You may know more than you realize

You’ve learned a lot and have great work experience from working in the military. Some of those skills are just what you need to be a drinking water or wastewater operator.

Experience in water treatment, distribution, reverse osmosis or desalination, sewage treatment, storage, and pretreatment, are directly applicable skills for a drinking water or wastewater operator.

Reasons for you to become a certified operator

Certified drinking water and certified wastewater jobs offer:

- Long-term professional employment.
- Good pay and benefits.
- On-the-job training and internships.
- Advancement.
- Team work and opportunity to work independently.
- The chance to become highly skilled in areas such as mechanics, electrical work, mathematics, biology and chemistry.

Drinking water and wastewater operators help maintain public and environmental health. Wastewater operators are the front line workers to ensure water is safe for the public and environment. Operators guarantee this by making sure water their communities use is free of all contaminants before it returns to the environment.

Drinking water operators run equipment to manage the process of producing safe, reliable drinking water. Water operators maintain and repair important water system infrastructure like pipes, pumps, controls and generators that are used to produce water for homes and communities.

Wastewater (Operator-in-Training)
- High school diploma or GED.
- Three months operating experience.

Or
- Three relevant continuing education units (CEU) or college credits.
- Pass a written exam.

Training opportunities

Many states offer “in-training” drinking water and wastewater operator certification exams. Passing these exams demonstrates your basic understanding and competency to potential employers. As you advance in your career, there are progressing levels of certification that take into account overall experience.

Water Sector Training
In Washington, five training entities specialize in water/wastewater training:

- Evergreen Rural Water of Washington (ERWOW) in Shelton, WA [www.erwow.org](http://www.erwow.org)
- Rural Community Assistance Corporation (RCAC) offices statewide [www.rcac.org](http://www.rcac.org)
- Washington Environmental Training Center (WETRC) at Green River Community College in Auburn, WA [www.wetrc.org](http://www.wetrc.org)
- Environmental Sciences Department of Water Resources at Spokane Community College in Spokane, WA [www.scc.spokane.edu](http://www.scc.spokane.edu)
- Environmental Conservation Department at Skagit Valley College in Mount Vernon, WA [www.skagit.edu](http://www.skagit.edu)

To learn more about drinking water and wastewater operator career opportunities, visit the following websites:
- American Water Works Association [www.awwa.org](http://www.awwa.org)
- Association of Boards of Certification [www.abccert.org](http://www.abccert.org)
- Pacific Northwest Clean Water Association [www.pncwa.org](http://www.pncwa.org)
- Rural Community Assistance Partnership [www.rcac.org](http://www.rcac.org)
- Water Environment Federation [www.wef.org](http://www.wef.org)

Things you can do before leaving the military
- If you can, get your military experience and training converted to college credits.
- Get any operating experience in drinking water or wastewater documented by your superiors.
- Make a declaration of employment for each duty station prior to leaving the station.
- Save your military evaluations. Many types of experience could be relevant to job opportunities in the water sector.
