<tr>
<th>Condition</th>
<th>Draft Changes</th>
</tr>
</thead>
<tbody>
<tr>
<td>The draft rule merges health care provider and health care facility sections, including the tables, to streamline the rules by removing redundant language.</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Acquired immunodeficiency syndrome (AIDS)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Airways disease due to specific organic dust</td>
<td>One of four new occupational respiratory diseases notifiable to the Department of Labor and Industries</td>
</tr>
<tr>
<td>Amoebic meningitis</td>
<td>New condition</td>
</tr>
<tr>
<td>Anaplasmosis</td>
<td>One of four conditions currently included in the definition of “other rare disease of public health significance”. The draft rule includes the four unique conditions individually and eliminates the definition and use of “other rare disease of public health significance”.</td>
</tr>
<tr>
<td>Animal bites (when human exposure to rabies is suspected)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Anthrax (Bacillus anthracis and confirmed Bacillus cereus biovar anthracis only – do not report all B. cereus)</td>
<td>Current notifiable condition. The draft rule adds Bacillus cereus biovar anthracis as an agent, and makes clarifying changes.</td>
</tr>
<tr>
<td>Arboviral disease, acute disease only including, but not limited to, chikungunya, dengue, eastern and western equine encephalitis, Japanese encephalitis, La Crosse encephalitis, Powassan virus infection, St. Louis encephalitis, West Nile virus infection, Zika virus infection</td>
<td>Current notifiable condition. The draft rule includes each condition under the category “arboviral disease” individually, and the category of “arboviral disease” is removed from the chapter.</td>
</tr>
<tr>
<td>Asthma, occupational</td>
<td>Current notifiable condition. The draft rule changes notification to Department of Labor and Industries rather than to the Department of Health.</td>
</tr>
<tr>
<td>Babesiosis (Babesia species)</td>
<td>One of four conditions currently included in the definition of “other rare disease of public health significance”. The draft rule includes the four unique conditions individually and eliminates the definition and use of “other rare disease of public health significance”.</td>
</tr>
<tr>
<td>Baylisascaris infection</td>
<td>New condition</td>
</tr>
<tr>
<td>Birth defects</td>
<td>Currently nine birth defects are notifiable conditions. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Botulism, foodborne, infant, and wound (Clostridium botulinum)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Brucellosis (Brucella species)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Burkholderia mallei (Glanders) and pseudomallei (Melioiosis)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule, including listing the two conditions individually rather than together.</td>
</tr>
<tr>
<td>Campylobacteriosis (Campylobacter species)</td>
<td>New condition for health care facilities. Currently notifiable by health care providers and laboratories.</td>
</tr>
<tr>
<td>Candida auris infection or colonization</td>
<td>New condition</td>
</tr>
<tr>
<td>Carbapenem-resistant Enterobacteriaceae infections limited to: Klebsiella species E. coli Enterobacter species</td>
<td>New condition</td>
</tr>
<tr>
<td>Chagas disease (Trypanosoma cruzi)</td>
<td>New condition</td>
</tr>
<tr>
<td>Chancroid</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Chlamydia trachomatis infection</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Cholera (Vibrio cholerae 01 or 0139)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
</tbody>
</table>
### Draft Changes to Health Care Provider and Health Care Facility Notification Requirements, Table HC-1

**WAC 246-101-101, Notifiable Conditions: Health Care Providers and Health Care Facilities**

**January 8, 2020**

<table>
<thead>
<tr>
<th>Condition</th>
<th>Notifiable Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coccidioidomycosis (<em>Coccidioides</em> species)</td>
<td>New condition</td>
</tr>
<tr>
<td>Coronavirus infection (severe communicable)</td>
<td>New condition</td>
</tr>
</tbody>
</table>
| SARS-associated coronavirus | The draft rule groups the new condition (MERS) with the current condition (SARS) under “coronavirus infection (severe communicable)”.
<p>| MERS-associated coronavirus | |
| <em>Cryptococcus</em> gattii or undifferentiated <em>Cryptococcus</em> species [i.e. <em>Cryptococcus</em> not identified as <em>C. neoformans</em>] | New condition for health care providers and health care providers. Currently notifiable by laboratories. |
| Cryptosporidiosis (<em>Cryptosporidium</em>) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Cyclosporiasis (<em>Cyclospora cayetanensis</em>) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Cysticercosis (<em>Taenia solium</em>) | New condition |
| Diphtheria (<em>Corynbacterium diphtheria</em>) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Domoic acid poisoning | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Echinococcosis (<em>Echinococcus granulosus</em> or <em>E. multilocularis</em>) | New condition |
| Ehrlichiosis (<em>Ehrlichia</em> species) | New condition |
| Emerging condition with outbreak potential | Removed from the draft rules. |
| Giardiasis (<em>Giardia duodenalis</em>, <em>Giardia lamblia</em>, <em>Giardia intestinalis</em>) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Gonorrhea (<em>Neisseria gonorrhoeae</em>) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Granuloma inguinale | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Gunshot wounds (nonfatal) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Haemophilus influenza (invasive disease, children under 5 years of age) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Hantaviral infections, including, but not limited to: Andes virus | Current notifiable condition. The draft rule expands the current notifiable condition from “hantavirus pulmonary syndrome” to the broader condition “hantaviral infections” and includes examples of hanta viruses related to the condition. |
| Bayou virus | |
| Black Creek Canal virus | |
| Dobrava-Belgrade virus | |
| Haantan virus | |
| Seoul virus | |
| Sin Nombre virus | |
| Hepatitis A (acute infection) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Hepatitis B (acute infection) | Current notifiable condition. Draft changes are limited to clarification of the current rule. |
| Hepatitis B, report pregnancy in hepatitis B virus infected patients (including carriers) | Current notifiable condition. Draft changes are limited to clarification of the current rule, including changing the name of the condition from “Hepatitis B surface antigen + pregnant women” to clarify that pregnancy is notifiable when related to hepatitis B infected patients. |
| Hepatitis B (chronic infection) – Initial diagnosis and previously unreported cases | Current notifiable condition. The draft rule changes the notification time frame from monthly to within three business days. |
| Hepatitis B (perinatal) – Initial diagnosis and previously unreported cases | Current notifiable condition. The draft rule includes Hepatitis B (perinatal) to clarify that perinatal cases of the current condition hepatitis B are notifiable. |
| Hepatitis C (acute infection) | Current notifiable condition. The draft rule changes the notification time frame from within three business days to within 24 hours. |
| Hepatitis C (chronic infection) | Current notifiable condition. The draft rule changes the notification time frame from monthly to within three business days. |
| Hepatitis C (perinatal) – Initial diagnosis, and previously unreported cases | Current notifiable condition. The draft rule includes Hepatitis C (perinatal) individually to clarify that perinatal cases of the current condition hepatitis C are notifiable. |</p>

<tbody>
<tr>
<td>Hepatitis D (acute and chronic infection)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Hepatitis E (acute infection)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Herpes simplex, neonatal and genital (initial infection only)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Histoplasmosis (<em>Histoplasma capsulatum</em>)</td>
<td>New condition</td>
</tr>
<tr>
<td>Human immunodeficiency virus (HIV) infection</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Human prion disease</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule, including changing the name of the condition from “prion disease”.</td>
</tr>
<tr>
<td>Hypersensitivity pneumonitis due to organic dust</td>
<td>New condition</td>
</tr>
<tr>
<td>Influenza, novel or unsubtypable strain (all other)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Influenza-associated death (laboratory confirmed)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Legionellosis (<em>Legionella species</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Leptospirosis (<em>Leptospira species</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Listeriosis (<em>Listeria monocytogenes</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Lyme disease (<em>Borrelia burgdorferi or Borrelia mayonii</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Lymphogranuloma venereum (<em>Chlamydia trachomatis</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Malaria (<em>Plasmodium species</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Measles (<em>Rubella</em>), acute disease only</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Melioidosis (<em>Burkholderia pseudomallei</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Meningococcal disease, invasive (<em>Neisseria meningitides</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Monkeypox</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Mumps, acute disease only</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Occupational traumatic injury hospitalization</td>
<td>New condition</td>
</tr>
<tr>
<td>Other rare disease of public health significance</td>
<td>Condition removed from the chapter. The four unique conditions previously included in the definition of “other rare disease of public health significance” are included in the draft individually.</td>
</tr>
<tr>
<td>Outbreaks and suspected outbreaks</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Paralytic shellfish poisoning</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Pertussis (<em>Bordetella pertussis</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Pesticide poisoning (hospitalized, fatal, or cluster)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Pesticide poisoning (all other)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Plague (<em>Yersinia pestis</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Pneumoconiosis</td>
<td>New condition</td>
</tr>
<tr>
<td>Poliomyelitis (<em>Poliovirus</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Psittacosis (<em>Chlamydia psittaci</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Q fever (<em>Coxiella burnetii</em>)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Rabies (confirmed human or animal)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Rabies, suspected human exposure due to a bite from or other exposure to an animal that is suspected of being infected with rabies</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Condition</td>
<td>Status</td>
</tr>
<tr>
<td>--------------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Relapsing fever (borreliosis)</td>
<td>Current notifiable condition. The draft rule changes the notification time frame from within 24 hours to within three business days.</td>
</tr>
<tr>
<td>Respiratory conditions due to inhalation of chemicals, gases, fumes, and vapors</td>
<td>New condition</td>
</tr>
<tr>
<td><em>[Rickettsia infection including but not limited to:]</em> Rickettsia rickettsii, Rickettsia africae, Rickettsia conorii, Rickettsia typhi, Rickettsia parkeri, Rickettsia philipii</td>
<td>One of four conditions currently included in the definition of “other rare disease of public health significance”. The draft rule includes the four unique conditions individually and eliminates the definition and use of “other rare disease of public health significance”.</td>
</tr>
<tr>
<td>Rubella, acute disease only (including congenital rubella syndrome)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Salmonellosis (Salmonella species)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Serious adverse reaction to immunizations</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Shiga toxin-producing E. coli infections/enterohemorrhagic E. coli infections</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Shigellosis (Shigella species)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Smallpox (Variola virus)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Syphilis (Treponema pallidum)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Taeniasis (Taenia solium or undifferentiated Taenia species [i.e. Taenia not identified as T. saginata])</td>
<td>New condition</td>
</tr>
<tr>
<td>Tetanus</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Tick paralysis</td>
<td>One of four conditions currently included in the definition of “other rare disease of public health significance”. The draft rule includes the four unique conditions individually and eliminates the definition and use of “other rare disease of public health significance”.</td>
</tr>
<tr>
<td>Trichinosis (Trichinella spiralis)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Tuberculosis disease (confirmed or highly suspicious, i.e., initiation of empiric treatment) (Mycobacterium tuberculosis)</td>
<td>Current notifiable condition. The draft rule changes the notification time frame from immediately to within 24 hours.</td>
</tr>
<tr>
<td>Tularemia (Francisella tularensis)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Typhus including: Scrub typhus, Epidemic typhus, Murine typhus</td>
<td>New condition</td>
</tr>
<tr>
<td>Vaccinia transmission</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Vancomycin-resistant Staphylococcus aureus (not to include vancomycin-intermediate)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Varicella-associated death</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Vibriosis (Vibrio species not including Vibrio cholerae 01 or 0139)</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Viral hemorrhagic fever</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Yellow fever</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Yersiniosis</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
<tr>
<td>Unexplained critical illness or death</td>
<td>Current notifiable condition. Draft changes are limited to clarification of the current rule.</td>
</tr>
