

Pickering Passage

Annual Shellfish Growing Area Review

Prepared By: Fiona Dahl

Area: Pickering Passage

Year Ending: December 31, 2024

Classification: Approved, Prohibited

Activities in the Growing Area in 2024

The growing area was sampled six times in accordance with the National Shellfish Sanitation Program (NSSP) Systematic Random Sampling criteria. Two portions of the Pickering Passage Growing Area were closed once for a total of 21 days due to reports of oyster-associated norovirus-like illnesses in December: four parcels along the eastern shoreline at E Bergesen Road (22003-75-00070, 22003-75-00080, 22003-12-90022, and 22003-12-90021), and parcel 22004-41-00030 on the western shoreline of Pickering Passage southwest of Harstine Island Bridge.

The Mason Conservation District received National Estuary Program funds through the Washington State Conservation Commission to provide technical assistance, education, and outreach to landowners to promote livestock best management practices.

Analytical Results of Water Samples

Table 1 summarizes the results of the last 30 samples collected from the area. This summary shows that all stations in the Approved area pass the NSSP water quality standard.

Change in Actual Pollution Sources that Impact the Growing Area

We currently have no information indicating that the area has new sources of pollution.

Classification Status

- ☒ Well within the classification standards
- ☐ Meets standards, but threatened with downgrade in classification
- ☐ Fails to meet current classification standards

Remarks and Recommendations

Table 1 shows that all stations in the Approved area meet the NSSP water quality standard for an Approved classification and the area is correctly classified.

TABLE 1. Summary of Marine Water Data (SRS) for the Pickering Passage Growing Area

Sampling Event Type: Regulatory

Maximum Number of Samples: 30

Tides Included: All

Station Number	Classification	Date Range	Range (FC/100mL)	Geomean (FC/100mL)	Est. 90 th Percentile (FC/100mL)	Meets Standard

67	Prohibited	1/23/2020 - 11/20/2024	1.7 - 920.0	9.3	97	N

The standard for approved shellfish growing waters is fecal coliform geometric mean not greater than 14 organisms/ 100 mL with an estimated 90th percentile not greater than 43 organisms/ 100 mL. The above table shows bacteriological results in relation to program standards.
