

Can COVID-19 test results be added to the IIS?

COVID-19 serology tests can be added to the IIS. These serology tests do not remove COVID-19 vaccines from the patient's vaccination forecast. The following COVID-19 serology tests can be added, including the lab values:

- Overall SARS-CoV-2 result
- SARS-CoV-2 Ab quantitative
- SARS-CoV-2 IgG qualitative
- SARS-CoV-2 N gene result
- SARS-CoV-2 Ab quantitative
- SARS-CoV-2 ORF1ab region result
- SARS-CoV-2 RdRp gene result
- SARS-CoV-2 result
- SARS-related CoV result

How can I document COVID-19 test results on patient records?

COVID-19 test results can be added manually in the Serology Module or under Special Considerations. The Serology Module on the left menu includes multiple COVID tests and the ability to add a test value. Using the Special Considerations only provides an option to document lab evidence of immunity to COVID-19.

Clinics with an HL7 connection can also send COVID test results. Please send an email to <u>IISDataExchange@doh.wa.gov</u> for questions about sending COVID test results via HL7 connection.

To manually enter COVID-19 test results:

- 1. Search for the patient that needs the COVID-19 test documented. Patients must be in active status.
- 2. Click Serology on the left menu.

3. Enter COVID test and date, then click Add Titer.

Serology View/Add	
Double-click in any date field below to enter the default date: 01/11/2021	
SerologyVacc	1
SARS-CoV-2 result	11/15/2020
	Reset Add Titer

4. Enter interpretive result as positive and value. Click Save.

To manually enter lab evidence of immunity to COVID-19 under Vaccinations, Special Considerations:

- 1. Search for the patient that needs the COVID-19 lab evidence of immunity documented.
- **2.** Click Vaccinations View/Add on the left menu.

- 3. On the Vaccination View/Add page, click on Special Considerations.

- **4.** Under Vaccine, click on the drop-down menu and select a COVID-19 vaccine. Then click on the Contraindication drop-down menu and select Serology confirmed Coronavirus (SARS-CoV-2)(COVID-19). Click Save.

Note: do NOT click the Permanent box since this will remove COVID-19 vaccine from the forecast. Currently, patients who have a history of COVID-19 infection are still recommended to receive vaccine.
