Rosario Strait
Annual Shellfish Growing Area Review

Prepared By: Kelly Curtis
Area: Rosario Strait
Year Ending: December 31, 2019
Classification: Restricted

Activities in the Growing Area in 2019
The growing area is classified for the subtidal harvest of scallops. Product harvested from the growing area was relayed to a grow-out site in Shoal Bay. The approved relay is effective year round.

Analytical Results of Water Samples
A marine station (101) is located in the growing area solely for the purposes of approving relay harvest activities. The station is not shown on the growing area map. No bacterial water samples are required from this station.

Change in Actual Pollution Sources that Impact the Growing Area
We currently have no information indicating that the area has new sources of pollution.

Classification Status
✔ Well within the classification standards
☐ Meets standards, but some concerns
☐ Meets standards, but threatened with downgrade in classification
☐ Fails to meet current classification standards

Remarks and Recommendations
The area meets the appropriate standards to be classified Restricted.
