## Empanelment

As a first step in transforming to a value-based payment model, clinics must know the patient population that they are responsible for. Practice Facilitators are assisting enrolled clinics in sorting EHR patient lists to remove patients who have aged out of the clinic, moved, or who have not been in for a visit in the last 2 years. When that process is complete, Practice Facilitators are working with Molina and other Managed Care Organizations (MCOs) along with clinic staff to identify assigned patients who are not in the electronic health record. The goal is put a process in place that maintains accurate panel lists for providers.

## Success Stories from the Practice Facilitators

“Using the Molina panel of patients for Northwest Spokane Pediatrics I created tabs showing which patients are adults, out of area, or overdue for well child visits. The adults and out of area patients will be sent to Molina for updating. The next steps include doing a PDSA with this clinic on their plan to reach out to patients overdue for well child visits.”  
Reese Holford, Practice Facilitator

“Kitsap Children’s Clinic was sent the algorithm to determine number of patients per provider panel. By the time I came for the meeting to assist, the manager had already used the algorithm and was working on the predictions for 2017. She also helped me with learning how to run a report for the Healthy Futures Clinic who has the same EHR. I took the information to Healthy Futures on Wednesday and showed them how to run the report, and also gave them the algorithm for empanelment.”  
Karen Pastori, Practice Facilitator

## From Accountable Communities of Health (ACH) Regions

The Pierce County ACH has reached out to P-TCPI to better understand how we can support its regional improvement projects. P-TCPI staff are attending the Provider Integrated Panel meetings to increase our understanding of how Pierce County ACH is going about the business of practice transformation, and with that, how P-TCPI can meet the needs of this ACH’s practice transformation strategy.

## Behavioral Health Conference - Vancouver

Our North Sound physician champion, Dr. Francie Chalmers, presented her experience with our Behavioral Health Memorandum of Agreement (MOA). The MOA simply states that a behavioral health provider and primary care provider agree to work together on their communication and referral processes. Dr. Chalmers spoke about how the MOA has enabled her clinic to address barriers with referrals to a nearby behavioral health clinic, which has helped both clinics follow through on the appropriate care for their patients. Our partner WCAAP presented the P-TCPI Behavioral Health Toolkit (http://pediatrictcpi.org/bhi/), which includes a template and information about how to start an MOA with enrolled clinics.

## Upcoming Events/Training

- Behavioral Health: Managing ADHD & Antipsychotic Medication in Primary Care: July 6 – North Central ACH Region – 6-8pm
- Behavioral Health Managing ADHD & Antipsychotic Medication in Primary Care: July 12 – Southwest ACH Region – 6-8 pm
- Patient and Family Engagement Webinar: July 18, 2017 at 7am – All Regions
- Improving Well Child Care – Replicable Techniques from a High Performing Clinic Webinar: July 25, 2017 at 7am – All Regions
- P-TCPI Learning Forum 2017: September 29, 2017 - SeaTac, WA
