In accordance with WAC 246-290-120(5), a **Construction Completion Report Form** is required for all approved construction projects. Purveyors **must** submit a Construction Completion Report to the Department of Health (DOH) within sixty (60) days of completion and before use of any water system facility. This includes any storage tank and booster pump facilities reviewed under the submittal exception process as provided by WAC 246-290-125(3). Under the submittal exception process for other distribution-related facilities (including distribution main projects), designed by a professional engineer but not submitted to DOH for approval, the report does not need to be submitted. However, the purveyor **must** keep the Construction Completion Report on file and make it available for review upon request by DOH in accordance with WAC 246-290-125 (2)(b) and WAC 246-290-125(3)(f).

Furthermore:

1. The report form **must** bear the seal, date and signature of a professional engineer (PE) licensed in the state of Washington;
2. If project construction is being completed in stages, attach a description of the portion of the project being completed as approved that is acknowledged by a PE on the date given below;
3. As future portions of staged construction projects are completed, each **must** be acknowledged by a PE; and
4. Per WAC 246-290-120(5)(c), the amount of change in the physical capacity of a system must be documented, if the project results in a change in physical capacity.

Please type or print legibly in ink:

_____________________________________  DOH System ID No.:__________________

Name of PE Shown as Review Engineer

DOH Form 331-146 (Updated 08/10)
Project Name and Descriptive Title:
Check one:
☐ Entire Project Completed.  ☐ Description of Portions Completed.
Complete (Attach additional sheets as needed):

Professional Engineer’s Acknowledgment

The undersigned professional engineer (PE), or their authorized agent, has inspected the above-described project which, as to layout, size and type of pipe, valves and materials, reservoir and other designed physical facilities, has been constructed and is substantially completed in accordance with construction documents reviewed by the purveyor’s engineer or approved by the DOH. In the opinion of the undersigned engineer, the installation, physical testing procedures, water quality tests, and disinfection practices were carried out in accordance with state regulations and principles of standard engineering practice.

I have reviewed the disinfection procedures ☐, pressure test results ☐, and results of the bacteriological test(s) ☐ for this project and certify that they comply with the requirements of the construction standards/specifications approved by the DOH. (Check all boxes that apply that are consistent with the nature of the project.)

This project changes the physical capacity of the system to serve consumers. The system is now able to serve __________ equivalent residential units (ERUs.) ☐ Not applicable

Name of Engineering Firm**

Name of PE Acknowledging Construction

Mailing Address**

City State Zip**

Engineer’s Signature Date

**Complete if PE acknowledging construction completion is not employed directly by water system.

Please return completed form to DOH regional office checked below if the project is for new storage tanks or booster pump stations. For all other distribution related projects, please maintain on file.
