Planned Parenthood Columbia Willamette (PPCW) receives funding through Title X, the only federal grant program devoted solely to family planning and related preventive health services with a focus on low-income and uninsured persons. Title X and Washington State funds pay for services such as breast and pelvic exams, Pap smears and other cancer screenings, HIV testing, pregnancy testing and counseling, and affordable birth control, including long acting reversible contraception (LARC). PPCW works with Washington State Department of Health to assure quality and affordable reproductive health services at its clinic in Clark County.

In 2016 PPCW served 3,358 clients during 4,530 clinic visits, representing a 132% increase in clients and an 27% increase in clinic visits compared to 2015. A majority of these clients (2,591 individuals or 77% of all clients) were at or below 138% of the federal poverty level. An estimated 84% of female clients of reproductive age served in 2016 were on some form of contraceptive method resulting in lower risk of unintended pregnancy, unplanned births, and abortions.

Title X services provided by PPCW prevented an estimated* 810 unintended pregnancies and 280 abortions, and saved over $5M in health care costs in 2016 alone

PPCW's Title X services averted unwanted reproductive health outcomes and saved healthcare-related expenses by providing contraceptive services, testing and treatment for sexually transmitted infections, and vaccination against HPV to prevent cervical cancer. Most notably, in 2016 the agency's services prevented an estimated 810 unintended pregnancies, 400 unplanned births, and 280 abortions resulting in net savings of over $5.3 million associated with maternal and birth-related care, miscarriages, ectopic pregnancies, and abortions averted.

Planned Parenthood of Columbia Willamette (PPCW) receives funding through Title X, the only federal grant program devoted solely to family planning and related preventive health services with a focus on low-income and uninsured persons. Title X and Washington State funds pay for services such as breast and pelvic exams, Pap smears and other cancer screenings, HIV testing, pregnancy testing and counseling, and affordable birth control. PPCW operates its clinic in Clark County.

The need for Title X services continues
Access to quality, affordable reproductive health care services such as those provided through Title X-funded health care providers are critical to meeting reproductive health needs of women in their service areas. Although PPCW serves women and men in its service area, there continues to be a great need for quality affordable reproductive health services. Measures of the need for reproductive health services include rates of unwanted reproductive health outcomes such as unintended pregnancy and rates of chlamydia and gonorrhea.

Clark County’s chlamydia and gonorrhea rates were slightly lower than the state annual rates in 2011-2015. The unintended pregnancy rate was also lower in Clark County compared to the state rate. The mini-graphs in each column display the rates of chlamydia and gonorrhea between 2011 and 2015 with the lighter blue bar indicating the highest rate during that period.

Another measure of need for reproductive health services is the estimated proportion of women in need of publicly funded reproductive health services. Women under the age of 20 years of any income and women between 20 and 44 years at or below 250% of the federal poverty level are categorized as women in need of publicly funded reproductive health services. The graph below shows the total number of women between the ages of 13 and 44 years who are in need of publicly funded contraceptive services in Clark County, where PPCW provides reproductive health care services.
