| Human Resources, Staffing, Communication, Leadership | 6. Enhance staffing support at the critical time of sponge counting when required | Surgical Services  
- Nursing Director  
- Nursing Manager  
- Assistant Nurse Manager  
- Charge RN  
- Staff | Review facilitator role to prioritize support and assistance for sponge counting  
- Written “Guidelines for Facilitators” completed (date)  
- Surgical Services Nursing Leadership to develop communication and education plans for revised “Guidelines for Facilitators” | Strategy: Surgical Services Nursing Leadership and RN staff to develop written guidelines for facilitators  
Type of Measurement: Guidelines completed and implemented  
Target for Completion: (date) |
| Multiple competing demands at the critical time of sponge counting |  |  |  |  |
| Human factors, communication | 7. Update and implement the Surgical Services Policy and Sponge Counting Procedure to assure compliance to the following points:  
- If the count is incorrect, the patient remains under anesthesia and the attending surgeon stays in the OR until a satisfactory radiograph is performed. (A satisfactory radiograph includes an image of the entire peritoneal cavity, thoracic/pleural cavity, or operative filed in non-body cavity surgery.)  
- The surgeon collaborates with the radiology technician regarding x-ray plate placement to assure adequate coverage of the operative filed. (Adequate | Surgical Services:  
- Nursing Director  
- Nursing Manager  
- Associate Medical Director, Surgery  
- Associate Medical Director and Chief of Anesthesia  
- Patient Safety Officer | Review of literature to determine best practices  
- Group of clinical experts from Radiology and Surgical Services met to prepare recommendations for the Surgical Services Steering Committee (date)  
- Present recommendations to the Surgical Services Steering Committee (attachment, and date); the recommendations were approved and assigned to a physician champion for policy revision  
- Present new policy to OR RN, scrub technician and anesthesia Continuous Quality Improvement Teams (date)  
- Implement revised Surgical Services Policy and Sponge Count Procedure (date) | Strategy: Evaluate compliance to new policy regarding x-ray procedure for all cases with incorrect sponge and instrument counts  
Type of Measurement: Audit of event reports/all cases that have reconciled sponge and instrument counts by RN staff  
Sample Size: 100% of total reconciled count cases  
Duration: 3 months  
Target for Compliance: 100% of audits reveal compliance with new policy |
