## Executive Summary

The Department of Health (department) is required per [RCW 70.170.060](#) to provide annual updates to the public on the status of charity care provided by hospitals in Washington State. Hospitals are required to develop a charity care policy, and to submit financial data regarding charity care to the department. This report summarizes the charity care data provided by Washington hospitals for the hospital fiscal year (FY) ending in 2022.

Hospitals reported an increase in charity care in FY 2022. Based on a cost-to-charge ratio, Washington hospitals reported actual expenses of \$424.1 million for charity care.<sup>1</sup> These charges reflect an increase of 33 percent from those reported in FY 2021.

---

The amount of money hospitals spent on charity care services in Washington varied widely with the median amount across all hospitals at \$1.23 million; however, the average was more than three times higher at \$4.12 million.

---

[View](#) more information on charity care, including detailed reports by hospital.<sup>2</sup>

---

<sup>1</sup> Since the data in this report are based on billed charges, not the actual payment expected by the hospital, the approximate cost of providing charity care can be estimated by applying a cost-to-charge ratio. Multiplying the dollars by the cost-to-charge ratio results in an approximate cost of what hospitals actually spent providing this service to patients. The statewide cost-to-charge ratio is 0.374. Based on the \$1.134 billion reported in charity care charges in FY 2022, the overall cost of providing charity care statewide was about \$424.1 million.<sup>2</sup> <https://doh.wa.gov/data-statistical-reports/healthcare-washington/hospital-and-patient-data/hospital-patient-information-and-charity-care>

<sup>2</sup> <https://doh.wa.gov/data-statistical-reports/healthcare-washington/hospital-and-patient-data/hospital-patient-information-and-charity-care>

# Background on charity care in Washington

## What is charity care?

Charity care is defined in chapter [70.170 RCW](#) as “medically necessary hospital health care rendered to indigent persons when third-party coverage, if any, has been exhausted, to the extent that the persons are unable to pay for the care or to pay deductibles or coinsurance amounts required by a third-party payer, as determined by the department.” Washington law prohibits hospitals from denying patient access to care based on inability to pay or adopting admission policies that significantly reduce charity care.

In 2022, legislation modified the requirements of hospital-based charity care. For care provided on or before June 30, 2022, patients with family incomes below 100 percent of the federal poverty guidelines receive hospital services at no cost. Hospitals must also provide discounted care to patients between 100 and 200 percent of the poverty guidelines using a sliding scale.

For care provided on or after July 1, 2022, Washington hospitals are placed in one of two tiers and must provide discounts corresponding to each tier. Tier 1 hospitals provide patients with incomes up to 200 percent of the federal poverty guidelines services at no cost and patients between 200 and 300 percent of the poverty guidelines receive care at a discount. Tier 2 hospitals provide patients with incomes up to 300 percent of the federal poverty guidelines services at no cost and patients between 300 and 400 percent of the poverty guidelines receive care at a discount. Appendix 2 of this report provides a listing of hospitals by tier.

These are the minimum requirements. Hospitals may extend free or discounted care to patients earning more than these levels, and many do. The charity care policies for each hospital in Washington may be found [here](#).<sup>3</sup>

## What is the role of the Department?

The Charity Care Program (program) at the department is charged with monitoring financial data reporting and enforcing charity care regulations at acute care and psychiatric hospitals. Financial data is received and made publicly available via website posting to increase transparency and public understanding of health care costs. The program reviews hospital charity care policies and practices to ensure hospitals comply with the law. In addition, the program assists hospital staff with understanding and compliance of both financial and charity care requirements and assists patients seeking charity care.

## What are hospitals required to report and when?

Hospitals are required by law to submit charity care policies to the department for review at least 30 days before policies are adopted. Additionally, hospitals report the number of charity

---

<sup>3</sup> <https://doh.wa.gov/data-statistical-reports/healthcare-washington/hospital-and-patient-data/hospital-policies>

care applications submitted and completed, as well as approved for each quarter. Hospitals are also required to submit quarterly and year-end financial reports to the department using a uniform system of accounting. The department uses these financial reports to report charity care data and trends for the state each year. Fiscal years vary among hospitals in Washington, with hospital fiscal years ending on March 31, June 30, September 30, or December 31.

Hospitals are required to report total patient services revenue, also called billed charges, and the amount of patient services revenue that is written off as charity care. Hospitals are also required to report bad debt. Bad debt is different from charity care and is defined as uncollectible amounts, excluding contractual adjustments, which arise from failure to pay by patients whose care has not been classified as charity care. All of this data is reported as part of the hospital's year-end financial report.

Hospitals report financial data to the department on an income statement. Below is an abbreviated example of an income statement to illustrate the relationships between the various revenue sources and expenses.

<b>Hospital: Sample Community Hospital</b>	<b>Comment</b>	<b>Sample Hospital Revenue</b>
= TOTAL PATIENT SERVICES REVENUE	Inpatient and outpatient revenue equivalent to Total Billed Charges	615,000,000
- Provisions for Bad Debt	Unpaid charges billed to patient who are not eligible for Charity Care, deducted from total revenue	(15,000,000)
- Contractual Adjustments	Reductions from billed charges negotiated by insurance companies, deducted from total revenue	(350,000,000)
- Charity Care	Unpaid charges billed to patient eligible for charity care, deducted from total revenue	(25,000,000)
<b>=NET PATIENT SERVICE REVENUE</b>	Actual patient revenue received	225,000,000
<b>+ OTHER OPERATING REVENUE</b>	Actual revenue received for office rental, cafeteria income, etc.	10,000,000
<b>= TOTAL OPERATING REVENUE</b>	Actual patient revenue and other operating expenses	235,000,000
<b>-TOTAL OPERATING EXPENSES</b>	Total expense for operating the hospital	(220,000,000)
<b>= NET OPERATING REVENUE</b>	Cash remaining after operation of patient services	15,000,000
<b>+/- NON-OPERATING-NET OF EXPENSES</b>	Nonpatient revenue (investments, partnership fees)	5,000,000
<b>= NET REVENUE BEFORE ITEMS LISTED BELOW</b>	Operating plus nonoperating remainder	20,000,000
<b>+/- EXTRAORDINARY ITEM</b>	One time cash revenue or cash expenses	0
<b>= NET REVENUE OR (EXPENSE)</b>	Net cash remaining after all transactions	20,000,000

## How do hospitals report charity care and how is it calculated?

The amount of charity care reported by hospitals is based on patient services revenue, known as billed charges. These charges are based on the hospital's charge master rate sheet, which sets the price for every treatment and supply category a hospital uses. Every patient's total bill is comprised of the sum of the charge master rates of the various services or supplies used during the stay before any adjustments based on insurance status. All patients, regardless of insurance status, receive the same billed charges for the same services.

The billed charges reflect a markup that varies among hospitals and is higher than the amount the hospital actually expects to be paid. Medicaid and Medicare pay a set rate for services regardless of billed charges, and private insurance companies negotiate with hospitals for large discounts off the master rate sheet.

Charity care is the amount of billed charges an indigent patient incurs for medically necessary hospital health care. Since these charges include the markup, the dollar amount of charity care reported by hospitals overestimates the true cost of providing charity care to indigent patients. To estimate the true cost of providing charity care, the department applies a cost-to-charge ratio. The formula is total operating expenses (the actual cost of running the hospital and providing services) divided by total patient services revenue (billed charges).

Adjusted patient services revenue is the amount of revenue for non-Medicare and non-Medicaid payers, which includes private insurance and self-pay. The proportion of patients covered by Medicare or Medicaid varies widely among hospitals. The use of adjusted patient services revenue allows for a comparison of hospital charity care as a percent of privately sponsored patient revenue.<sup>4</sup>

## 2022 Washington state charity care data

### Statewide charity care charges for hospital fiscal year 2022

This report describes data collected from licensed Washington hospitals for their fiscal years (FY) ending in 2022. FY 2022 includes data for the 12 months prior to the end of each hospital's fiscal calendar, including data for months in 2021 if the fiscal year starts prior to January 1, 2022.

---

<sup>4</sup> Adjusted patient services revenue subtracts Medicare and Medicaid specific patient services revenue from total patient services revenue to allow meaningful comparisons of charity care provided among hospitals. The federal Centers for Medicare and Medicaid Services (CMS) prohibits hospitals from billing patients for the difference between the billed charges and the Medicare or Medicaid payment levels set by CMS. Therefore, patients covered by Medicare or Medicaid can't be charity care patients. The proportion of patients covered by Medicare or Medicaid varies widely among hospitals.

All charity care data for FY 2022 were due to the department by June 29, 2023. Ten hospitals still have not provided data for their 2022 fiscal year; 93 of 103 hospitals reported charity care information in year-end financial reports. Of the ten hospitals that did not submit year-end reports, we have provided the annual financial estimates for eight hospitals based on their quarterly financial reports or audited financial statements. For two other hospitals, no charity care data is available because no FY 2022 financial reports were submitted to the department (Table 1).

**Table 1.** Washington Hospitals That Did Not Submit Year-End Financial Reports, Fiscal Year 2022.

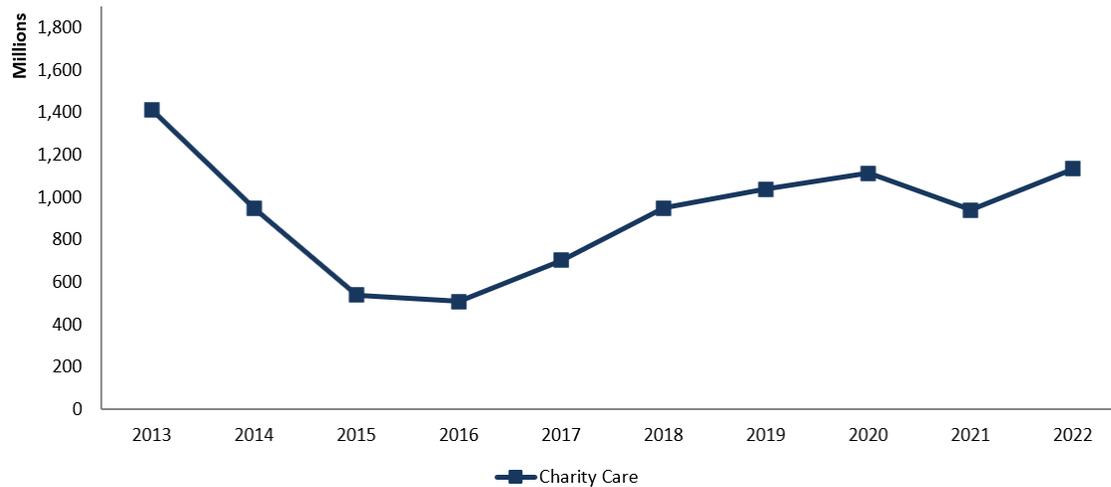

Lic. No	Hospital	Lic. No	Hospital
39	Trios Health	167	Ferry County Memorial Hospital*
79	Ocean Beach Hospital	195	Snoqualmie Valley Hospital
111	East Adams Rural Hospital	213	CHI/Franciscan Rehabilitation Hospital
148	Kindred Hospital Seattle*	924	US Healthvest/Smokey Point Behavioral Hospital
156	WhidbeyHealth	928	US Healthvest/South Sound Behavioral Hospital

\* Did not provide either year-end or quarterly financial data

Hospital financial reporting requirements are a result of [RCW 43.70.052](#). [Chapter 246-454 WAC](#) requires submission of both year-end and quarterly financial reports. A hospital is provided one hundred twenty days after the close of its fiscal year to file its year-end report. This time period may be extended up to and including an additional sixty days. Quarterly reports are required to be submitted within forty-five days after each calendar quarter.

The department provides hospitals with the year-end reporting template seven to ten days after the close of each hospital’s fiscal year and deadline reminders, for both year-end and quarterly reports, fourteen days prior to the due dates. Additionally, the department provides education and assistance to hospitals that experience reporting complications, such as staff turnover or system issues that potentially hinder the ability to report in a timely manner.

**Figure 1.** Statewide Hospital Charity Care in Washington, Fiscal Years 2013 - 2022.

Following a decline in charity care after implementation of the Affordable Care Act (ACA) in 2013, charity care increased from 2016 through 2020. The rate decreased in 2021 and increased in 2022. As a percentage of total hospital patient services revenue, charity care charges dropped from 2.9 percent to 1.3 percent from 2013 to 2022 (Figure 1 and Table 2). The increase from 2021 to 2022 may be attributed to 2022 legislation that increased eligibility for charity care discounts. Patients with family income up to 300 percent of the federal poverty guidelines are now eligible for charity care at all Washington hospitals and patients with family income up to 400 percent of the federal poverty guidelines are eligible for charity care at large hospitals and large health care systems. Approximately fifty percent of patients receiving care in Washington hospitals are eligible to receive charity care.

**Table 2.** Statewide Hospital Charity Care in Washington, Fiscal Years 2013-2022

Year	in Millions			Charity Care		Operating Margin %
	Total Patient Services Revenue	Adjusted Patient Services Revenue	Total Charity Care (Billed Charges)	% of Total Revenue	% of Adjusted Revenue	
2013	\$48,482	\$22,795	\$1,422	2.9%	6.2%	5.0%
2014	\$51,993	\$21,288	\$944	1.8%	4.4%	4.6%
2015	\$57,703	\$23,009	\$540	0.9%	2.3%	5.6%
2016	\$61,782	\$24,102	\$568	0.9%	2.4%	2.7%
2017	\$65,506	\$24,734	\$772	1.2%	3.1%	2.0%
2018	\$70,148	\$26,850	\$951	1.4%	3.5%	2.4%
2019	\$76,292	\$28,769	\$1,039	1.4%	3.6%	2.7%
2020	\$74,717	\$28,845	\$1,115	1.5%	3.9%	2.9%
2021	\$81,452	\$30,462	\$941	1.2%	3.1%	2.9%
2022	\$90,022	\$32,603	\$1,134	1.3%	3.5%	2.7%

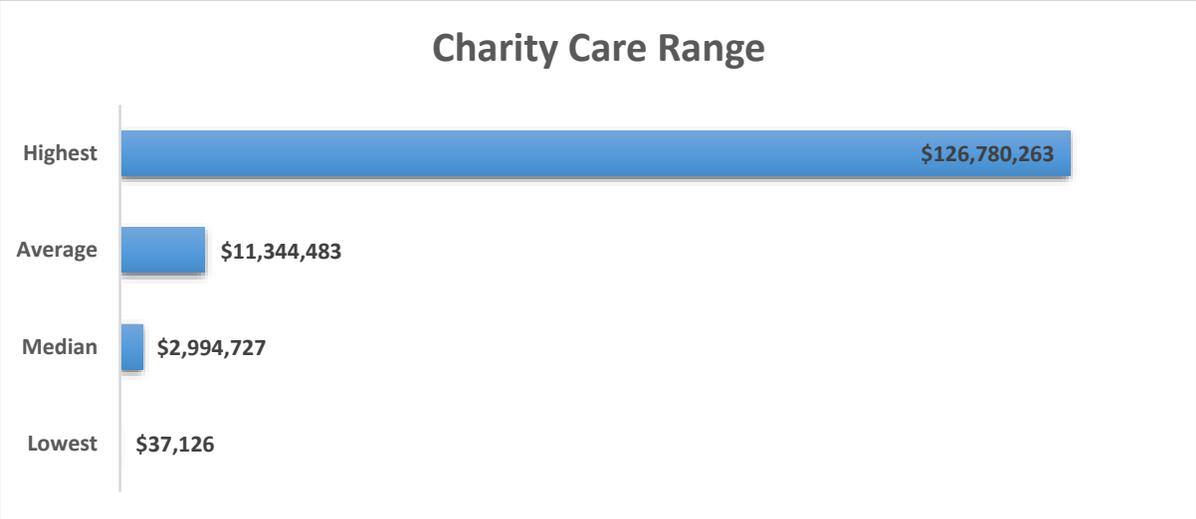

Table 2 notes: Adjusted patient service revenue is the total hospital revenue minus Medicare and Medicaid charges. Operating margin is the total hospital patient service operating revenue (net of deductions) minus total patient service operating expenses expressed as a percent. Note: Patient services revenue is the same as billed charges.

## Distribution of charity care among Washington hospitals

Charity care varied widely among hospitals in fiscal year 2022, ranging from \$37,126 to \$126,780,263. The median amount of charity care per hospital was \$2,994,727. However, the average was much higher at \$11,344,483 as several hospitals provided substantial charity care. The amount varied among hospitals in rural and urban areas and in different geographic areas of the state. These variations do not seem to be explained by population size. Some of the variation may be a function of the proportion of hospital revenue coming from Medicare and Medicaid.

Differences in charity care among hospitals may reflect demographic and socioeconomic differences in service areas, hospital service availability, and charity care practices within the hospital. A high level of reported charity care, for example, may reflect greater need for charity care in the community. Likewise, a low level of charity care may reflect a relative absence of need for charity care in a hospital’s service area.

**Figure 2.** Range of Charity Care in Washington, Fiscal Year 2022.

## Adjusting billed charges to determine actual cost of providing charity care

Because billed charges reflect mark-ups that vary between hospitals and are significantly higher than the expected payment, determining the actual cost of providing charity care to eligible patients is challenging. One way to estimate the cost of providing charity care is to use a cost-to-charge ratio.<sup>5</sup> The formula is total operating expenses (the actual cost of running the hospital and providing services) divided by total patient services revenue (billed charges).

<sup>5</sup> <http://medical-dictionary.thefreedictionary.com/hospital+cost-to-charge+ratio>

As an example of how the cost-to-charge ratio works, if a hospital had billed charges of \$1,000,000 and a cost-to-charge ratio of .345, the actual cost for that hospital to treat patients is \$345,000. If that same hospital reported charity care billed charges of \$100,000, the cost of treating those patients is \$34,500. The higher the ratio, the closer the billed charges are to the actual cost of treating patients. This is only an estimate based on overall hospital performance.

Washington hospitals reported \$1.134 billion in charity care billed charges in 2022, which amounts to \$424.1 million in actual expenses based on a cost-to-charge formula.<sup>6</sup> Cost-to-charge ratios ranged from .20 to 1.86 with a statewide average of .37. Below are some examples of cost-to-charge ratios for Washington hospitals, including a high, average, and low.

Hospital	Charity Care Charges	Cost-to-Charge Ratio <sup>7</sup>	Estimated Actual Cost of Charity Care
<b>Odessa Memorial Hospital</b>	\$54,469	1.86	\$101,046
<b>Tri-State Memorial Hospital</b>	\$2,428,489	.507	\$1,230,649
<b>CHI/Saint Francis Community Hospital</b>	\$24,828,681	.204	\$5,074,117

### Contribution of all purchasers of care to hospital charity care

Charity care as a percent of adjusted (non-Medicare, non-Medicaid) revenue decreased from 6.2 percent in FY 2013 to 2.4 percent in FY 2016. It increased to 3.1 percent in FY 2017 and steadily climbed to 3.9 percent in FY 2020. FY 2020 matched FY 2017 at 3.1 percent. In 2022 charity care as a percent of adjusted revenue increased to 3.5 percent. Because charity care is unreimbursed, all payers – including insurance companies and patients who self-pay – contribute to covering the cost of charity care provided by the hospital. Throughout this time, fluctuations in the statewide operating margin, which is a measure of hospital profitability, do not appear to have adversely affected the amount of charity care provided in Washington (Table 2).

<sup>6</sup> Since the data in this report are based on billed charges, not the actual payment expected by the hospital, the approximate cost of providing charity care can be estimated by applying a cost-to-charge ratio. Multiplying the dollars by the cost-to-charge ratio results in an approximate cost of what hospitals actually spent providing this service to patients. The statewide cost-to-charge ratio is 0.374. Based on the \$1.134 billion reported in charity care charges in FY 2022, the overall cost of providing charity care statewide was about \$424.1 million.

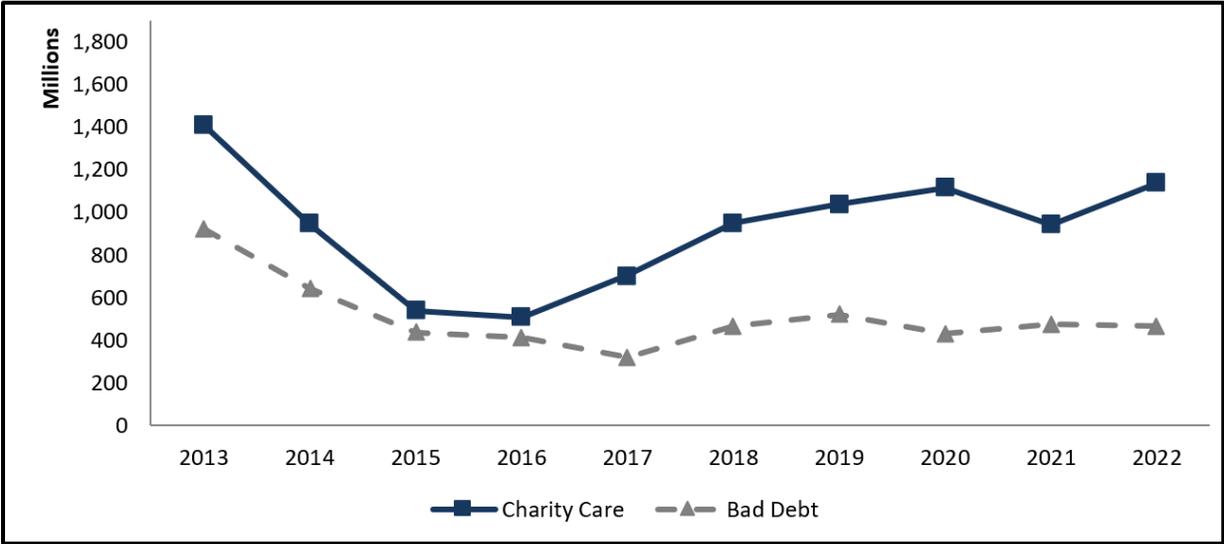

<sup>7</sup> Note: The figures in this column are rounded to the third decimal place whereas the Estimated Actual Cost of Charity Care totals in the column to the right are computed by multiplying by the cost-to-charge ratio figure rounded to the eighth decimal place.

# Uncompensated care in Washington

Uncompensated care includes both charity care and bad debt. Looking at uncompensated care gives us a bigger picture of the impact of the ACA and a way to compare Washington to other states.

Prior to the implementation of the ACA, both charity care and bad debt had been increasing. Both began to decline in 2013 with implementation of ACA provisions and this continued until 2017, when charity care began to rise again. In 2021, charity care decreased while bad debt increased slightly. The opposite occurred in 2022, charity care increased while bad debt decreased (Figure 3).

**Figure 3.** Hospital Charity Care and Bad Debt Patient Service Charges in Washington, Fiscal Years 2013 – 2022

## Summary

In 2013, as a result of the ACA, Washington saw the first decline in the amount of charity care reported by hospitals since the department began gathering these data in 1989. That decline ceased in 2016, increased steadily through 2020, and experienced a one-year decline in 2021. From 2021 to 2022, Washington saw charity care charges peak at \$1,134,448,310 which may be attributed to 2022 legislation that increased eligibility for charity care discounts to approximately fifty percent of patients receiving care in Washington hospitals.

## About this report

The department has issued an annual report since 1990 as directed by chapter [70.170](#) of the Revised Code of Washington (RCW). Your feedback is important to us. Submit your comments by email at [charitycare@doh.wa.gov](mailto:charitycare@doh.wa.gov) to help us continue to improve the charity care report.
