The Nursing Care Quality Assurance Commission (NCQAC) issues this advisory opinion in accordance with WAC 246-840-800. An advisory opinion adopted by the NCQAC is an official opinion about safe nursing practice. The opinion is not legally binding and does not have the force and effect of a duly promulgated regulation or a declaratory ruling by the NCQAC. Institutional policies may further restrict practice in that facility’s setting and/or impose additional requirements to assure patient safety and/or decrease risk.

**Title:** Delegation of Blood Glucose Monitoring to Nursing Assistants or Health Care Aides in Community-Based Settings

**Number:** NCAO 14.00

**Email:** NursingPractice@doh.wa.gov

**Effective Date:** 6-4-2017

**Supersedes:** Not Applicable

**Approved By:** Nursing Care Quality Assurance Commission

The Nursing Care Quality Assurance Commission determined it is within the scope of practice of an appropriately prepared and competent registered nurse (RN) to delegate to nursing assistant-registered (NA-R), certified-nursing assistant-certified (NA-C), or certified-home care aide (C-HCA) the following tasks in community-based settings:

- Pierce the skin to get a blood sample to measure blood glucose using a Clinical Laboratory Improvements Amendments (CLIA) Clinical Laboratory Improvements Amendments (CLIA) waived test to monitor treatment response and/or for administering medications for the treatment of diabetes.
- Give insulin injections and non-insulin injections, such as exanatide (Byetta®, liraglutide (Victoza®, dulaglutide (Trulicity®), and albiglutide (Tanzeum®), approved by the Food and Drug Administration (FDA) and prescribed with similar purpose and effect for treatment of diabetes.

**RCW 18.79.260** allows registered nurses to delegate to a Washington State NA-R, NA-C, or C-HCA blood glucose monitoring and insulin injection in community based settings. The definition of community-based settings includes:

- In-home care settings,
- Adult family homes
- Assisted living facilities

For persons with disabilities, this document is available on request in other formats. To submit a request, call 1-800-525-0127 (TDD/TTY 711)
Community residential programs for people with developmental disabilities certified by the Washington State Department of Social and Health Services.

**RCW 18.79.260** prohibits delegation of any activity that requires piercing or severing of the tissues, with the exception of insulin injection in community-based settings. The laws and rules do not define the term, “monitoring” used in the laws and rules. The commission determined that “monitoring” includes performing a Clinical Laboratory Improvement Amendments (CLIA)-waived blood glucose test involving puncturing of the skin, and that this activity is an exception to the law.

Prior to delegating performing a CLIA-waved blood glucose test, the delegating RN must:

- Evaluate the appropriateness of the delegation,
- Verify completion of the “Fundamentals of Caregiving”, the “Core Nurse Delegation Program”, and the “Diabetic Training Program” through the Washington State Department of Social and Health Services (DSHS), and
- Teach the individual about proper injection procedures and the use of insulin, demonstrate proper injection procedures,
- Supervise and evaluate the NA-R, NA-C, or C-HCA weekly during the first four weeks of delegation of insulin injections. If the delegating RN determines that the individual is competent to perform the injection properly and safely, supervision and evaluation shall occur at least every ninety days.
