Notes:

- Caucasian includes White and undisclosed race.
- Veterans include all individuals who have served in a branch of the military.
- The "Disabled Veterans" definition in WAC aligns with the "Special Disabled Veterans" Federal interpretations and guidelines. Effective with the "As of 6/30/2015" report, the civilian workforce availability benchmark has been realigned to better reflect this definition.
- Utilization: how much the state agency workforce reflects the diversity of the Washington state population doing similar work.
- The state of Washington is committed to an inclusive environment where all employees are treated with respect, are valued, and have the opportunity to contribute to their fullest potential.
- Diversity, equal employment opportunity, and affirmative action are key to creating an inclusive work environment.

sort and data dates to the left. Make sure there's a copy of the formula in column A for every row of data

new codes and add them to the job group criteria. #N/A in the Job Group column (column A) indicates job group data and data with # as job code. For remaining #N/A rows (Job Clas Codes have no letters in them), each field/column of data has a header name in row 9 that matches the text in row 7. This assures the for

database named range "HRMSData" includes entire set of data. DONE - 6. Update AgencyByJobGroup worksheet total workforce formulas on the Utilization tab, first section, are set to the correct data (column) position

ACS = Ame

Data acces:

**The "Disabled Veterans" definition in WAC aligns with the Federal interpretations and guidelines for "Sp availability, we will use Veterans with 30% or more disability rating to best reflect this population.

**Definition of Special Disabled Veteran:

A person who is entitled to compensation under laws administered by the U.S. Department of Veteran Affairs for disability (A) rated at 30 percent or more, or (B) rated at 10 or 20 percent in the case of a veteran who has been determined by the Department of Veteran's Affairs to have a serious employment handicap, or (C) a person whose discharge or release from active duty was for a disability incurred or aggravated in the line of duty. Applicant must provide a letter from the Department of Veteran's Affairs Secretary confirming employment handicap as it relates to item (B).

7/30/14 - Mark Sullivan, Ann Reiter, and Chanin Kelly-Rae approve use of Census 30% and above disability rating data as the benchmark for the Special Disabled Veteran group that most closely benchmarks our RCW definition.

Notes:

Key element for B) - "determined by the DVA to have a serious employment handicap". Community knowledge indicates persons with a 10-20% rating AND a serious employment handicap are a small part of the disabled veteran population.

Key element for C) - "discharged or released from active duty" due to disability. Community knowledge indicates the percent who are separated from service due to a disability are currently a small part of the veteran population.

Census data includes all veterans with a disability rating - regardless of "serious employment handicap" or "discharge or release from active duty"

June and December 2013 reports:

2009-2011 American Community Survey 3-Year
Estimates

Supporting documentation on code lists,
subject definitions, data accuracy, and
statistical testing can be found on the
American Community Survey website in the
Data and Documentation section.

Sample size and data quality measures
(including coverage rates, allocation rates,
and response rates) can be found on the
American Community Survey website in the
Methodology section.

Although the American Community Survey
(ACS) produces population, demographic
and housing unit estimates, it is the Census
Bureau's Population Estimates Program that
produces and disseminates the official
estimates of the population for the nation,
states, counties, cities and towns and
estimates of housing units for states and
counties.

Not in labor force	903,914	+/-7,608

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2009-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions

of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2009-2011 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.

frican Community Survey

sed from PUMS to include all veterans age 16 and above.

pecial Disabled Veterans". For WA civilian laborforce

Careers.wa.gov

<http://careers.wa.gov/AffirmativeActionDefinitions.html>

Special Disabled Veteran – A person who is entitled to compensation under laws administered by the U.S. Department of Veterans Affairs for disability (a) rated at 30 percent or more, (b) rated 10 or 20 percent in the case of a veteran who has been determined by the U.S. Department of Veterans Affairs to have a serious employment handicap or (c) a person whose discharge or release from active duty was for a disability incurred or aggravated in the line of duty. Applicant must provide letter from the U.S. Department of Veterans Affairs confirming handicap status as it relates to item (b).

WAC definition:

<http://www.census.gov/hhes/veterans/about/definitions.html>

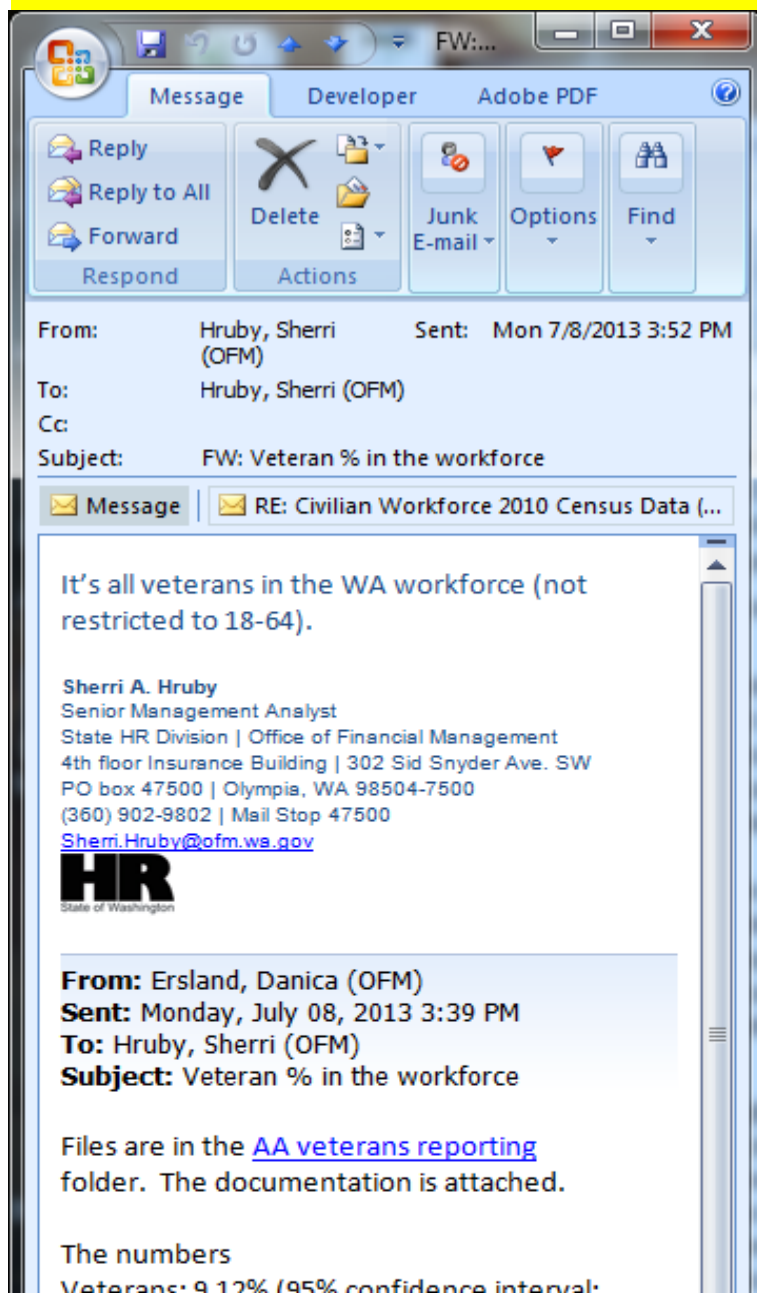

What is a service-connected disability rating? [back to top](#)

The Department of Veterans Affairs evaluates veterans with a variety of disabling conditions after they are discharged from military service. A "service-connected" disability means the disability was a result of a disease or injury incurred or aggravated during military service. The VA uses the Schedule for Rating Disabilities in Title 38, U.S. Code of Federal Regulations. These ratings are graduated according to degrees of disability on a scale from 0 to 100 percent, in increments of 10 percent. The ratings determine the amount of compensation payments made to the veterans. A zero-rating, which means having no rating at all, means a disability exists but it is not so disabling that it entitles the veteran to compensation.

Service-connected disability ratings are not necessarily correlated with having a disability, as defined by the ACS. Veterans can receive a service-connected disability rating for a variety of conditions. Caution should be used when correlating the two concepts using ACS data.

For more information about service-connected disability status and ratings, see [Evaluation of New Content on the African American Community Survey: Service-Connected Disability Status and Ratings](#) [PDF - 148K] and [Evaluation Report Covering Service-Connected Disability](#) [PDF - 395K]

7/8/13 Decision: Instead of this data, use PUMS to get veterans in the civilian labor force, since that allows us to include workers in the 65 and older age range. PUMS data shows there are still a number of veterans age 65 or older who are in the labor force.

Veterans: 9.12% (95% confidence interval: 8.92% – 9.33%)

Vietnam Veterans: 3.31% (95% confidence interval: 3.20% - 3.42%)

Disabled Veterans: 1.34% (95% confidence interval: 1.26% - 1.41%)

2010 EEO Occupation Description		2010 EEO Occupation Code	2010 SOC Code(s)	OPM Code(s)	Federal Sector Job Group (9)	EEO-1 Job Category (9)	EEO Occupational Group (14)	State & Local Government Job Group (8)
Unemployed:								
Unemployed, no work experience in the last 5 years or most recent job was in a military-specific occupation		9920 (Note 3)	Combines: 55-0000 and no SOC equivalent			U	U	U
Notes:								
1.	Census Codes 3255, 3256, and 3258 are cross-classified with OPM Code 610.							
2.	Due to the U.S. Census Bureau's Disclosure Review Board requirements, any occupational category containing fewer than 10,000 people employed nationwide cannot be shown separately and must be combined with related occupational categories to create aggregates containing 10,000 or more people. As a result, SOC occupations 45-2021, 47-5081, and 51-4192 could not be cross-classified into more accurate EEO job categories.							
3.	Code 9920 includes people who are 16 years old and over who are unemployed but have no work experience in the last 5 years; people who have never worked but are looking for work; and people who have worked in the last 5 years but whose last job was in a military-specific occupation and are now looking for work. Code 9920 is only included in the residence tables and not included in the worksite or worksite/residence tables.							
#	This particular OPM cross-classification is limited to specific agencies only, and is not for general use by federal agencies not expressly authorized by EEOC to do so.							
*	This OPM cross-classification was changed after the EEO Tabulation was already computed for production. The following list documents all of those changes. Users should add or subtract relevant EEO detailed occupation data to adjust the Federal Sector job groups accordingly.

EEO-ALL02R

EEO 2r. Detailed Census Occupation by Sex, and Race/Ethnicity for Residence Geography, Total Population

Universe: Civilian labor force 16 years and over

The EEO Tabulation is sponsored by four Federal agencies consisting of the Equal Employment Opportunity Commission, the Department of Justice, the Department of Labor, and the Department of Health and Human Services.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to calculate a margin of error.
 An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to calculate an estimate.
 An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
 An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
 An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution.
 An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for significance was conducted and the result was not significant.
 An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be determined.
 An '(X)' means that the estimate is not applicable or not available.

The U.S. Census Bureau collects race data in accordance with guidelines provided by the U.S. Office of Management and Budget.

Race and Hispanic origin are separate concepts on the American Community Survey. "White alone, not Hispanic or Latino" and "Hispanic or Latino" are the two race categories used in the survey.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is indicated by the margin of error.
