "E" (RTF) bed is found to have Medicare or Private insurance. ... after the admission process has started ... the patient will be transferred to an "H" bed (Hospital) bed when one is available. Policy titled "Patient Access- Inpatient Bed placement" Approved 11/1/17 stated "if funding is unknown, the patient will be placed into an E bed while funding is investigated... once coverage is identified, a bed transfer would be submitted if a patient is in an incorrect bed according to their funding source."

a. On 2/6/18 at 11:15 AM, Surveyor #8 interviewed the Charge Nurse, Staff #801, about the process of patient transfers from the Hospital (H) service to the RTF (E) service. The Charge Nurse explained that each day he receives a notice of the patients that need to be transferred. The Charge Nurse Staff #801, shared the notice with this Surveyor. The document titled "UR Patient Admit / Discharge Request" dated 10/14/17 identified Patient #801 with instruction to discharge from H bed status and Admit to E bed status. The "Funding Source" was noted as "Medicare" and under comments was "Decertified from Medicare" and "Must Move ASAP"

b. On 02/06/18 at 10:00 AM, Surveyor #8 reviewed the transfer process with the Director of Revenue Cycle (Staff #805). The Director related that hospital and RTF transfers are driven solely by the patient's funding source.

Corrective Action:
7(a)(b) All patients that are admitted will remain in the bed that they were
admitted to regardless of funding source. Transfers will only be done for therapeutic reasons.

Finding 8:
8. On 02/06/18 at 9:30 AM, Surveyor #8 reviewed the bed transfer for Patient #801.

a. The discharged medical record showed an order (dated 11/21/17) for the Hospital bed transfer to a "RTF" bed. Further assessment of the record revealed the following:

i. No documentation in the medical record to indicate need or purpose to move the patient from a Hospital bed to Residential Treatment bed.

ii. There were no discharge notes or discharge instructions indicating that the patient had been discharged from one facility and admitted to the other facility.

iii. There was no physician discharge summary for the patient’s hospital stay.

iv. There was no physician admit note or history and physical, and there was no nursing admission assessment for the RTF admission/transfer.

v. There was no informed consent obtained for treatment in the RTF facility.

vi. There was no evidence the patient was informed of their rights upon admission to the RTF program.

b. At the time of review, Charge Nurse (Staff #801) confirmed the findings and that no new consents are signed for care and treatment in the transferred facility.

Corrective Action 8:
8 (a-i-vi)(b) All patient movement between beds will be a complete discharge and admission including the reason for transfer, discharge summary, new assessments, patient rights, and consents. The nurse managers will monitor 100% of the patient discharge/readmissions until the beds are converted to all hospital for compliance.
Finding 9:
9. Review of the medical record for Patients #802, #803, #804, and #806 revealed the following:

a. No evidence or supporting documentation indicating the need to discharge from hospital bed status (Patients #802 and #806) and admit to RTF patient status. No evidence or supporting documentation indicating the need to discharge from the RTF and admit to hospital bed status (Patients #803 and #804).

b. There was no consent for treatment signed on admit to RTF facility for Patients #802 and #806. There was no consent signed on admit to the hospital services for Patients #803 and #804.

c. The medication administration record was not separate from the other licensed facility.

d. At the time of interview, the Nurse Manager (Staff #801) confirmed these findings and that no new consents are signed for care and treatment in the transferred facility.

Corrective Action 9:
9 (a) All movement of patients between beds will have supporting documentation of the need to transfer. Nurse managers will audit 100% of transfers for compliance.
9 (b)(c) All movement of patients between beds will have new consents for care and treatment signed. Nurse managers will audit 100% of transfers for compliance.
9 (d) All movement of patients between beds will have a separate medication administration record for each stay. Nurse managers will audit 100% of transfers for compliance.

Finding 10:
10. Review of the medical record for Patients #801, #802, #803, #804, and #806 revealed the following:

a. Three of the 5 charts were Hospital Patients that transferred to the RTF facility. There was no discharge summaries present in the chart following the
hospital discharge.

b. The Nurse Manager (Staff #801) confirmed discharge summaries are done after the hospital patient has been discharged from the RTF facility.

**Corrective Action 10:**
10(a)(b) All movement of patients between beds will have a discharge summary completed at the time of the transfer. Nurse Managers will audit 100% of all transfers for compliance.

**Finding 11:**
11. The facility's "Patient Rights and Responsibilities" dated 04/28/16 stated the patient may make informed decisions regarding their care ... request or refuse care, have a right to a psychosocial and medical evaluation within 24 hours of admission to determine whether continued detention in the facility is necessary, have all information compiled, obtained or maintained in the course of receiving treatment kept confidential ..."

**Corrective Action 11:**
11. All movement of patients between beds will have a psychosocial and medical evaluation done at the time of transfer. Nurse Managers will audit 100% of all transfers for compliance.

**Finding 12:**
12. On 02/06/18 at 10:30 AM, Surveyor #8 reviewed the transfer process for Patient #801 in the medical record with the RN Nurse Manager Staff #801. The Manager shared that the managers receive notification of insurance/funding changes and they begin the process of transferring a patient from a hospital bed to an RTF bed, or from an RTF to a hospital bed. They start with getting a doctor's order and then seeing if there is an open bed, make the changes in the electronic medical record and then move the patient. RN #801 confirmed that there is no conversation to inform the patient, there was no "discharge" paperwork for the patient and or their family. RN #801 reported that the patient is only aware of room change.

**Corrective Action 12:**
12. All patient’s that are moved between beds will be informed of the reason and receive all discharge paperwork.
### Finding 13:
13. Review of the medical records for patients #802, #803, #804, and #806, did not show evidence that the document titled "An Important Message From Medicare About Your Right" was present for both admission and/or discharge.

#### Corrective Action 13:
13. All patients that are moved between beds will be given a new document titled "An Important Message From Medicare About Your Right" at the time of transfer. Nurse Managers will audit 100% of all transfers for compliance.

### ITEM #2 - Shared Staff

#### Finding 1:
1. On 02/06/18 at 9:00 AM, Surveyor #2 interviewed the Hospital Administrator (Staff #20%) regarding the organization of the hospital. The administrator stated that both facility types (The hospital and RTF) operate under a single "umbrella", with all functions and staffing carried out by Navos as a single entity. This includes facilities and administrative staff.

#### Corrective Action 1:
1. A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, the existing RTF patients will be discharged and immediately readmitted to the hospital. Expected completion by 9/1/18 at that time the staff will not be shared between programs.

#### Finding 2:
2. Review of the Medical Staff showed the following:

  a. Review of the document titled, "Organized Medical Staff Bylaws," revised 05/12, showed that the organized medical staff were appointed to the inpatient or outpatient services departments of Navos.

  b. Review of the document titled, "Navos Organized Medical Staff Privileging
Application," showed that providers were privileged for the inpatient or outpatient setting. Neither the minimal criteria nor the core privileges distinguish between the hospital and RTF inpatient settings, but treat both facilities as a single entity.

c. On 02/06/18 at 1:30 PM, surveyor #2 interviewed the Hospital Administrator (Staff #201) regarding credentialing of medical staff at the hospital. The administrator stated that medical staff are credentialed as either inpatient or outpatient staff, rather than credentialed for the hospital or RTF.

Corrective Action 2:
2 (a)(b)(c) A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds the reference to inpatient will only encompass hospital beds expected completion by 9/1/18

Finding 3:
3. Review of the pharmaceutical services organizational chart showed that Navos operates a single pharmaceutical services staff that reports to the Clinical Chief Officer (Staff #205).

Corrective Action 3:
3. A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed the pharmacy will only be servicing hospital patients expected completion 9/1/18

Finding 4:
4. Review of various job descriptions showed the following:

a. Review of the position description for the hospital administrator showed that the administrator was responsible for the operation of Inpatient Services, which includes both the hospital and RTF facilities.
b. Review of the position description for the inpatient quality manager showed that the manager oversaw the quality program for all inpatient services. Per the position description this program encompasses regulations that apply to both the hospital and RTF licensures.

c. Review of the position description for the director of care management and court services showed that the director reports to the inpatient hospital administrator, which would oversee both the hospital and RTF.

d. Review of the position description for the director of pharmacy showed that the director reports to the chief of inpatient services, who would oversee both the hospital and the RTF.

Corrective Action 4:
4. (a)(b)(c)(d) A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed all staff including administration will only be providing or overseeing hospital services expected completion 9/1/18.

Finding 5:
5. On 12/06/17 Surveyor #8 observed the 8:00 AM medication pass on the 3rd floor. Interview with the Medication Nurse (Staff #806) showed that she does not know which patient is a Hospital patient and which patient is an RTF patient, and they are treated the same.

Corrective Action 5:
5. A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, all staff will only be providing services to hospital patients expected completion 9/1/18.

Terry McInerney, Hospital Administrator

9/1/18

100%

100%
Finding 6:
6. Review of hospital policy titled "Provision of Nursing Care, Treatment, and Services" Policy #3023513 Approved 04/16; regarding the structure of the staffing, states, "There are two patient care units, each with 35 beds. Both units have licensed and designated Evaluation and Treatment beds [RTF beds] and licensed and designated Hospital beds. Services are identical on both units."

Corrective Action 6:
6. A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed the policy will be revised and updated to reflect the changes in bed status expected completion by 9/1/18.

Finding 7:
7. On 02/06/18 at 9:30 AM, Surveyor #8 interviewed the Nurse Manager (Staff #801) regarding nurse staffing for the hospital patients. The Nurse Manager stated that they have one staff oriented to work with all the patients. Staff is not oriented to a hospital program and a separate RTF program; it is one in the same.

Corrective Action 7:
7. A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, staff will be providing care to hospital patients only. No new training required current orientation is based on hospital standards expected completion 9/1/18.

ITEM #3 - Shared Space

Finding 1:
1. Review of the floor plans for the "Inpatient Hospital Building" showed that both the Navos hospital and RTF shared much of the same space on the
second and third floors of the buildings. Shared space included food service and dining areas, pharmaceutical services and medicine administration areas, patient exam and treatments rooms, bathing facilities, and recreational areas. Patient rooms were also interspersed throughout each floor and not divided into units. The rooms were not laid out per the requests outlined above.

**Corrective Action 1:**
1. A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, each patient care unit will have 35 licensed hospital beds eliminating the shared space expected completion 9/1/18.

**Finding 2:**
2. On 12/06/17 from 10:00 AM to 1:00 PM, Surveyor #2 toured the second and third floors of the hospital and confirmed that the hospital and RTF licenses shared the same spaces for bathing, food service, recreation, patient care, and pharmaceutical services and had rooms interspersed throughout both floors.

**Corrective Action 2:**
2. A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, each patient care unit will have 35 licensed hospital beds eliminating the shared space expected completion 9/1/18.

**Finding 3:**
3. On 02/06/18 at 9:00 AM, Surveyor #2 interviewed the hospital administrator (Staff #201) regarding the operations of the hospital and the RTF. The administrator stated that both facility types operate under the Navos "umbrella" with the same staff, services, and facilities.
Corrective Action 3:
3. A certificate of need was filed on 4/20/18 requesting the addition of 30 hospital beds. Certificate of need approval documentation was received on 5/15/18. On 6/15/18 an application was submitted for construction review process. On 6/14/18 an application and payment was submitted for the existing 40 beds and additional 30 hospital beds. Once the construction review has been completed, approval received and beds licensed, each patient care unit will have 35 licensed hospital beds eliminating the need for shared space, staff and services expected completion 9/1/18.

Finding:
1. Record review of the document titled "Navos Organized Medical Staff Privileging Application," does not contain the minimal criteria for medical doctors to obtain primary care core privileges. The document only contained the minimum criteria for nurse practitioners and physician assistants.

2. On 12/07/17 from 10:00 AM to 11:00 AM, Surveyor #1 review medical staff credentialing records for 5 staff members. One staff member, a medical doctor (Staff #7), had requested clinical privileges for primary care. The privileges were approved, but no criteria for obtaining privileges (e.g. licensure requirements, board certification, etc.) was located in the privileging form.

3. The medical staff coordinator (Staff #8) confirmed the finding and stated that the primary care privileging requirements were mistakenly excluded from the updated privileging form.

Corrective Action: 1, 2 & 3. The privileging form has been updated to include the minimum criteria for medical doctors to obtain primary care core privileges. The following language has been included in the Navos Organized Medical Staff Privileging Form as follows:

*Minimal Criteria for MD/DO requesting core privileges in Primary Care Medicine:*
- Current Washington State Physician and Surgeon license to practice medicine, without sanctions or restrictions.
- Successful completion of an approved ACGME-approved residency resulting in "board-eligible" status for the American Board of Family Medicine, American Osteopathic Board of Family Medicine, American Board of Internal Medicine, or American Osteopathic Board of Internal Medicine is preferred, however privileges as a staff physician may be granted solely on the basis of training, documented competency, and experience.
- Registration capability with the Centers for Medicare and Medicaid Services.
- An active Drug Enforcement Agency (DEA) license.

The Form will be submitted for approval to the Medical Executive Committee and then to the Governing Board. Any medical doctors credentialed using the previous Privileging form will be re-credentialed using the updated Privileging form. Lack of approval by the Medical Executive Committee or the Governing Board. If that occurred, any further changes needed pursuant to that review would be implemented as appropriate and resubmitted for approval.

| Finding: | 1. On 12/04/17 from 11:00 AM to 2:00 PM, Surveyor #1 reviewed human resources documents for 8 staff members. One staff member, a nursing intern (Staff #12), did not have a job description in her personnel file.  
2. Surveyor #1 interviewed the human resources generalist (Staff #10) regarding the position description for nursing interns. The generalist stated that the facility did not have a job description for interns; therefore, it would not be in the employee file. |
| --- | --- |
| Corrective Action: | 1. All new hires will sign a job description on the first day of Onboarding, which will be filed in their personnel file.  
2. Establishing job descriptions for all employees at Navos, including Interns. |
| L520 |  |  |  |  |  |  |
| Finding: | 1. Record review of the hospital policy titled, "Tuberculosis Testing - |  |  |  |  |  |
| L615 | 1. | Dr. Rebecca Richardson, 1. | 3/29/2018 | 100% | 98% | 100% | 98% |
Employee/Health Care Worker," last revised 04/16, showed that staff are required to have annual tuberculosis skin tests and a tuberculosis skin test upon hire unless the staff had a previously documented test within the past 12 months. WAC 246-322-050 (9) (a) (ii) specifies that a tuberculosis skin test is not required if a staff member has documentation that it was performed within the six months preceding employment.

2. On 12/04/17 from 11:00 AM to 2:00 PM, Surveyor #1 reviewed human resources documents for 8 staff members. Three staff members did not have documentation of up to date tuberculin skin tests.

a. A pharmacy technician (Staff #9) did not have a tuberculosis skin test within the past year. The last documented test occurred on 10/13/16.

b. A nursing intern (Staff #12), hired on 06/19/17, and had no documented tuberculosis skin test from 09/08/16.

c. A registered nurse (Staff #10), hired on 10/24/17, did not have documentation of an initial tuberculosis skin test.

3. Surveyor #1 interviewed the human resources generalist (Staff #10) regarding initial tuberculosis skin testing. The generalist stated that staff has 30 days from hire to complete their initial skin test. The generalist also confirmed the above findings at time of review.

   This is a REPEAT VIOLATION - State survey 01/17

**Corrective Action:**

1. The Infection Control Committee will review the hospital policy titled, "Tuberculosis Testing - Employee/Health Care Worker" at its next meeting on March 29, 2018. The policy will be changed to reflect that a tuberculosis skin test is not required if a staff member has documentation that it was performed within the six months preceding employment. HR, nurses who administer the TST to new hires, and nursing administration will be informed and educated regarding the new policy. HR will follow the updated policy when hiring new staff.

2. The HR department will be establishing improved processes for monitoring, reporting and communication regarding TB testing.
   a. Staff will receive TB test with documentation.
   b. Staff will receive TB test with documentation.
c. Staff will receive TB test with documentation.

3. Electronic email alerts will be sent to staff and their manager one month prior, two weeks prior and one week prior to due dates for training, testing and verifications. Ensure day one of onboarding that files contain verifications required. Use alerts and reporting from HR system to track compliance.

<tbody>
<tr>
<td>1. Record review of the daily patient census sheet dated 12/06/17 showed that the hospital has 35 patients per floor for a total of 70 patients. The patient beds are split with 21 hospital patients and 14 residential treatment facility</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
patients on the third floor and 19 hospital patients and 16 residential treatment facility patients on the second floor.

2. On 12/06/17 at 8:00 AM, the survey team conducted an entrance conference. Interview with the hospital administrator (Staff #1) showed that each patient care floor had 35 total beds with hospital and residential treatment facility patients co-mingled on each floor.

3. On 12/06/17 from 10:00 AM to 11:15 AM, Surveyor #1 toured the third floor of the hospital. During the tour, the surveyor inspected the bathing facilities and asked the Facilities Director (Staff #5) and Environment of Care and Safety Officer (Staff #6) the total number of showers on the floor. They stated that there were 4 showers present on the floor for patient use. The surveyor also asked how many total patients were on the floor, and Staff #5 and #6 stated that there are 35 beds per floor, making a total of more than 6 patients per shower. Surveyor #1 confirmed the number of showers during the tour.

Corrective Action:
1, 2 & 3. Navos will be adding two bathing facilities on each patient floor (2nd & 3rd). A concept design has been authorized and a permit construct drawing from a local Architect has been submitted. The bathroom locations have been agreed upon and the estimated schedule is as follows:
- 3 weeks Design-Completed
- 4 weeks DOH CRS approval (published review time 25 days) and we will apply for an over the counter Seattle building permit at the same time-Completed
- 2 weeks Bid and Funding approval-In process 5/22/18-6/5/18
- 6 weeks to build- 6/20/18-8/15/18
- 5 week float due to unforeseen issues i.e. city require full review 20 weeks or five months.

<tbody>
<tr>
<td>L1255</td>
<td>1. On 12/06/17 at 2:30 PM, Surveyor #2 reviewed the chart for Patient #1, a 43-year-old female admitted on 10/14/17 for the treatment of psychosis with a history of a below the knee amputation. Patient #1 sustained a fall 10/15/17. The record showed that:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>a. The physician order dated 10/14/17 stated that the patient a &quot;low fall risk&quot;.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
b. There was no initial fall risk assessment completed by nursing staff.

c. The care plan/treatment plan did not contain information related to the patient's mobility issues.

d. On 12/06/17 at 1:00 PM, Surveyor #2 interviewed the Administrator (Staff #1) who acknowledged the fall risk should have been evaluated.

Corrective Action:
1(a)(b)(d) The nursing staff will receive education on completing the fall risk assessment. The nurse managers or designee will audit 100% of admits for accurately completed fall risk assessments and orders for 90 days. Then ongoing 10% of all admissions.
1(c) The nursing staff will receive education on addressing medical issues on the treatment plan. The nurse managers or designee will monitor 100% of treatment plans to ensure medical issues are addressed for 90 days. Then ongoing 10% of all admissions.

2. On 12/06/17 at 12:05 PM, Surveyor #2 reviewed the medical record for Patient #2, a 31-year old male patient admitted 12/04/17 for the treatment of paranoid schizophrenia and a history of cellulitis. The record showed that an admit order to "clean and cover the right buttock, s/p I&D PTA" (following incision and draining of an abscess prior to admit). There were no wound care assessments being done.

a. The initial care/treatment plan did not include cellulitis as a problem.

b. Wound and wound care were not identified on the care/treatment plan.

c. On 12/07/17 at 3:00 PM, Surveyor #2 interviewed the dayshift Charge Nurse (Staff #3) that she was unaware of any wound or dressing changes for the patient.

Corrective Action:
2(a)(b) The nursing staff will receive education on addressing medical issues on the treatment plan. The nurse managers or designee will monitor 100% of treatment plans to ensure medical issues are addressed for 90 days. Then ongoing 10% of all admissions.

2(d) The Nurse managers will meet with nursing staff to collaborate on a
process to ensure all medical problems are passed on during communication hand off. The process will be in place by 4/21/18. The nurse managers will audit one shift report 5 times per week for 30 days to ensure medical problems are reported on.

**Finding:**

1. On 12/06/17 at 10:35 AM, Surveyor #1 toured the food service area on the third floor. The following observations were noted:

   a. A heating table used for food service had visible debris on the food preparation and service areas. The interior surfaces of the heating area were covered in visible scale and rust. Reference: Washington State Retail Food Code, WAC 246-215-04600

   b. Surveyor #1 measured the temperature of the water from the warewashing machine using a plate simulating dishwasher tester (a thermometer specifically designed for testing warewashing temperatures). The thermometer read the water temperature as 148.7 degrees Fahrenheit. The warewashing machine is a stationary rack, dual temperature machine that requires a temperature of 150 degrees Fahrenheit. Reference: Washington State Retail Food Code, WAC 246-215-04545 (1) (b)

**Corrective Action:**

1. Food Service area:
   a. Interior surfaces have been added to the daily cleaning task list for the housekeepers.
   b. The third floor booster hot water tank was accidently switched off. Maintenance tested unit using a newly purchased dishwasher thermometer and verified temperatures met or exceed 150 degrees. Quarterly testing will be done and the switch has been shown to the staff using the facility to leave it in the “ON” position.

November 30, 2018

Terry McInerney
Navos
2600 SW Holden St
Seattle, WA 98126

Dear Ms. McInerney:

Surveyors from the Washington State Department of Health and the Washington State Patrol Fire Protection Bureau conducted a state hospital licensing survey at Navos on 12/6/17-12/7/17 and 2/6/18. Hospital staff members developed a plan of correction to correct deficiencies cited during this survey. This plan of correction was approved on 7/5/2017.

A Progress Report is due on or before 12/12/2018 when all deficiencies have been corrected and monitoring for correction effectiveness has been completed. The Progress Report must address all items listed in the plan of correction, including the WAC reference numbers and letters, the actual correction completion dates, and the results of the monitoring processes identified in the Plan of Correction to verify the corrections have been effective. A sample progress report has been enclosed for reference.

Please mail this progress report to me at the following address:

   Tyler Henning
   Department of Health, Investigations and Inspections Office
   P.O. Box 47874
   Olympia Washington, 98504-7874

Please contact me if you have any questions. I may be reached at 360-236-2918. I am also available by email at tyler.henning@doh.wa.gov.

Sincerely,

   Tyler Henning
   Survey Team Leader
