CHECK YOUR PERFORMANCE

Things to Know
To start the process of checking your performance, meet with your practice facilitator to go over your HEDIS utilization report. Is there anything that surprises you? Where do you want to improve? What are your next steps? Perhaps it has been six months since your last Practice Assessment Tool (PAT), perhaps you want to revisit your aim statement. It’s time to make an appointment with your Practice Facilitator to check in on your quality improvement work.

To know and understand your data, remember:
- You will receive quarterly data reports and your Molina representative can help you answer any questions.
- We have regular trainings via GoToMeeting to help you understand how to read your data reports.
Frequently Asked Questions:

What if my data from Molina doesn’t match what my EMR says?

This process can be helped with empanelment and your practice facilitator and Molina representative can help you understand any discrepancies.

How often do I need to do a Practice Assessment Tool (PAT)?

You are expected to complete a PAT every 6 months.

The PAT takes time away from my practice, is there any compensation available?

You will receive a stipend that is dependent on the number of clinicians in your practice each time you complete the PAT.

REMEMBER
Your practice facilitator is here to help you during any step in the process.
