

HPV Vaccine Forecast

As of January 20, 2023, the Washington Immunization Information System accommodates the recommendation for the administration of the Human Papillomavirus (HPV) vaccine series starting at age 9.

The [Certificate of Immunization Status \(CIS\)](#) will show HPV vaccines as ‘Recommended Vaccines (Not Required)’ for patients ages 9 and older.

Patient					
Name:		SEA SHELL		SIIS Patient ID: 11841021	
Date of Birth:		03/25/2015		Age: 9 yrs	
Guardian:				Organization Level Status: Active

📅 Vaccination Forecast					
The forecast automatically switches to the catch-up schedule when a patient is behind schedule.					
Vaccine Group		Forecasted Dose	Recommended Date	Minimum Valid Date	Overdue Date Status
HPV		1	03/25/2024	03/25/2024	04/21/2028 Due Now

For additional information see: [Vaccination Summary & Forecast](#).

Please reference [Adding, Editing & Deleting Vaccinations](#) for instructions on entering and updating immunization records in the WAIS.

The [Coverage Rate Report](#) is a useful tool to monitor immunizations rates for your clinic. This report allows you to measure your clinic’s HPV immunization rates (# and % of patients who are up to date) and obtain lists of patients who are due for the HPV vaccine.

For instructions on running the Coverage Rate Report for the HPV 2 dose series for age 9-10 years in the WAIS watch this short video: [Coverage Rate Report Guidance for Clinics](#).
